

PostScript® 3™ emulation Kit

Installation Instructions

PostScript 3 emulation Kit Part Number: 70049601

1. *Unpack the cards and remove any shipping materials. The PostScript card is marked PS on the label. The memory card is marked 16MB on the label.*

2. Turn off the printer, and remove the power cord and interface cable.

NOTE: If you have a network card installed, remove it temporarily before installing the PostScript option.

3. Loosen the access panel screw.

4. Remove the access panel and locate the PostScript connector (1).

5. Install the PostScript card:
a. Hold the card (*make sure PS is on the label*) so that the **notch** (2) is on the bottom right corner.

b. Position the card into the connector.

c. Press down on the card until it snaps into place and the gold contacts are fully inserted in the connector.

6. Install the memory chip:

Insert the card with the notch towards the front of the printer. Press down on the card until it snaps into place and the gold contacts are fully inserted in the connector.

7. Check to make sure that both cards are fully inserted and installed correctly.

8. Replace the access panel:
a. Align the panel tabs at bottom.
b. Swing the panel up and in place.
c. Tighten the screw.

9. **Verify Installation**

Print a Menu Map:

- Press the **Menu** button one or more times until INFO.MENU appears on the display.
- Press SELECT twice. The MenuMap prints.
- PSE Program version and Total Memory Size 32 MB appears in the header, and PRINT PSE FONT in the Information Menu. If not, check to be sure that the cards are installed correctly.

Your printer is factory set to AUTO EMULATION (AUTO appears on the printer display). In this setting the printer will sample data and automatically switch between PostScript emulation and the other emulations. If the printer is not set to AUTO EMULATION, see the User's Guide for instructions to set it in the printer Menu.
