

Intelligent Serial Interface (ISI)
Model ISI551PC Card

Owner's Manual

82031702

NOTE: This equipment has been tested and found to comply with the limits for a **Class B** digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that of which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC rules. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

1.1 Introduction

The introduction of high speed, data compression modems, such as Multi-Tech's MultiModem^{II}™ Series, has shown that many PC serial ports are unable to keep up, essentially becoming a bottleneck for the entire system. The ISI551PC card provides processing power to reliably transmit data up to 115.2K bps. Using an ISI enables your system's processor to perform more efficiently. This is because the ISI handles all of the byte-by-byte interrupts generated by the asynchronous terminals and stores the data in buffers. The ISI then generates one interrupt for an entire block of information and transfers the block to the system's microprocessor.

This manual provides the hardware installation procedures for the ISI551PC card. The ISI551PC card is used with Multi-Tech's high speed modems; and is a high speed, buffered, single-port serial card, with its own on board processor. The operation of the card provides the basis for its name ISI (Intelligent Serial Interface), 551 indicating the processing power of a 16550A UART and one port support, and PC indicating that it is an ISA bus card (8 bit), which is able to operate in any 286, 386, 486 or Pentium ISA or EISA compatible bus personal computer. The ISI551PC card can be accessed by any software written to the 16550A specification.

This manual contains product specifications, installation instructions, configuration and technical support information which will assist you in the operation process. It is assumed that you have basic PC skills at the very least. Therefore, we have not included step-by-step instructions for basic operations such as logging in and file editing, etc.

1.2 Product Description

The ISI551PC card is a single port serial expansion card which adds data buffering for enhanced serial port performance. The ISI551PC features a 9-pin connector (one DB-9), and is a "half-size" expansion card that supports a high-speed interface (up to 115.2K bps via 32K bytes of RAM). The ISI551PC features a bank of 8 DIP-Switches for I/O address selection and one jumper block for IRQ level selection.

1.3 How to Use This Manual

This chapter begins with a short introduction, product description, followed by a guide (which you are now reading) to the use of this manual, as well as the ISI551PC's technical specifications.

This manual includes hardware configuration and installation procedures described in Chapter 2. Chapter 3 covers technical support, warranty and BBS information. Appendix A describes complete information on Base I/O addressing.

1.4 Technical Specifications

Computer Requirements

- 286-, 386- or 486- based PC or compatible

Operating Temperature

- 0° to 50°C (32° to 120°F)

Serial Interface

- RS232C, RS232D

Bus Type

- IBM PC standard (ISA bus) or EISA

Power Consumption

- 750 mAmps @ +5 VDC
- 100 mAmps @ +12 VDC
- 100 mAmps @ -12 VDC

Card Dimensions

ISI551PC

- 4.95" L x 2.375" W x .062" D
- 12.5 cm L x 6.0 cm W x .16 cm D

Baud Rates

- Up to 115.2K bps

Connector Types

- One DB-9 on ISI551PC

I/O Address

- Set by hardware DIP-Switch, valid range 100H to 3F8H (See Appendix A)

Interrupt Request

- Set by hardware Jumper, valid IRQs -- 2, 3, 4, 5, 7, 10, 11, 12, & 15

2.1 *ISI Card Installation*

This chapter provides you with the procedures to install the Multi-Tech ISI551PC card in your ISA or EISA bus personal computer.

Hardware installation involves:

- 1) Opening your PC.
- 2) Setting card configuration (determining I/O address DIP-Switch setting and IRQ jumper setting).
- 3) Installing the card into the PC.

2.2 *Determining Current System Settings*

When you install a serial device into your computer, the processor must have a means of routing information to and from the device and the device must have a means of gaining the processor's attention. These are called Input/Output (I/O) addresses and Interrupt Requests (IRQs), respectively. The ISI551PC card requires eight I/O addresses and one IRQ value which are not used by any other device in your system. When selecting a unique base I/O address, be sure that the other addresses are also unused. (For example, if you

use the base I/O address of 380h, addresses 380h-387h must be unused.)

To select an unused I/O address and an IRQ value, it may be necessary to find out which values are already in use. To determine your system's current settings, refer to Appendix A. The ISI551PC is shipped with the IRQ set to level 3 and the base I/O address at 2F8 hex. If you are certain that these settings are not already in use, continue with the hardware configuration and installation.

Note: If you choose IRQ 3 or 4, you may have to remove the serial I/O device from your configuration files. The ISI551PC cards do not allow you to select IRQ 6 because it is almost universally used for the floppy drive of a computer. Also, most computers will not be able to assign IRQ 2 to the ISI because IRQ 2 is used for slave control.

2.3 Hardware Installation Procedure

Perform the procedures in Table 2-1 to configure and install the ISI551PC card into your ISA or EISA bus host computer.

Table 2-1

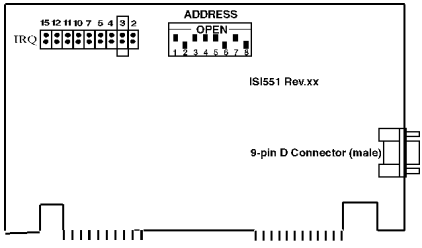

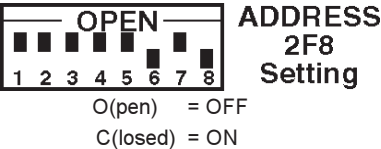

ISI Configuration and Installation Procedure	
Step	Procedure
1	<p>Make sure your computer and any peripheral equipment connected to it, are turned off. Failure to do so may damage both your ISI card and your PC. The card may be installed in any 286-, 386- or 486-based computer with an ISA or EISA bus architecture.</p>  <p>The diagram shows the top of the ISI551 Rev.xx card. On the left, there is an 'IRQ' switch with positions 15, 12, 11, 10, 7, 6, 4, 3, and 2. On the right, there is an 'ADDRESS' switch with positions 1 through 8, and an 'OPEN' position. A 9-pin D Connector (male) is located on the right side of the card. The card is labeled 'ISI551 Rev.xx'.</p>

Figure 2-1. I/O Address Switch/IRQ Jumpers

2-3

2 Remove the cover of your

Table 2-1 (cont'd)

ISI Configuration and Installation Procedure	
Step	Procedure
	computer as instructed in your computer's documentation.
3	Locate the unused slot(s) which you will be using for your ISI card, and remove the slot cover(s) per the instructions in your computer's documentation.
4a	The figure below shows the default settings for this card. Record any changes made to the Base I/O Address settings. The default Base I/O Address is 2F8 (COM2). The valid range is 100H - 3F8 H; refer to Appendix A for a full table of address settings.
 <p>ADDRESS 2F8 Setting</p> <p>O(pen) = OFF C(losed) = ON</p>	
Figure 2-2. I/O Address Default	

2-4

Table 2-1 (cont'd)

ISI Configuration and Installation Procedure	
Step	Procedure
4b	Select a unique I/O Address for your ISI551PC card using the block of 8-position DIP-Switches on your ISI circuit board. Figure 2-3 shows various I/O addressing and IRQ settings.
5	Record any changes you make to these settings and keep them handy for the driver installation.

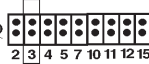

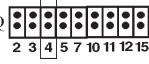

Com Port	I/O Address Setting	IRQ Level
COM1	 ADDRESS Setting 3F8	 IRQ Level 4
COM2	 ADDRESS Setting 2F8	 IRQ Level 3
COM3	 ADDRESS Setting 3E8	 IRQ Level 5
COM4	 ADDRESS Setting 2E8	 IRQ Level 3

Figure 2-3. I/O Address and IRQ Level Settings

Table 2-1 (cont'd)
ISI Configuration and Installation Procedure

Step	Procedure
6	Install the ISI card into the selected expansion slot(s) in the same manner as any other add-on card, as instructed in your computer's documentation.
7	Fasten the retaining bracket to the computer chassis and replace the cover.
8	Connect the appropriate cable to the ISI card. The ISI551PC has one DB-9 connector. The DB-9 is a DTE-type serial port suited for the connection of Data Circuit-terminating Equipment, or DCEs. Note: Any cables connected to the computer should be shielded to reduce interference.
9	Turn power on to your computer.

If you are using MultiExpress communication software, note during your communication set-up that your ISI card is activated by choosing Serial and then Comm port selection. Do not use the MultiTech ISI selection for this card. The MultiTech ISI selection is used with ISI models ISI502 and ISI508, which are older legacy products.

3.1 Introduction

This chapter starts out with statements about your ISI551PC's 2-year warranty. The next section, Tech Support, should be read carefully if you have questions or problems with your ISI551PC. It includes the technical support telephone numbers, space for recording your ISI551PC information, and an explanation of how to send in your ISI551PC should you require service. The final two sections explain how to use our Bulletin Board Service (*BBS*), and a brief section on the CompuServe/Internet forums.

3.2 Limited Warranty

Multi-Tech Systems, Inc. ("MTS") warrants that its products will be free from defects in material or workmanship for a period of two years from the date of purchase, or if proof of purchase is not provided, two years from date of shipment. MTS MAKES NO OTHER WARRANTY, EXPRESSED OR IMPLIED, AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. This warranty does not apply to any products which have been damaged by lightning storms, water, or power surges or

which have been neglected, altered, abused, used for a purpose other than the one for which they were manufactured, repaired by the customer or any party without MTS's written authorization, or used in any manner inconsistent with MTS's instructions.

MTS's entire obligation under this warranty shall be limited (at MTS's option) to repair or replacement of any products which prove to be defective within the warranty period, or, at MTS's option, issuance of a refund of the purchase price. Defective products must be returned by Customer to MTS's factory transportation prepaid.

MTS WILL NOT BE LIABLE FOR
CONSEQUENTIAL DAMAGES AND UNDER NO
CIRCUMSTANCES WILL ITS LIABILITY
EXCEED THE PURCHASE PRICE FOR
DEFECTIVE PRODUCTS.

3.3 Tech Support

Multi-Tech has an excellent staff of technical support personnel available to help you get the most out of your Multi-Tech product. If you have

any questions about the operation of this unit, call 1-800-972-2439. Please fill out the ISI551PC information (below), and have it available when you call. If your ISI551PC requires service, the tech support specialist will guide you on how to send in your ISI551PC (see Section 3.3.2).

3.3.1 Recording ISI551PC Information

Please fill in the following information on your Multi-Tech ISI551PC. This will help tech support in answering your questions.

ISI551PC *Model No.*: _____
ISI551PC *Serial No.*: _____
ISI551PC *Firmware Version*: _____
DataComm Software *Type/Version*: _____

Please note the status of your ISI551PC before calling tech support.

3.3.2 Service

If your tech support specialist decides that service is required, ISI551PCs may be sent (freight prepaid) to our factory. Return shipping charges will be paid by Multi-Tech Systems.

Include the following with your ISI551PC:

- a description of the problem.
- return billing and return shipping addresses.
- contact name and phone number.
- check or purchase order number for payment if the ISI551PC is out of warranty. (The standard repair charge for this ISI551PC is \$95. This price is valid at the time of this publication but could change in the future. Check with your technical support specialist.)
- if possible, note the name of the technical support specialist with whom you spoke.

If you need to inquire about the status of the returned product, be prepared to provide the **serial number** of the product sent (see Section 3.3.1).

Send ISI551PCs to this address:

MULTI-TECH SYSTEMS, INC.
2205 WOODALE DRIVE
MOUNDS VIEW, MINNESOTA 55112
ATTN: SERVICE OR REPAIRS

You should also check with the supplier of your ISI551PC on the availability of local service and/or loaner units in your part of the country. You may call us at 1-800-328-9717 or (612) 785-3500 (in Minnesota).

34 *About the Multi-Tech BBS*

Multi-Tech Systems maintains a Bulletin Board Service (*BBS*) for its customers. The information available via the BBS includes: new product information, product upgrade data, problem solving tips, and a message service for you to leave questions for which you would like additional information. The phone number for the Multi-Tech BBS is (612) 785-9875 or (800) 392-2432 (U.S.A. and Canada). The BBS can be accessed by any asynchronous modem operating at 28,800-1200 bps with a setting of 8 bits, 1 stop bit, and no parity (V.34 and downward compatible).

35

3.4.1 How to Use the Multi-Tech BBS

To use Multi-Tech's BBS, perform the following steps.

1. Dial our BBS at 1-800 392-2432 (U.S.A. and Canada) or 612-785-9875 (International).
2. Set your computer or communications program to "8N1", and to emulate ANSI (e.g., with MultiExpress software, press ALT-S and choose "ANSI").
3. At the prompt, type your first name, last name, password, then hit RETURN. If you are a first time caller, after you hit RETURN the BBS asks if your name is spelled correctly. If you say yes, our questionnaire is displayed. You can use our BBS on your first call.
4. There are four BBS areas: the Main Menu, the Files Menu, Bulletins (from the main Menu), and the Message Menu. All Bulletins are Menu-driven. To read the Bulletins, enter the number of the bulletin you wish to read.
5. File Menu: from the Main Menu, type **F:** and the Files are displayed. If you want a list of directories, type **L** (list directory) and then type **L** again for a list of all directories. If you do not type the second **L**, you will list all of

the files on the BBS. At the list of the directories, select the number of directories required. A list of files and a description for each of the files is displayed. Select a file that you would like to download; if you already know the file name, type **D** at the Files Menu to download the selected file(s). Press **V** to view a text file.

6. At the Message Menu, you can leave a message to the Sysop (you can not read messages at this point). The BBS will tell you if you have a personal message (mail). At the prompt (*would you like to read it now?*), type **R** for read now. You must read your message(s) when you first access the BBS.

3.5 *About CompuServe/Internet*

In addition to the BBS, Multi-Tech provides support through CompuServe's Modem Vendor Forum (*GOMODEMVEN*) under *GO MULTITECH*. Refer to your CompuServe documentation for special operating procedures.

Multi-Tech is a commercial user of the Internet, and messages are retrieved from our customers on a periodic basis. If you prefer receiving technical support via the Internet, please address your message to: *techsupport@multitech.com*.

Multi Tech also maintains a home page on the World Wide Web at the following address:

<http://www.multitech.com>

Multi Tech also maintains a FTP Server at the following address:

<FTP.multitech.com>

Appendix A Base I/O Address Switch Settings

The table below provides the DIP-Switch settings for valid base I/O addresses of the ISI551PC. The switches can be set to "OPEN" (O in the table below) or to "CLOSED" (C in the table below). Holding the board with the switch facing you (reading numbers 1-8 left to right), the "UP" position for the switch is OPEN, and the "DOWN" position is CLOSED. "S1" below is labeled as "1" on the left side of the switch and so on, through S8. For an example, turn to page A-3 and compare the default switch settings (2F8) with the address 380h listing.

Table A-1
