Clarity

Innovative clarity speaker drivers are the essence of this headphone. Developed by the world famous Philips laboratories, Clarity speaker drivers combine powerful bass performance with crispness of detail.

40mm speakers with large acoustic chambers for full bodied sound

These Clarity speakers with large acoustic chambers make sure that every musical nuance is reproduced, from deep bass tones right up to the high-frequency pitch.

Study design with soft, adjustable headband

The sturdy headband is padded with soft leatherette to guarantee a comfortable, secure fit.

Open ear-shells for optimal acoustic performance

The open ear-shell design enhances the headphone's acoustic performance to the maximum.

Soft, contoured ear-cushions

The soft, contoured ear-cushions are made from skin-friendly cloth to ensure hours of wearing comfort.

Double-hinged ear-shells for perfect ear-fit

The double-hinged construction enables the earshells to automatically adapt to the shape of the wearer's head, which results in excellent wearing comfort and sound quality. Because the ear-shells can rotate up to 180 degrees vertically, they are ideal for single sided DJ monitoring.

3 meter single-sided OFC cable connection for excellent sound transfer

High-grade Oxygen-Free Copper cable ensures excellent sound purity is retained from the audio source to the headphone.

3.5 - 6.3 mm gold-plated connector

Ensures noise-free connection to all types of audio systems for high-quality sound performance.

Packaging

Consumers can immediately see the product through the window box. The box is compact, standardised in size and stackable for optimum shelf-space management. It is constructed in such a way that the headphone set can easily be re-packed after demonstration.
