Information	43

For your safety

Before installing your CD 135, carefully read the following informations:

Power requirements

- > This product requires an electrical supply of 220-240 volts, alternating monophased power, excluding IT installations defined in standard EN 60950. In case of power failure, the communication can be lost.

Warning ! The electrical network is classified as hazardous according to criteria in the standard EN 60950. The only way to power down this product is to unplug the power supply unit from the electrical outlet. Ensure the electrical outlet is located close to the apparatus and is always easily accessible.

Telephone connection

- > Always use the line cable provided with the product otherwise you may not have a dialling tone.
- > If you have a broadband DSL Internet connection, please make sure you have one DSL filter plugged directly on each line socket used in the house and check the modem and the phone are plugged in the correct filter slot (one specific for each).

Answer machine functions**KEYS****FUNCTIONS**

Play new message(s) / Activate or deactivate answer machine mode. Always press this key before using one of the following answer machine functions :

Go back to the previous message.

Play all recorded messages (new and old) or play the current message again.

Skip forward to the next message.

Long press to record a new outgoing message after the beep.

Play the current outgoing message.

Delete the current message.

Turn ON the answer machine.

Stop message playback or stop outgoing message recording.

Turn OFF the answer machine.

Record a memo via the handset after the beep. Count as a new message after recording.

CD 135 base station

**1 Answer machine indicator**

- LED ON : Answer machine activated.
- LED OFF : Answer machine deactivated.
- LED blinking : New message(s) or memo on answer machine.
- LED blinking fast : The answer machine memory is full.

2 Paging key

The paging key enables you to locate a missing handset if the handset is in range and has charged batteries. Press the key until the handset starts to ring. Once retrieved, press paging key again to end paging.

The display gives information about the operation of your telephone. Following icons can be shown in the headline of the display:

When being used for the first time, it is sometimes necessary to wait until the battery is sufficiently charged before the icons appear on the display.

When ON the battery is fully charged. **When blinking**, this symbol indicates that the battery needs to be charged.

An external call is in progress. **When blinking**, this symbol indicates that there is an internal call in progress or that the line is already busy.

New message(s) on your voice mailbox. **When blinking**, this symbol indicates that there is one or more new message(s) on the answer machine.

New Call log records or Call log records are being reviewed.

Phonebook is accessed.

The alarm clock is activated.

The handset loudspeaker is activated.

The ringtone is deactivated.

The handset is registered and in range of the base. **When blinking**, this symbol indicates that the handset is not registered to the base or out of range.

OK

Turn ON when entering Menu mode. In Phonebook mode to enter next menu level.

Back

Turn ON when entering Menu mode. In Phonebook mode to return to higher menu level. In editing mode to delete the last digit/character entered.

Indicates further options are available.

Installing the base station

Place your product close enough to the telephone and mains power sockets so that the cables will reach. To properly install the base station, plug the line cord and the power cable into the base station. Plug the cord and the cable into the wall. If you have a broadband DSL Internet connection, please make sure you have one DSL filter plugged directly on each line socket used in the house and check the modem and the phone are plugged in the correct filter slot (one specific for each).

Warning ! The electrical network is classified as hazardous according to criteria in the standard EN 60-950. The only way to power down this product is to unplug the power supply from the electrical outlet. Ensure the electrical outlet is located close to the apparatus and is always easily accessible.

Please take care that the power supply and telephone line are connected to the correct sockets as incorrect placement could damage your equipment.

Warning ! Always use the line cable provided with the product otherwise you may not have a dialling tone.

- 1 Connect the telephone line cord delivered with the product.
- 2 Connect the power supply.

Installing and replacing the batteries in the handset

To insert the batteries, open the battery cover, place the batteries as indicated and then replace the battery cover. When the battery icon is blinking, charge is needed. Allow 24 hours for the batteries to fully charge. On first use it may be necessary to wait for a few minutes before seeing symbols on the display.

Warning : the base station must always be plugged into the mains when charging or when in use. Always use rechargeable batteries.

The warranty does not apply to the batteries and any other components which have a limited lifetime or are exposed to wear.

Warning ! Always use the line cable provided with the product otherwise you may not have a dialling tone.

Batteries should not be disposed of with general household waste.

Battery life and range

Optimal battery life is reached after 3 cycles of complete charging & discharging. When reaching the range limit and the conversation becomes crackly, move closer to the base. To reach optimal range, place the base station away from electrical appliances.

Battery life in talk time	Battery life in standby mode	Indoor range	Outdoor range
up to 12 hours	up to 150 hours	up to 50 metres	up to 300 metres

Using GAP standard compliance

The GAP standard guarantees that all DECT™ GAP handsets and base stations comply with a minimum operating standard irrespective of their make. Your CD 135 handset and base station are GAP compliant, which means the minimum guaranteed functions are : register a handset, take the line, receive a call and dial. The advanced features may not be available if you use another handset than a CD 135 with your base station.

To register and use your CD 135 handset with a GAP standard base station of a different make, first follow the procedure described in the manufacturer's instructions, then follow the procedure described on page 31.

To register a handset of another make to the CD135 base station, place the base station into registration mode (page 31), then follow the procedure in the manufacturer's instructions.

DECT™ is a Trade Mark of ETSI registered for the benefit of the implementers of the DECT technology.

Using the menus

From idle mode, press  to enter the menu. Use the

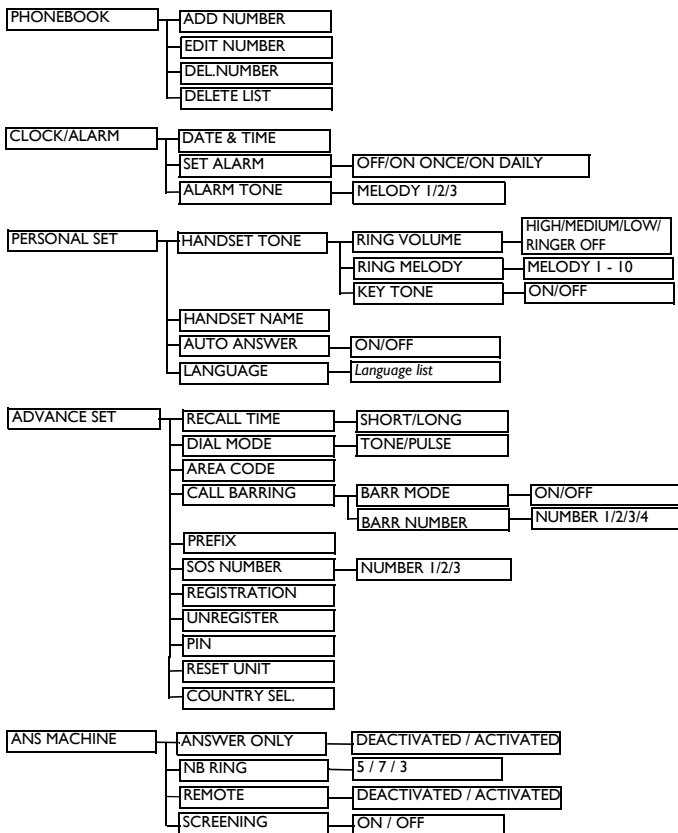

Navigation keys  to go up or down in the menu list.

Press **Softkey**  **OK** to confirm the selection.

Press **Softkey**  **BACK** to exit the menu or to go back to the previous menu level.

Menu structure

EN

You can enter the names of your phonebook entries character by character, pressing the corresponding key as many times as necessary to reach the desired character.

Press  under the label **BACK** to delete a character.

Example to write "Peter"

Press  once : **P**

Press  twice : **PE**

Press  once : **PET**

Press  twice : **PETE**

Press  three times : **PETER**

2. Long press , **CONFERENCE** is shown. The 3 people can share the conversation.

Paging

This feature allows you to locate the handset(s).

Press  on the base station. All the subscribed handsets ring. Press any key on the handset to stop ringing once relocated.

Chain Dialing

If you have entered in your phonebook for example only the main number of a company without the extension, this feature allows you to add the subnumber (extension) of a particular person and to dial out this number.

1. Take the line  and press  to open phonebook list.
2. Scroll  to select an entry and press  to dial first part.
3. Enter the extension , each digit blinks to indicate dialed out.

Clock and Alarm Settings

To set the Date and Time

1. Press  and press Down  to reach **CLOCK/ALARM**.
2. Press , **DATE & TIME** is shown.
3. Press  and enter the date .
4. Press , enter the time  and press  to confirm.
5. Long press  to display the date and time.

Note: If you are connected to an ISDN line, the date & time may be updated after each call. Please check the date & time settings in your ISDN system.

To set or change the alarm clock settings

1. Press  and press Down  to reach **CLOCK/ALARM**.
2. Press  and press Down  to reach **SET ALARM**.

3. Press , scroll  to select the appropriate setting (**OFF** or **ON ONCE** or **ON DAILY**).

4. Press  to confirm.

If you select **ON ONCE** or **ON DAILY** :

Enter the time  and press  to confirm.

The alarm rings for at most 1 minute and  is shown in idle mode.

Note: When the alarm rings, press any key to stop the alarm.

To set the alarm tone

1. Press  and press Down  to reach **CLOCK/ALARM**.

2. Press  and press Down  to reach **ALARM TONE**.

3. Press , scroll  to select the appropriate setting (**MELODY 1** or **MELODY 2** or **MELODY 3**).

4. Press  to confirm.

Personal settings

To set the handset ringer volume or silence mode (Ringer OFF)

1. Press  and press Down  to reach **PERSONAL SET**.

2. Press , **HANDSET TONE** is shown, press , **RING VOLUME** is shown.

3. Press , scroll  to select the appropriate setting (**HIGH** or **MEDIUM** or **LOW** or **RINGER OFF**). The current ring melody is played.

4. Press  to confirm.

WARNING : When the handset rings during an incoming call, please do not hold the handset too close to your ear as the volume of the ringing tone may damage your hearing.

To select the handset ring melody

1. Press  and press Down  to reach **PERSONAL SET.**
2. Press , **HANDSET TONE** is shown, press  and scroll Down  to reach **RING MELODY.**
3. Press , scroll  to select one of the available melodies 1- 10. The current ring melody is played.
4. Press  to confirm.

To activate / deactivate the key tone

1. Press  and press Down  to reach **PERSONAL SET.**
2. Press , **HANDSET TONE** is shown, press  and scroll Down  to reach **KEY TONE.**
3. Press , scroll  to select **ON** or **OFF** and press  to confirm.

To rename the handset

The default name is : **PHILIPS**. You can enter 10 characters for the handset name.

1. Press  and press Down  to reach **PERSONAL SET.**
2. Press , and press Down  to reach **HANDSET NAME.**
3. Press , enter the name  and press  to confirm.

To activate / deactivate the auto answer mode

If **ON** you take the line by lifting the handset from the charge cradle.

1. Press  and press Down  to reach **PERSONAL SET.**
2. Press  and press Down  to reach **AUTO ANSWER.**
3. Press , scroll  to select **ON** or **OFF** and press  to confirm.

To change the display language

1. Press  and press Down  to reach **PERSONAL SET.**
2. Press  and press Down  to reach **LANGUAGE.**
3. Press , scroll  to select your language and press  to confirm.

Advanced settings

To change the recall time

This option is helpful when using operator services. The default value of recall time that is preset in your CD 135 should be the best suited for your country network and therefore you should not need to change it.

1. Press  and press Down  to reach **ADVANCE SET.**
2. Press , **RECALL TIME** is shown.
3. Press , scroll  to select **SHORT** or **LONG** and press  to confirm.

To change the dial mode*

*Country dependent

The default value of dial mode that is preset in your CD 135 should be the best suited for your country network and therefore you should not need to change it.

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **DIAL MODE**.
3. Press , scroll  to select **TONE** or **PULSE** and press  to confirm.

Local area code setting*

*Country dependent

If your local PSTN sends the CID with local area code attached, it is necessary to filter out the local area code when dial back from call log. The AREA CODE function allows you to remove the local area code from the call log entries. The local area code can be set from 1 to 4 digits. The default setting is blank.

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **AREA CODE**.
3. Press  to view the current setting.
4. Enter the new area code  (the maximums for the area code is 4 digits) and press  to save.

To set or change Call Barring

This menu allows you to limit the use of your phone to specific calls by barring parts (prefix) of outgoing numbers. You can set 4 different barring numbers.

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **CALL BARRING**.
3. Press  and enter the PIN code  (by default the PIN code is 0000).
4. Press , press Down  to reach **BARR NUMBER** and press .

5. Scroll  to select the barring number location **1**, **2**, **3** or **4** and press .
6. Enter the barring number  (the maximums for the barring number is 4 digits) and press  to confirm.

Note: For example if you want to bar international calls, enter the barring number 00.

To activate / deactivate Call Barring

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **CALL BARRING**.
3. Press  and enter the PIN code  (by default the PIN code is 0000).
4. Press , scroll  to select **ON** or **OFF** and press  to confirm.

To set or deactivate the prefix number

This feature allows you to set the phone to use the cheapest operator prefix. The maximum length of the prefix is 5 digits. Once the prefix number is set, it is automatically inserted at the beginning of each number dialed out.

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **PREFIX**.
3. **To set the prefix number :** Enter the prefix number  (max. 5 digits) and press  to confirm.

OR

To deactivate the prefix number : Delete the current prefix number by pressing  until „-----“ (blank prefix number) is shown on the screen and press  to confirm.

To set or change an SOS number

The SOS number feature allows you to enter 3 SOS phone numbers, which can be dialed out although the call barring is activated. The maximum length of an SOS number is 4 digits. The PIN code is required when modify the SOS number.

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **SOS NUMBER**.
3. Press  and enter the PIN code  (by default the PIN code is 0000).
4. Press , scroll  to select the SOS number location **1**, **2** or **3** and press .
5. Enter the SOS number  (max. 4 digits) and press  to confirm.

To register a handset

Up to 5 handsets can be registered to the base station.

If you have inadvertently unregistered your handset, you can register it again. Additional handsets must be registered to the base before use.

Warning : If you wish to register non Philips handsets to the CD 135 base station, make sure that this handset is GAP compliant otherwise it will not operate properly (see page 11).

To register a handset, first press the paging key  on the base for approx. 5 seconds when the base is in idle mode. Then carry out the following steps on the handset within one minute :

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **REGISTRATION**.
3. Press , enter the PIN code  (by default the PIN code is 0000) and press  to confirm.

If the registration was successful, a long confirmation tone is heard and the handset number (1 to 5) will be assigned by the base automatically.

To unregister a handset

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **UNREGISTER**.
3. Press , enter the PIN code  (by default the PIN code is 0000) and press .
4. Scroll  to select the handset number and press . **UNREGISTERED** appears on the screen.

Note: If you have your handset serviced, please make sure it is unregistered from the base station before taking it back to the repair centre.

To change the PIN code

The default PIN code is "0000". We advise you to personalize it. The maximum length for the PIN code is 8 digits.

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **PIN**.
3. Press , enter the current PIN code  and press .
4. Enter the new PIN code  and press  to confirm.

To reset to default settings (base station and handset)

You can reset your phone to the default settings (see page 33) at any time. Note that after a reset all your personal settings and call log entries will be deleted, however your phonebook remains unchanged.

1. Press  and press Down  to reach **ADVANCE SET**.
2. Press  and press Down  to reach **RESET UNIT**.
3. Press , **CONFIRM?** is shown. Press  to confirm.

Country selection

Use this feature if you need to re-configure your CD 135.

1. Press  and press Down  to reach **ADVANCE SET.**
2. Press  and press Down  to reach **COUNTRY SEL..**

The CD 135 includes an answer machine that records unanswered calls when it is activated. The maximum recording time is 15 minutes, outgoing messages and memos included.

The answer machine is accessible via the handset that has a dedicated keypad allowing to access to the answer machine functions (by default handset 1). There is also a menu to set the answer machine options.

Handset keys for answer machine control

KEYS

FUNCTIONS

Play new message(s) / Activate or deactivate answer machine mode. Always press this key before using one of the following answer machine functions :

Skip back to the previous message.

Play all recorded messages (new and old and memo) or play the current message again.

Skip forward to the next message while listening.

Long press to record a new outgoing message after the beep.

Play the current outgoing message.

Delete the current message.

Turn ON the answer machine.

Stop message playback or stop outgoing message recording.

Turn OFF the answer machine.

Record a memo via the handset after the beep. Count as a new message after recording.

To switch the answer machine ON

Press , then on the handset to switch the answer machine ON.

In answer machine mode, the handset screen shows on the left side : , when the answer machine is activated.

When the answer machine is ON, it will answer the call after a certain number of rings depending on the setting (see page 37). After answering the call, the answer machine will play your welcome message and record the message left by the caller, if any.

To switch the answer machine OFF

Press , then  on the handset to switch the answer machine OFF.

In answer machine mode, the handset screen shows on the left side : _, when the answer machine is deactivated.

Saved messages

To listen to new message(s)

When new messages are recorded on the answering machine, then the icon  is flashing on the handset display and the LED on the base blinks until the messages are played.

1. Press , the loudspeaker on the handset is automatically activated and the display shows under the icon  the number of new messages, i.e. **03** and the time when the last message has been recorded, i.e. **16:25**.
2. Then the newest message is played automatically on the speakerphone. During message playing the date and time of recording will be shown alternating on the handset display.

Note: Messages are always played in chronological order, the newest message first.

The message can be played back on the receiver instead of the speaker : Press

Once all the new messages have been played, the icon  stops blinking and stays steady indicating there are old messages not deleted on the answer machine. The message counter indicates the number of old messages on the answer machine and the time when the last one has been recorded.

Note: If there is no more memory left, the base LED is blinking very fast, the CD 135 will switch to „Answer only“ mode and no new message can be recorded. Delete old messages (see page 36) to free space for the new on.

Adjusting the loudspeaker volume during message playback

Press  (5 loudspeaker volumes are available).

Available functions during message playback :

KEYS

FUNCTIONS

Skip back to the previous message.

Play all recorded messages (new and old and memo) or play the current message again.

Skip forward to the next message while listening.

Delete the current message.

Stop message playback.

Delete current message

1. Press to enter answer machine mode.
2. Press to start message playback.
3. Press to delete the current message. A long beep confirms deletion of the message and the next message is played.
Repeat step 3. to delete further messages.

Note: Messages deleted can not be recovered.

Answer machine settings

Use the answer machine menu via the handset to change the settings of the answer machine.

To select the answer mode

By default the answer machine is set in „Answering & recording“ mode (messages can be left by the callers), this can be change in „Answer only“ (no messages can be left by the callers).

1. Press and press Down to reach **ANS MACHINE**.
2. Press , **ANSWER ONLY** is shown.
3. Press , scroll to select the appropriate setting (**ACTIVATED** or **DEACTIVATED**).
4. Press to confirm.

Note: When **ANSWER ONLY / ACTIVATED** is selected, then the associated outgoing message is automatically set, i.e. „This is an answering machine, please call back later“.

When **ANSWER ONLY / DEACTIVATED** is selected, then the associated outgoing message is automatically set, i.e. „This is an answering machine, please leave your message after the tone“.

The voice language for the default outgoing messages depends on the country selected in Welcome mode, see page 2.

To set the number of rings before answering

You can set the answer machine to start playing the outgoing message after a given number of rings (3, 5 (default setting) or 7).

1. Press  and press Down  to reach **ANS MACHINE**.
2. Press , **ANSWER ONLY** is shown, press Down  to reach **NB RINGS**.
3. Press , scroll  to select one of the available settings (**3, 5, or 7**).
4. Press  to confirm.

To activate / deactivate the remote control

By default the remote control of the answer machine is deactivated. You can activate this function, this allows you to remotely access your answer machine via any telephone and check your messages.

1. Press  and press Down  to reach **ANS MACHINE**.
2. Press , **ANSWER ONLY** is shown, press Down  to reach **REMOTE**.
3. Press , scroll  to select one of the available settings (**DEACTIVATED** or **ACTIVATED**).
4. Press  to confirm.

Note: To remotely control your answer machine, see page 40.

To activate / deactivate call screening

You can activate (default setting) or deactivate the call screening on the handset loudspeaker so that you can choose whether to hear or not the callers leaving a message and to decide whether or not to take the call.

1. Press  and press Down  to reach **ANS MACHINE**.
2. Press , **ANSWER ONLY** is shown, press Down  to reach **SCREENING**.
3. Press , scroll  to select one of the available settings (**ON** or **OFF**).
4. Press  to confirm.

Personal outgoing messages

You can record one personal outgoing message. This personal outgoing message will replace the default ones. Only if you delete your personalized welcome message the default welcome messages will automatically be restored. You do not need to delete your previously recorded welcome message to record a new one. Once you record a new welcome message, the old one will be overwritten.

To record your personal outgoing message

1. Press  on the handset to enter answer machine mode.
2. Long press  until you hear a beep.
Speak into the microphone of the handset after the beep.
3. Press  or  or  to stop recording.

Note: If you want to have the default outgoing message back, repeat steps 1 and 2 and press  within 1 second to stop recording. The answer machine will restore the default outgoing message.

To playback personal or default outgoing message

Depending on the answer mode setting „Answer & record“ or „Answer only“ (see page 37) the appropriate default outgoing message will be played. If you have recorded a personal outgoing message only this welcome message will be played.

1. Press  on the handset to enter answer machine mode.
2. Press  until outgoing message playback starts.

Note: If you are not satisfied with your personal outgoing message recorded, repeat the steps in section “To record your personal outgoing message”, page 38 and the old welcome message will be overwritten.

If you want to have the default outgoing message back perform a reset, see “To reset to default settings (base station and handset)”, page 32.

Record and listen to a memo

This feature allows you to leave vocal messages for your family on the answer machine. Memos are stored in the answer machine memory and affect the recording capacity.

To record a memo

1. Press  on the handset to enter answer machine mode.
2. Press , **RECORD MEMO** is shown on the handset screen. Speak into the handset microphone after the beep.
3. Press  or  to stop recording.
The LED on the base and the handset icon  blink to indicate that there is a new voice message.

To listen to a memo

1. Press , the loudspeaker on the handset is automatically activated and the display shows under the icon  the number of new messages, i.e. **03** and the time when the last message has been recorded, i.e. **16:25**.
2. Then the first new message is played automatically on the speakerphone. During message playing the date and time of recording will be shown alternating on the handset display.

Note: Messages are always played in chronological order, the newest message first.

The message can be played back on the receiver instead of the speaker : Press

. To delete old memos, see “Delete current message”, page 36.

Once all the new messages have been played, the icon  stops blinking and stays steady indicating there are old messages not deleted on the answer machine. The message counter indicates the number of old messages on the answer machine and the time when the last one has been recorded.

To remotely control your answer machine

WARNING : For security reasons the remote control of the answer machine is deactivated by default. You must activate this function on your CD 135 phone, see page 37, to be able to remotely access your answer machine.

You can access your answer machine when you are away by using any tone dialing phone.

To remotely access your answer machine

1. From another phone dial home.
2. If your answer machine is ON, during or after the outgoing message press the

key (#) on the external phone ;

OR

If your answer machine is OFF, you will hear a beep after 10 rings, then press the

key (#).

3. Enter your PIN code.
4. If you have new messages after the beep they will be automatically played.

The following table indicates the features available when remotely accessing the answer machine.

KEYS

FUNCTIONS

1

Go back to the previous message.

2

Play all recorded messages (new and old, included memos) or play the current message again.

3

Skip forward to the next message.

4

Press to record a new outgoing message after the beep.

5

Play the current outgoing message.

6

Delete the current message.

8

Stop message playback or stop outgoing message recording.

Safety information

This equipment is not designed to make emergency calls when the power fails. An alternative has to be made available to allow emergency calls.

The default product PIN code is preset to 0000. If you change this PIN code, keep the PIN details in a safe place where you have easy access to them. Do not lose the PIN code.

Conformity

Hereby, Philips declares that the CD 135 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC. This product can only be connected to the analogue telephone networks of the countries mentioned on the packaging. The Declaration of conformity is available on www.p4c.philips.com.

Safety precautions

- Do not allow the handset to come into contact with water.
- Do not open the handset or the base station. You could be exposed to high voltages.
- Do not allow the charging contacts or the batteries to come into contact with conductive materials.
- Never use any battery type other than the one supplied : risk of explosion.
- Do not use the product in places where there are explosive hazards.
- Do not let small metal objects come into contact with the product. This can deteriorate audio quality and damage the product.

Environmental care

Please remember to observe the local regulations regarding the disposal of your packaging materials, exhausted batteries and old phone and, where possible, promote their recycling.

Recycling & disposal

Disposal instructions for old products :

The purpose of the WEEE directive (Waste Electrical and Electronic Equipment; 2002/96/EC) is to ensure that products are recycled using best available treatment, recovery and recycling techniques to ensure human health and high environmental protection.

Your product is designed and manufactured with high quality materials and components, which can be recycled and reused.

Do not dispose of your old product in your general household waste bin.

Inform yourself about the local separate collection system for electrical and electronic products marked by this symbol :

Use one of the following disposal options :

1. Dispose of the complete product (including its cables, plugs and accessories) in the designated WEEE collection facilities.
2. If you purchase a replacement product, hand your complete old product back to the retailer. He should accept it as required by the WEEE directive.

Philips has marked the packaging with standard symbols designed to promote the recycling and appropriate disposal of your eventual waste.

A financial contribution has been paid to the associated national recovery & recycling system.

The labelled packaging material is recyclable.

Specifications are subject to change without notice.
