## About this manual

This manual contains service and reference information for the IBM® computer Types 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6436, 6347, 6348.

This manual is divided into product service sections (by machine chassis) and a related service section, as follows:

- The product service sections include procedures for isolating problems to a FRU, a Symptom-to-FRU Index, additional service information and an illustrated parts catalog.
- The related service section includes safety notices and safety information, and problem determination tips.

**Note:**

This manual is intended for trained servicers who are familiar with IBM Personal Computer products. Use this manual along with advanced diagnostic tests to troubleshoot problems effectively.

Before servicing an IBM product, be sure to review the "Safety notices (multi-lingual translations)" on page 211 and "Safety information" on page 207.

---

## Important Safety Information

Be sure to read all caution and danger statements in this book before performing any of the instructions.

Prenez connaissance de toutes les consignes de type Attention et Danger avant de procéder aux opérations décrites par les instructions.

Lesen Sie alle Sicherheitshinweise, bevor Sie eine Anweisung ausführen.

---

### 주의 및 위험 경고문(한글)

**중요:**

이 책에 나오는 모든 주의 및 위험 경고문은 번호로 시작됩니다. 이 번호는 *Safety Information* 책에 나오는 영문판 주의 및 위험 경고문과 한글판 주의 및 위험 경고문을 상호 참조하는데 사용됩니다.

예를 들어 주의 경고문이 번호 1로 시작되면 *Safety Information* 책에서 이 주의 경고문은 경고문 1번 아래에 나옵니다.

지시를 따라 수행하기 전에 먼저 모든 주의 및 위험 경고문을 읽도록 하십시오.

Accertarsi di leggere tutti gli avvisi di attenzione e di pericolo prima di effettuare qualsiasi operazione.

Leia todas as instruções de cuidado e perigo antes de executar qualquer operação.

Lea atentamente todas las declaraciones de precaución y peligro ante de llevar a cabo cualquier operación.

---

## 注意和危险声明 (简体中文)

重要事项:

本书中的所有注意和危险声明之前都有编号。该编号用于英语的注意或危险声明与 *Safety Information* 一书中可以找到的翻译版本的注意或危险声明进行交叉引用。

例如，如果一个注意声明以编号 1 开始，那么对该注意声明的翻译出现在 *Safety Information* 一书中的声明 1 中。

在按说明执行任何操作前，请务必阅读所有注意和危险声明。

---

## 注意及危險聲明 (中文)

重要資訊：

本書中所有「注意」及「危險」的聲明均以數字開始。此一數字是用來作為交互參考之用，英文「注意」或「危險」聲明可在「安全資訊」(Safety Information) 一書中找到相同內容的「注意」或「危險」聲明的譯文。

例如，有一「危險」聲明以數字 1 開始，則該「危險」聲明的譯文將出現在「安全資訊」(Safety Information) 一書的「聲明」1 中。

執行任何指示之前，請詳讀所有「注意」及「危險」的聲明。

## Chapter 1. General Checkout

This general checkout procedure is for Types 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6346, 6347, and 6348 computers.

**Attention:**

The drives in the computer you are servicing might have been rearranged or the drive startup sequence changed. Be extremely careful during write operations such as copying, saving or formatting. Data or programs can be overwritten if you select an incorrect drive.

Diagnostic error messages appear when a test program finds a problem with a hardware option. For the test programs to properly determine if a test *Passed*, *Failed* or *Aborted*, the test programs check the error-return code at test completion. See "Diagnostics" on page 12.

General error messages appear if a problem or conflict is found by an application program, the operating system, or both. For an explanation of these messages, refer to the information supplied with that software package.

**Notes:**

- Types 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6346, 6347, and 6348 computers default to come up quiet (no beep and no memory count and checkpoint code display) when no errors are detected by POST.
- To enable beep and memory count and checkpoint code display when a successful POST occurs, do the following:
  1. Select **Start Options** in the Configuration/Setup Utility program (see "Setup Utility program" on page 10).
  2. Set **Power-On Self-Test** to **Enhanced**.
- Before replacing any FRUs, ensure that the latest level of BIOS is installed on the system. A down-level BIOS might cause false errors and unnecessary replacement of the system board. For more information on how to determine and obtain the latest level BIOS, see "BIOS levels" on page 199.
- If multiple error codes are displayed, diagnose the first error code displayed.
- If the computer hangs with a POST error, go to "Symptom-to-FRU Index" on page 69.
- If the computer hangs and no error is displayed, go to "Undetermined problems" on page 109.
- If an installed device is not recognized by the diagnostics program, that device might be defective.

**001**

1. Power-off the computer and all external devices.
2. Check all cables and power cords.
3. Make sure the system board is seated properly.
4. Set all display controls to the middle position.
5. Power-on all external devices.
6. Power-on the computer.
7. Check for the following response:
  - Readable instructions or the Main Menu.

## DID YOU RECEIVE THE CORRECT RESPONSE?

If NO, continue to **002** .

If YES, proceed to **003** .

### **002**

If the Power Management feature is enabled, do the following:

1. Start the Configuration/Setup Utility program (see “Setup Utility program” on page 10)
2. Select **Power Management** from the Configuration/Setup Utility program menu.
3. Select **APM**.
4. Be sure **APM BIOS Mode** is set to **Disabled**. If it is not, press Left Arrow (←) or Right Arrow (→) to change the setting.
5. Select **Automatic Hardware Power Management**.
6. Set **Automatic Hardware Power Management** to **Disabled**.
7. If the problem persists, continue to **003** .

### **003**

Run the Diagnostic programs. If necessary, refer to “Diagnostics” on page 12.

- If you receive an error, replace the part that the diagnostic program calls out or go to “Symptom-to-FRU Index” on page 69.
- If the test stops and you cannot continue, replace the last device tested.

---

## Chapter 2. General Information

---

### Features

This section provides an overview of the computer features, preinstalled software, and specifications.

#### Microprocessor

Intel® Pentium™ III with 256 KB of internal L2 cache memory and MMX™ technology or an Intel Celeron™ with 256 KB of internal L2 cache memory and MMX technology

#### Memory

- Support for two dual in-line memory modules (DIMMs)
- 512 KB flash memory for system programs

#### Internal drives

- 3.5-inch, 1.44 MB diskette drive (some models)
- Internal hard disk drive
- EIDE CD drive or DVD drive (some models)

#### Video controller

Dynamic video memory technology

#### Audio subsystem

16-bit integrated Sound Blaster Pro compatible audio subsystem

#### Connectivity

- 10/100 Mbps integrated Intel ethernet controller that supports the Wake on LAN® feature
- Modem (some models)

#### System management features

- Remote Program Load (RPL) and Dynamic Host Configuration Protocol (DHCP)
- Wake on LAN
- Wake on Ring (in the Configuration/Setup Utility program, this feature is called Serial Port Ring Detect for an external modem and Modem Ring Detect for an internal modem)
- Remote Administration
- Automatic power-on startup
- System Management (SM) BIOS and SM software
- Ability to store POST hardware test results

#### Input/output features

- 25-pin, Extended Capabilities Port (ECP)/Extended Parallel Port (EPP)
- Two 9-pin serial connectors
- Four 4-pin, USB connectors
- PS/2® mouse connector

- PS/2 keyboard connector
- Ethernet connector
- Monitor connector
- Three audio connectors (line in, line out, and microphone)
- Front connectors on some small desktops (S/PDIF, microphone, and headphone)
- Front IEEE 1394 connector (some small desktop models)

### **Expansion**

- Drive bays
  - Small desktop model: Three
  - Desktop model: Four
  - Microtower model: Four
- 32-bit PCI expansion slots
  - Small desktop model: Three (expansion cards must be low profile)
  - Desktop model: Three
  - Microtower model: Three

### **Power**

- 95 W, 120 W, or 155 W power supply with manual voltage selection switch
- Automatic 50/60 Hz input frequency switching
- Advanced Power Management support
- Advanced Configuration and Power Interface (ACPI) support

### **Security features**

- Power-on and administrator passwords
- Support for the addition of a Rope Clip and lockable cable (varies by mechanical chassis)
- Startup sequence control
- Startup without diskette drive, keyboard, or mouse
- Unattended start mode
- Diskette and hard disk I/O control
- Serial and parallel port I/O control
- Security profile by device

### **IBM preinstalled software**

Your computer might come with preinstalled software. If it does, an operating system, device drivers to support built-in features, and other support programs are included.

### **Operating systems (supported)**

- Microsoft® Windows® Millennium Edition (Me)
- Microsoft Windows 2000 Professional
- Microsoft Windows 98 Second Edition

### **Operating systems (tested for compatibility)<sup>1</sup>**

---

1. The operating systems listed here are being tested for compatibility at the time this publication goes to press. Additional operating systems might be identified by IBM as compatible with your computer following the publication of this booklet. Corrections and additions to this list are subject to change. To determine if an operating system has been tested for compatibility, check the Web site of the operating system vendor.

- Microsoft Windows 95
- Microsoft Windows NT<sup>®</sup> Workstation Version 4.0
- Microsoft Windows XP Personal and Professional

## Specifications

This section lists the physical specifications for your computer.

### Physical specification — small desktop model

<p><b>Dimensions</b></p> <p>Height: 88 mm (3.4 in.)  Width: 305 mm (12.0 in.)  Depth: 380 mm (14.9 in.)</p> <p><b>Weight</b></p> <p>Minimum configuration as shipped: 8.5 kg (18 lb)  Maximum configuration: 8.6 kg (19 lb)</p> <p><b>Environment</b></p> <p>Air temperature:</p> <p>System on: 10° to 35° C (50° to 95° F)  System off: 10° to 43° C (50° to 110° F)</p> <p>Maximum altitude: 2134 m (7000 ft)  <b>Note:</b> The maximum altitude, 2134 m (7000 ft), is the maximum altitude at which the specified air temperatures apply. At higher altitudes, the maximum air temperatures are lower than those specified.</p> <p>Humidity:</p> <p>System on: 8% to 80%  System off: 8% to 80%</p> <p><b>Electrical input</b></p> <p>Input voltage:</p> <p>Low range:</p> <p>Minimum: 90 V ac  Maximum: 137 V ac  Input frequency range: 57–63 Hz  Voltage switch setting: 115 V ac</p> <p>High range:</p> <p>Minimum: 180 V ac  Maximum: 265 V ac  Input frequency range: 47–53 Hz  Voltage switch setting: 230 V ac</p> <p>Input kilovolt-amperes (kVA) (approximate):</p> <p>Minimum configuration as shipped: 0.08 kVA  Maximum configuration: 0.30 kVA</p> <p><b>Note:</b> Power consumption and heat output vary depending on the number and type of optional features installed and the power-management optional features in use.</p>	<p><b>Heat output</b> (approximate) in British thermal units (Btu) per hour:</p> <p>Minimum configuration: 188 Btu/hr (55 watts)  Maximum configuration: 256 Btu/hr (75 watts)</p> <p><b>Airflow</b></p> <p>Approximately 0.25 cubic meters per minute (9 cubic feet per minute) maximum</p> <p><b>Acoustical noise-emission values</b></p> <p>Average sound-pressure levels:</p> <p>At operator position:</p> <p>Idle: 38 dBA  Operating: 43 dBA</p> <p>At bystander position - 1 meter (3.3 ft):</p> <p>Idle: 33 dBA  Operating: 37 dBA</p> <p>Declared (upper limit) sound-power levels:</p> <p>Idle: 3.75 bels  Operating: 4.99 bels</p> <p><b>Note:</b> These levels were measured in controlled acoustical environments according to the procedures specified by the American National Standards Institute (ANSI) S12.10 and ISO 7779 and are reported in accordance with ISO 9296. Actual sound-pressure levels in a given location might exceed the average values stated because of room reflections and other nearby noise sources. The declared sound-power levels indicate an upper limit, below which a large number of computers will operate.  <b>Note:</b> The computer is classified as a Class A or Class B digital device. See the <i>Quick Reference</i> for further information about this classification.</p>
---	---

## Physical specification — desktop model

<p><b>Dimensions</b></p> <p>Height: 140 mm (5.5 in.) Width: 425 mm (16.7 in.) Depth: 425 mm (16.7 in.)</p> <p><b>Weight</b></p> <p>Minimum configuration as shipped: 14.0 kg (30 lb) Maximum configuration: 17.3 kg (25.0 lb)</p> <p><b>Environment</b></p> <p>Air temperature:</p> <ul style="list-style-type: none"><li>System on: 10° to 35° C (50° to 95° F)</li><li>System off: 10° to 43° C (50° to 110° F)</li></ul> <p>Maximum altitude: 2134 m (7000 ft) <b>Note:</b> The maximum altitude, 2134 m (7000 ft), is the maximum altitude at which the specified air temperatures apply. Running diagnostics tests. . . . .	12	Asset EEPROM backup . . . . .	16
Test selection . . . . .	12	Viewing the test log . . . . .	16
Module test menu/hardware configuration report	13	When to use the Low-Level Format program . . . . .	17
Memory Diagnostic tests . . . . .	13	Preparing the hard disk drive for use. . . . .	17
Alert-On LAN™ test . . . . .	14		

The following tools are available to help identify and resolve hardware-related problems.

- Setup Utility program
- Power-On Self-Test (POST)
  - POST Beep Codes
  - Error Code Format
- Diagnostics program
- Recovery utility
  - Full recovery
  - Partial recovery
- Repair utility

---

## Setup Utility program

**Attention:**

A customized setup configuration (other than default settings) might exist on the computer you are servicing. Running the Setup Utility program might alter those settings. Note the current configuration settings and verify that the settings are in place when service is complete.

The Setup Utility (configuration) program is stored in the permanent memory of the computer. This program includes settings for the following:

- System Summary
- Product Data
- Devices and I/O Ports
- Start Options
- Date and Time
- System Security
- Advanced Setup
- Power Management

To run the Setup Utility program, use the following procedure.

1. Power-off the computer and wait for a few seconds until all in-use lights go off.
2. Power-on the computer.
3. When the Setup Utility prompt appears on the screen during start-up, press **F1**. The Setup Utility menu will appear.
4. Follow the instructions on the screen.
5. When finished, select **System Summary** to verify that any configuration changes have been accepted.

---

## Product Recovery Program menu

Type 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6346, 6347, 6348 machines have recovery and diagnostics programs on a separate hard drive partition. The Enhanced Diagnostics diskette is not shipped with the machine or the HMM. To download the Diagnostics program, see “Diagnostics program download” on page 12.

At startup, the machine displays the following prompt:  
**To start the Product Recovery Program, press F11**

**CAUTION:**

**Make sure all data is backed up to avoid loss when the Product Recovery program is used.**

After depressing F11, you are given the following options.

- **IBM Backup and Restore**

This utility will restore your most recent backup of your operating system, applications, and data.

**Note:** This item should only appear if the IBM Backup and Restore HMM has been installed

- **Full recovery**

This utility reformats the hard drive and restores all original files.

- **System utilities**

1. **Repair (Windows NT 4.0 and 2000 Only)**

This runs the Windows NT 4.0 emergency repair utility.

2. **Run Diagnostics**

Runs the IBM Enhanced Diagnostic Program.

3. **Create a Diagnostics Diskette**

Creates a bootable diagnostic diskette.

4. **System Information**

Displays information about your computer configuration and allows the user to gather system information that would be needed during a Help Center call.

5. **Create Recovery/Repair Diskette (Disk to Disk Solution Only)**

Creates a startable diskette to restore access to the IBM Product Recovery program on the hard disk.

---

## Diagnostics

The Diagnostics program uses a full range of diagnostic utilities to determine the operating condition of the computer's hardware components.

For a complete list of error codes and messages, see "Symptom-to-FRU Index" on page 69.

### Diagnostics program download

To download the Diagnostics program, do the following:

- Go to <http://www.ibm.com/>.
- Select **Support**.
- Select **Desktop computing** from the "Search by Category" pull-down menu.
- Select **NetVista** from the "Product Family" list.
- Search for the machine type in the "Quick Path" box on the left.
- Select **Diagnostics** from the "Downloadable files by Category" pull-down menu or go directly to the link **PC Enhanced Diagnostics diskette** from the "Downloadable files by date" list. This link will take you to the self-starting utility download and instructions.

### Navigating through the diagnostics programs

Use the cursor movement keys to navigate within the menus.

- The **Enter** key is used to select a menu item.
- The **Esc** key is used to back up to the previous menu.
- For online help select **F1**.

### Running diagnostics tests

There are four ways to run the diagnostic tests.

1. Using the cursor movement keys, highlight **Run Normal Test** or **Run Quick Test** from the Diagnostics menu and then press **Enter**.  
This will automatically run a pre-defined group of tests from each test category. **Run Normal Test** runs a more extensive set of tests than does **Run Quick Test** and takes longer to execute.
2. Press **F5** to automatically run all selected tests in all categories. See "Test Selection".
3. From within a test category, press **Ctrl-Enter** to automatically run only the selected tests in that category. See "Test Selection".
4. Using the cursor movement keys, highlight a single test within a test category, then press **Enter**. This will run only that test.

Press **Esc** at any time to stop the testing process.

Test results, (N/A, PASSED, FAILED, ABORTED), are displayed in the field beside the test description and in the test log. See "Viewing the test log" on page 16.

### Test selection

To select one or more tests, use the following procedure.

1. Open the corresponding test category.
2. Using the cursor movement keys, highlight the desired test.
3. Press the space bar.

A selected test is marked by >>. Pressing the space bar again de-selects a test and removes the chevron.

4. Repeat steps 2 and 3 above to select all desired tests.

## Module test menu/hardware configuration report

Depending on the diagnostics version level you are using, the installed devices in the computer are verified in one of two ways.

1. At the start of the diagnostic tests, the Module Test Menu is displayed. Normally, all installed devices in the computer are highlighted on the menu.
2. At the start of the diagnostic tests, the main menu appears. From this menu, select **System Info**, then select **Hardware Configuration** from the next menu. Normally, all installed devices in the computer are highlighted on this report.

If an installed device is not recognized by the diagnostics program, then review the following:

- The diagnostic code for the device is not in the Diagnostics program. Run the diagnostics provided with that device.
- The missing device is defective or it requires an additional diskette or service manual.
- An unrecognizable device is installed.
- A defective device is causing another device not to be recognized.
- The SCSI controller failed (on the system board or SCSI adapter).
- Use the procedure in "Undetermined problems" on page 109 to find the problem.

If a device is missing from the list, replace it. If this does not correct the problem, use the procedure in "Undetermined problems" on page 109.

## Memory Diagnostic tests

The Memory Diagnostics provide the capability to identify a particular RIMM memory module which fails during testing. Use the System Board Layout section to reference the memory sockets, or select **F1** *twice* to load the Diagnostics online manual and select "SIMM/DIMM/RIMM Locator".

Follow the steps below to locate the Memory Diagnostic tests options.

1. Select the DIAGNOSTICS option on the toolbar and press **Enter**.
2. Highlight either the *Memory Test-Full* or *Memory Test-Quick* option and press **Enter**.
- 3.

- **Memory Test-Full**

The full memory test will take about 80 seconds per MB of memory and will detect marginal, intermittent, and solid (stuck) memory failures.

- **Memory Test-Quick**

The quick memory test will take about 20 seconds per MB of memory and will detect solid (stuck) memory failures only.

**Notes:**

- Either level of memory testing can be performed on all memory or a single RIMM socket.
- RIMM memory requires that all memory slots be filled, either with a RIMM or a continuity module (C-RIMM).

## Alert-On LAN™ test

The Alert On LAN test does the following:

- Determines if Alert On LAN is supported on the system.
- Checks the revision ID register.
- Verifies the EEPROM checksum.
- Validates that a software alert can be sent.

## Asset ID™ test

The Asset ID test does the following:

- Determines if Asset ID is supported on the system.
- Verifies the EEPROM areas.
- Performs an antenna detection test.

## Test results

Diagnostics test results will produce the following error code format:

Function Code	Failure Type	DeviceID	Date	ChkDigits	Text
---------------	--------------	----------	------	-----------	------

- **Function Code:**  
Represents the feature or function within the PC.
- **Failure Type:**  
Represents the type of error encountered.
- **DeviceID:**  
Contains the component's unit-ID which corresponds to either a fixed disk drive, removable media drive, serial or parallel port, processor, specific RIMM, or a device on the PCI bus.
- **Date:**  
Contains the date on which the diagnostic test was run. The date is retrieved from CMOS and displayed using the YYYYMMDD format.
- **ChkDigits:**  
Contains a 2-digit check-digit value to ensure the following:
  - Diagnostics were run on the specified date.
  - Diagnostics were run on the specified IBM computer.
  - The diagnostic error code is recorded correctly.
- **Text:**  
Description of the error.

**Note:** See "Diagnostic error codes" on page 72 for error code listings.

## **Hard file Smart test**

Use the Hard File Smart Test when the system management tool has detected a hard file SMART alert.

The Smart test does the following:

- Interrogates IDE devices for support of the SMART instruction set.
- Issues a ENABLE SMART command to make sure SMART functionality is active.
- Checks the SMART RETURN STATUS command to determine if any thresholds have been exceeded.

If thresholds have been exceeded, an error message is shown, and the test fails. If no SMART is supported by the drive, the test returns with "N/A".

## **Quick and Full erase - hard drive**

The Diagnostics program offers two hard drive format utilities:

- Quick Erase Hard Drive
- Full Erase Hard Drive

The Quick Erase Hard Drive provides a DOS utility that performs the following steps.

- Destroys the Master Boot Record (MBR) on the hard drive.
- Destroys all copies of the FAT Table on all partitions (both the master and backup).
- Destroys the partition table.
- Provides messages that warn the user that this is a non-recoverable process.

The Full Erase Hard Drive provides a DOS utility that performs the following steps.

- Performs all the steps in Quick Erase.
- Provides a DOS utility that writes random data to all sectors of the hard drive.
- Provide an estimate of time to completion along with a visual representation of completion status.
- Provides messages that warn the user about non-recoverable process.

<b>Important:</b> Make sure that all data is backed up before using the Quick or Full Erase functions.
--

To select the Quick Erase or Full Erase Hard Drive utility, use the following procedure.

1. Select the **UTILITY** option on the toolbar and press **Enter**.
2. Select either the **QUICK ERASE** or **FULL ERASE HARD DISK** option and follow the instructions.

## Iomega Zip drive test

Use the Iomega Zip Drive Test to test the Zip drive and the drive interface. The test takes about 20 seconds to run.

The default tests the following:

- Controller
- Max Seek (50 times)
- Random Seek (300 sectors)

## Asset EEPROM backup

When replacing a system board, this utility allows the backup of all Asset information from the EEPROM to diskette. This utility also restores data to the EEPROM from diskette after replacement of the system board.

To run this utility, use the following procedure.

- Select **Utility**
- Select **Asset EEPROM Backup**
- Follow instructions on screen.

## Viewing the test log

Errors reported by the diagnostic test will be displayed by the program as a failed test.

To view details of a failure or to view a list of test results, use the following procedure from any test category screen.

- Press **F3** to activate the log file.
- Press **F3** again to save the file to diskette or **F2** to print the file.

---

## When to use the Low-Level Format program

**Notes:**

1. The low-level format is not available on all diagnostic diskettes.
2. Before formatting the hard disk drive, make a backup copy of the files on the drive to be formatted.

Use the Low-Level Format program in the following situations:

- When you are installing software that requires a low-level format.
- When you get recurring messages from the test programs directing you to run the Low-Level Format program on the hard disk.
- As a last resort before replacing a hard disk drive.

---

## Preparing the hard disk drive for use

When the Low-Level Format program is finished, restore to the hard disk all the files that you previously backed up.

1. Partition the remainder of the hard disk for the operating system. (The commands vary with the operating system. Refer to the operating system manual for instructions.)
2. Format the hard disk using the operating system. (The commands vary with the operating system. Refer to the operating system manual for instructions.)
3. Install the operating system.

You are now ready to restore the files.

### Locating the connectors on the front of your computer

The following illustrations show the location of the connectors on the front of the small desktop computers.

- |  |                               |
|--|-------------------------------|
| <b>1</b> IEEE 1394 connector (some models) | <b>4</b> S/PDIF connector     |
| <b>2</b> Front USB connector               | <b>5</b> Microphone connector |
| <b>3</b> Front USB connector               | <b>6</b> Headphone connector  |

- 1** Front USB connector
- 2** Front USB connector

The following illustration shows the location of the connectors on the front of the desktop computer.

- 1** Front USB connector
- 2** Front USB connector

The following illustration shows the location of the connectors on the front of the microtower computer.

**1** Front USB connector

**2** Front USB connector

## Locating the connectors on the rear of your computer

The following illustration shows the location of the connectors on the rear of the small desktop model computer.

**Note:** The connectors on the rear of the computer have color-coded icons to help you to determine where to connect the cables on your computer.

The following illustration shows the location of the connectors on the rear of the desktop model computer.

- |                               |                                   |
|-------------------------------|-----------------------------------|
| <b>1</b> Power connector      | <b>8</b> Audio line in connector  |
| <b>2</b> Mouse connector      | <b>9</b> Audio line out connector |
| <b>3</b> Parallel connector   | <b>10</b> USB connectors          |
| <b>4</b> Ethernet connector   | <b>11</b> Monitor connector       |
| <b>5</b> Serial connector     | <b>12</b> Serial connector        |
| <b>6</b> PCI slots            | <b>13</b> Keyboard connector      |
| <b>7</b> Microphone connector |                                   |

**Note:** The connectors on the rear of the computer have color-coded icons to help you to determine where to connect the cables on your computer.

The following illustration shows the location of the connectors on the back of the microtower model computer.

- |                             |                                   |
|-----------------------------|-----------------------------------|
| <b>1</b> Mouse connector    | <b>8</b> Audio line out connector |
| <b>2</b> Keyboard connector | <b>9</b> Audio line in connector  |
| <b>3</b> Serial connector   | <b>10</b> Microphone connector    |
| <b>4</b> Parallel connector | <b>11</b> Serial connector        |
| <b>5</b> Monitor connector  | <b>12</b> PCI slots               |
| <b>6</b> USB connectors     | <b>13</b> Power connector         |
| <b>7</b> Ethernet connector |                                   |

**Note:** The connectors on the rear of the computer have color-coded icons to help you to determine where to connect the cables on your computer.

Connector	Description
Mouse connector	Used to attach a mouse, trackball, or other pointing device that uses a PS/2 mouse connector.
Keyboard connector	Used to attach a keyboard that uses a PS/2 keyboard connector.
Serial connectors	Used to attach an external modem, serial printer, or other device that uses a 9-pin serial connector.
Parallel connector	Used to attach a parallel printer, parallel scanner, or any other device that requires a 25-pin parallel connection.
USB connectors	Used to attach a device that requires a Universal Serial Bus (USB) connection, such as a USB scanner or USB printer. If you have more than four USB devices, you can purchase a USB hub, which you can use to connect additional USB devices.
Ethernet connector	Used to attach an Ethernet cable that uses an Ethernet connector. <b>Note:</b> To operate the computer within FCC Class A or Class B limits, use a category 5 Ethernet cable.
Audio line out connector	Used to send audio signals from the computer to external devices, such as powered stereo speakers (speakers with built-in amplifiers), headphones (greater than 18 ohms), multimedia keyboards, or the audio line in connector on a stereo system or other external recording device.
Audio line in connector	Used to receive audio signals from an external audio device, such as a stereo system. When you attach an external audio device, a cable is connected between the audio line out connector of the device and the audio line in connector of the computer.
Microphone connector	Used to attach a microphone to your computer when you want to record voice or other sounds on the hard disk using speech-recognition software.

## Home PNA network adapter

Some models might have a Home Phoneline Network Alliance network adapter with an integrated V.90 modem. In addition to its modem function, this adapter enables you to use the telephone wiring in your home for peer-to-peer networking. To use the Home PNA Network adapter, you must install the Intel AnyPoint™ software from the *Software Selections CD*. Each computer on the home PNA network must have a PNA network adapter and the associated software installed. For information about using the PNA network adapter or the AnyPoint software, refer to the AnyPoint documentation (provided with models that come with PNA network adapters only).

Connect each computer on a home PNA network directly to a telephone-line wall connector. If you have more computers than telephone-line wall connectors in a room, use a telephone splitter at the wall connector.

Actual network transfer speeds depend on many factors, such as home wiring configuration, and are often less than the maximum possible.

Some Internet service provider (ISP) accounts do not allow Internet sharing or they charge extra for it. Your ISP access agreement might require you to have more than one account. Check your ISP access agreement for more information.

---

## Removing the cover - small desktop model

To remove the cover:

1. Shut down your operating system, remove any media (diskettes, CDs, or tapes) from the drives, and turn off all attached devices and the computer.
2. Unplug all power cords from electrical outlets.
3. Disconnect all cables attached to the computer. This includes power cords, input/output (I/O) cables, and any other cables that are connected to the computer.
4. Remove the screw that secures the top cover at the rear of the system unit.
5. Hold both sides of the system unit top cover and push it forward. Lift the top cover up to remove it completely.

---

## Locating components - small desktop model

The following illustration will help you locate the various components in your computer.

- |                                       |                                |
|---------------------------------------|--------------------------------|
| <b>1</b> Power supply                 | <b>5</b> DIMM                  |
| <b>2</b> PCI slot                     | <b>6</b> Hard disk drive       |
| <b>3</b> System board                 | <b>7</b> CD drive or DVD drive |
| <b>4</b> Microprocessor and heat sink | <b>8</b> Diskette drive        |

---

## Identifying parts on the system board - small desktop model

The system board, also called the *planar* or *motherboard*, is the main circuit board in your computer. It provides basic computer functions and supports a variety of devices that are IBM-installed or that you can install later.

See the following illustration for the location of parts on the system board.

- |                                   |  |
|-----------------------------------|--|
| <b>1</b> Fan connector            | <b>11</b> Primary IDE connector                          |
| <b>2</b> Microprocessor           | <b>12</b> Front USB connector                            |
| <b>3</b> DIMM 1                   | <b>13</b> Virtual clear CMOS/BIOS recovery jumper (JP14) |
| <b>4</b> DIMM 2                   | <b>14</b> Battery  |
| <b>5</b> Power connector          | <b>15</b> PCI slot                                       |
| <b>6</b> Power connector          | <b>16</b> PCI slot                                       |
| <b>7</b> Hard disk LED connector  | <b>17</b> PCI slot                                       |
| <b>8</b> Power LED connector      | <b>18</b> CD-ROM audio connector                         |
| <b>9</b> Diskette connector       | <b>19</b> Front panel connector                          |
| <b>10</b> Secondary IDE connector |  |

---

## Installing memory - small desktop model

Your computer has two connectors for installing dual in-line memory modules (DIMMs) that provide up to a maximum of 512 MB of system memory.

### Installing DIMMs

When installing DIMMs, the following rules apply:

- Fill each system memory connector sequentially, starting at DIMM 1
- Use 3.3 V, synchronous, 168-pin, unbuffered, 133 MHz, nonparity, synchronous dynamic random access memory (SDRAM)
- Use 32 MB, 64 MB, 128 MB, or 256 MB DIMMs in any combination
- DIMM heights of 38.1 mm (1.5 inches)

To install a DIMM:

1. Remove the cover. See “Removing the cover - small desktop model” on page 26.
2. To locate the DIMM connectors. See “Identifying parts on the system board - small desktop model” on page 27.
3. Open the retaining clips.

4. Make sure the notches in the DIMM align with the tabs on the connector. Push or insert the DIMM straight down into the connector until the retaining clips close.

**What to do next:**

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - small desktop model” on page 33.

---

## Installing adapters - small desktop model

This section provides information and instructions for installing and removing adapters. Your computer has three expansion slots for low profile peripheral component interconnect (PCI) adapters.

To install an adapter:

1. Remove the cover. See “Removing the cover - small desktop model” on page 26.

2. Remove the slot screw and slot cover for the appropriate expansion slot.

3. Install the adapter and insert the retaining screw.

**What to do next:**

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - small desktop model” on page 33.

---

## Installing internal drives - small desktop model

This section provides information and instructions for installing and removing internal drives.

Internal drives are devices that your computer uses to read and store data. You can add or replace drives in your computer to increase storage capacity and to enable your computer to read other types of media such as CD-ROM.

Internal drives are installed in *bays*. Within this book, the bays are referred to as bay 1, bay 2, and so on.

When you install an internal drive, it is important to note what type and size of drive that you can install in each bay. Also, it is important to correctly connect the internal drive cables to the installed drive.

### Drive specifications

Your computer might come with the following IBM-installed drives:

- A 3.5-inch diskette drive in bay 1
- A CD drive or DVD drive in bay 2
- A 3.5-inch hard disk drive in bay 3

Bays that do not have drives installed have a static shield and bay panel installed.

The following illustration shows the locations of the drive bays

The following table describes some of the drives that you can install in each bay and their height requirements.

<b>1</b> Bay 1 - Max Height: 25.4 mm (1.0 in.)	3.5-inch diskette drive (preinstalled in some models)
<b>2</b> Bay 2 - Max Height: 41.3 mm (1.6 in.)	CD-ROM drive (standard in some models)
<b>3</b> Bay 3 - Max Height: 12.7 mm (0.5 in.)	3.5-inch hard disk drive (preinstalled)

**Notes:**

1. Drives that are greater than 41.3 mm (1.6 in.) high cannot be installed.
2. Install removable media (tape or CD) drives in the accessible bay: bay 1 or 2.

## Installing a drive

To install a CD drive or DVD drive in bay 2, follow these steps.

1. Remove the cover (see “Removing the cover - small desktop model” on page 26).
2. If you are installing a drive with removable media, insert a flat-blade screwdriver into one of the slots on the static shield in the drive bay into which you installed the drive and gently pry the static shield loose from the drive bay.
3. Make sure the drive is set correctly as the master device. Refer to the documentation that comes with your CD drive or DVD drive for master/slave jumper information.
4. Lift the latch and remove the drive mounting tray.
5. Install the drive into the bay. Align the screw holes and insert the four screws.

- Slide the drive cage halfway into the mounting tray.

- Each integrated drive electronics (IDE) drive requires two cables; a four-wire power cable that connects to the power supply, and a signal cable that connects to the system board. You might also have an audio cable to connect. To connect a CD drive or DVD drive to your computer, follow these steps.
  - Locate the signal cable that came with your computer or with the new drive.
  - Locate the secondary IDE connector and the CD-ROM audio connector on the system board. See “Identifying parts on the system board - small desktop model” on page 27.
  - Connect one end of the signal cable to the secondary IDE connector on the system board and the other to the CD drive or DVD drive.
  - Your computer has extra power connectors for connecting additional drives. Connect the power cable to the drive.

- If you have a CD-ROM drive audio cable, connect it to the drive and the system board.
- Slide the drive cage in and engage the latch.
- If the drive you installed is a removable-media drive, remove the bay panel from the front bezel.

**What to do next:**

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - small desktop model” on page 33.

---

## Installing a Rope Clip - small desktop model

To help prevent hardware theft, you can add a 3/16 inch or 5 mm Rope Clip and cable to your computer. After you add the security cable, make sure that it does not interfere with other cables that are connected to the computer.

To install a Rope Clip:

1. Remove the cover (see “Removing the cover - small desktop model” on page 26).
2. Use a tool, such as a screwdriver, to remove the two metal knockouts.
3. Insert the Rope Clip through the rear panel; then attach and tighten the nuts with an appropriately sized or adjustable wrench.
4. Replace the computer cover. For more information, see “Replacing the cover and connecting the cables - small desktop model” on page 33.
5. Thread the cable through the Rope Clip and around an object that is not a part of or permanently secured to the building structure or foundation, and from which it cannot be removed; then fasten the cable ends together with a lock.

- 1** Rope Clip
- 2** Bolt holes
- 3** Nuts

**What to do next:**

To work with another option, go to the appropriate section.

---

## Replacing the cover and connecting the cables - small desktop model

After working with options, you need to install any removed parts, replace the cover, and reconnect cables, including power cords and telephone lines. Also, depending on the option that is installed, you might need to confirm the updated information in the Configuration/Setup Utility program.

To replace the cover and connect cables to your computer:

1. Ensure that all components have been reassembled correctly and that no tools or loose screws are left inside your computer.

2. Clear any cables that might impede the replacement of the cover.
3. Place the cover over the computer and slide it to the rear until it is fully closed. Secure the cover with the screw.

4. Reconnect the external cables and cords to the computer.
5. To update the configuration, see “Module test menu/hardware configuration report” on page 13.

---

## Removing the cover - desktop model

To remove the cover:

1. Shut down your operating system, remove any media (diskettes, CDs, or tapes) from the drives, and turn off all attached devices and the computer.
2. Unplug all power cords from electrical outlets.
3. Disconnect all cables attached to the computer. This includes power cords, input/output (I/O) cables, and any other cables that are connected to the computer.
4. Press the buttons on the sides of the computer and pivot the rear end of the cover up toward the front of the computer.

---

## Locating components - desktop model

The following illustration will help you locate the various components in your computer.

- |                                |                                       |
|--------------------------------|---------------------------------------|
| <b>1</b> CD drive or DVD drive | <b>6</b> DIMMs                        |
| <b>2</b> USB connector         | <b>7</b> System Board                 |
| <b>3</b> USB connector         | <b>8</b> Microprocessor and heat sink |
| <b>4</b> Hard disk drive       | <b>9</b> PCI slots                    |
| <b>5</b> Diskette drive        |                                       |

---

## Identifying parts on the system board - desktop model

The system board, also called the *planar* or *motherboard*, is the main circuit board in your computer. It provides basic computer functions and supports a variety of devices that are IBM-installed or that you can install later.

See the following illustration for the location of parts on the system board.

- |                                   |   |
|-----------------------------------|---|
| <b>1</b> Fan connector            | <b>11</b> Primary IDE connector                   |
| <b>2</b> Microprocessor           | <b>12</b> Front USB connector                     |
| <b>3</b> DIMM 1                   | <b>13</b> Virtual clear CMOS/BIOS recovery jumper |
| <b>4</b> DIMM 2                   | <b>14</b> Battery                                 |
| <b>5</b> Power connector          | <b>15</b> PCI slot                                |
| <b>6</b> Power connector          | <b>16</b> PCI slot                                |
| <b>7</b> Hard disk LED connector  | <b>17</b> PCI slot                                |
| <b>8</b> Power LED connector      | <b>18</b> CD-ROM audio connector                  |
| <b>9</b> Diskette connector       | <b>19</b> Front panel connector                   |
| <b>10</b> Secondary IDE connector |   |

---

## Installing memory - desktop model

Your computer has two connectors for installing dual in-line memory modules (DIMMs) that provide up to a maximum of 512 MB of system memory.

### Installing DIMMs

When installing DIMMs, the following rules apply:

- Fill each system memory connector sequentially, starting at DIMM 1
- Use 3.3 V, synchronous, 168-pin, unbuffered, 133 MHz nonparity synchronous dynamic random access memory (SDRAM)
- Use 32 MB, 64 MB, 128 MB, or 256 MB DIMMs in any combination
- DIMM heights of 38.1 mm (1.5 inches)

To install a DIMM:

1. Remove the cover. See “Removing the cover - desktop model” on page 34.

2. To locate the DIMM connectors. See “Identifying parts on the system board - desktop model” on page 35.
3. Open the retaining clips.

4. Make sure the notches in the DIMM align with the tabs on the connector. Push or insert the DIMM straight down into the connector until the retaining clips close.

**What to do next:**

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - desktop model” on page 43.

---

## Installing adapters - desktop model

This section provides information and instructions for installing and removing adapters. Your computer has three expansion slots for peripheral component interconnect (PCI) adapters. You can install an adapter up to 330 mm (13 inches) long.

To install an adapter:

1. Remove the cover. See “Removing the cover - desktop model” on page 34.

2. Remove the adapter slot cover latch and the slot cover for the appropriate expansion slot.

3. Remove the adapter from its static-protective package.
4. Install the adapter into the appropriate slot on the system board.
5. Install the adapter slot cover latch.

**What to do next:**

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - desktop model” on page 43.

---

## Installing internal drives - desktop model

This section provides information and instructions for installing and removing internal drives.

Internal drives are devices that your computer uses to read and store data. You can add drives to your computer to increase storage capacity and to enable your computer to read other types of media. Some of the different drives that are available for your computer are:

- Hard disk drives
- Tape drives
- CD drives or DVD drives
- Removable media drives

Internal drives are installed in *bays*. Within this book, the bays are referred to as bay 1, bay 2, and so on.

When you install an internal drive, it is important to note what type and size of drive that you can install in each bay. Also, it is important to correctly connect the internal drive cables to the installed drive.

## Drive specifications

Your computer comes with the following IBM-installed drives:

- A CD-ROM drive in bay 1 (some models)
- A 3.5-inch hard disk drive in bay 3
- A 3.5-inch diskette drive in bay 4

Models that do not have drives installed in bays 1 and 2 have a static shield and bay panel installed.

The following illustration shows the locations of the drive bays.

The following table describes some of the drives that you can install in each bay and their height requirements.

<b>1</b> Bay 1 - Max Height: 41.3 mm (1.6 in.)	CD-ROM drive (standard in some models) 5.25-inch hard disk drive
<b>2</b> Bay 2 - Max Height: 41.3 mm (1.6 in.)	5.25-inch hard disk drive 3.5-inch hard disk drive (requires a mounting bracket)
<b>3</b> Bay 3 - Max Height: 25.4 mm (1.0 in.)	3.5-inch hard disk drive (preinstalled)

**Notes:**

1. Drives that are greater than 41.3 mm (1.6 in.) high cannot be installed.
2. Install removable media (tape or CD) drives in the accessible bay: bay 1 or 2.

## Installing a drive

To install an internal drive, follow these steps.

1. Remove the cover. See “Removing the cover - desktop model” on page 34.
2. If your computer has a CD drive or DVD drive, you might need to remove the signal and power cables from the drive.
3. If the drive you installed is a removable-media drive, remove the bay panel from the front bezel.
4. Remove the metal shield from the drive bay by inserting a flat-blade screwdriver into one of the slots and gently pry it loose.

5. Pivot the drive bay latch handle toward the front of the computer and pivot the drive bay cage toward the front of the computer until the drive cage latch catches to the chassis.

6. Make sure the drive that you are installing is set correctly as either a master or a slave device.
  - If it is the first CD drive or DVD drive, set as a master device.
  - If it is an additional CD drive or DVD drive, set as a slave device.
  - If it is a hard disk drive, set as a slave device.

Refer to the documentation that comes with your drive for master/slave jumper information.

7. Install the drive into the bay. Align the screw holes and insert the two screws.

8. Pivot the drive bay cage back into place.
9. Each integrated drive electronics (IDE) drive requires two cables; a four-wire power cable that connects to the power supply and a signal cable that connects to the system board. You might also have an audio cable to connect.

The steps to connect an IDE drive are different depending on the type of drive you are connecting. Locate the procedure below for your drive connection.

### **To connect the first IDE CD drive or DVD drive**

1. Locate the three-connector signal cable that came with your computer or with the new drive.

2. Locate the secondary IDE connector and CD-ROM audio connector on the system board. See “Identifying parts on the system board - desktop model” on page 35.
3. Connect one end of the signal cable to the drive and the other to the secondary IDE connector on the system board. To reduce electronic noise, use the connectors at the end of the cable only.
4. Your computer has extra power connectors for additional drives. Connect a power connector to the drive.
5. If you have a CD-ROM drive audio cable, connect it to the drive and the system board.

### **To connect an additional IDE CD drive or DVD drive**

1. Locate the secondary IDE connector on the system board and the three-connector signal cable. See “Identifying parts on the system board - desktop model” on page 35.
2. Connect the extra connector in the signal cable to the new CD drive or DVD drive.
3. Your computer has extra power connectors for additional drives. Connect a power connector to the drive.

### **To connect an additional IDE hard disk drive**

1. You will have to obtain a three-connector, ATA-100 compatible signal cable to connect your new hard disk.
2. Remove the two-connector cable from the hard disk drive.
3. Locate the primary IDE connector on the system board. One end of the three-connector cable connects to the hard disk drive and the other connects to the system board. See “Identifying parts on the system board - desktop model” on page 35.
4. Connect the extra connector in the signal cable to the new hard disk drive.
5. Your computer has extra power connectors for additional drives. Connect a power connector to the drive.

#### **What to do next**

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - desktop model” on page 43.

---

## **Installing a Rope Clip - desktop model**

To help prevent hardware theft, you can add a 3/16 inch or 5 mm Rope Clip and cable to your computer. After you add the security cable, make sure that it does not interfere with other cables that are connected to the computer.

To install a Rope Clip:

1. Remove the cover. See “Removing the cover - desktop model” on page 34.
2. Use a tool, such as a screwdriver, to remove the two metal knockouts.
3. Insert the Rope Clip through the rear panel; then attach and tighten the nuts with an appropriately sized or adjustable wrench.
4. Replace the computer cover. For more information, see “Replacing the cover and connecting the cables - desktop model” on page 43.

5. Thread the cable through the Rope Clip and around an object that is not a part of or permanently secured to the building structure or foundation, and from which it cannot be removed; then fasten the cable ends together with a lock.

**What to do next:**

To work with another option, go to the appropriate section.

---

## Replacing the cover and connecting the cables - desktop model

After working with options, you need to install any removed parts, replace the cover, and reconnect any cables, including power cords and telephone lines. Also, depending on the option that is installed, you might need to confirm the updated information in the Configuration/Setup Utility program.

To replace the cover and connect cables to your computer:

1. Ensure that all components have been reassembled correctly and that no tools or loose screws are left inside your computer.
2. Clear any cables that might impede the replacement of the cover.

3. Position the cover over the chassis and pivot the cover down over the computer until the cover snaps into place.

4. Reconnect the external cables and cords to the computer.
5. To update the configuration, see “Module test menu/hardware configuration report” on page 13.

---

## Removing the cover - microtower model

To remove the cover:

1. Shut down your operating system, remove any media (diskettes, CDs, or tapes) from the drives, and turn off all attached devices and the computer.
2. Unplug all power cords from electrical outlets.
3. Disconnect all cables attached to the computer. This includes power cords, input/output (I/O) cables, and any other cables that are connected to the computer.

4. Remove the thumbscrews from the rear of the computer and slide the cover toward the rear of the computer.

---

## Locating components - microtower model

The following illustration will help you locate the various components in your computer.

**1** Microprocessor and heat sink  
**2** DIMM

**3** PCI adapter  
**4** Power supply

---

## Moving the power supply - microtower model

To perform some operations inside the computer, you might need to move the power supply to access parts of the system board that are difficult to see or hard to reach. Use the following procedure to provide easier access to the system board.

### DANGER

**Do not detach the power supply bracket from the power supply or remove any of the power supply screws.**

1. Remove the thumbscrew securing the power supply to the rear of the chassis.

2. Push the metal tab and slide the power supply unit upward.

3. Rotate the power supply outward as shown.

4. Remove the power supply and carefully lay it to the side.

5. To replace the power supply, reverse these steps.

---

## Identifying parts on the system board - microtower model

The system board, also called the *planar* or *motherboard*, is the main circuit board in your computer. It provides basic computer functions and supports a variety of devices that are IBM-installed or that you can install later.

See the following illustration for the location of parts on the system board.

- |                                   |   |
|-----------------------------------|---|
| <b>1</b> Fan connector            | <b>11</b> Primary IDE connector                   |
| <b>2</b> Microprocessor           | <b>12</b> Front USB connector                     |
| <b>3</b> DIMM 1                   | <b>13</b> Virtual clear CMOS/BIOS recovery jumper |
| <b>4</b> DIMM 2                   | <b>14</b> Battery                                 |
| <b>5</b> Power connector          | <b>15</b> PCI slot                                |
| <b>6</b> Power connector          | <b>16</b> PCI slot                                |
| <b>7</b> Hard disk LED connector  | <b>17</b> PCI slot                                |
| <b>8</b> Power LED connector      | <b>18</b> CD-ROM audio connector                  |
| <b>9</b> Diskette connector       | <b>19</b> Front panel connector                   |
| <b>10</b> Secondary IDE connector |   |

## Installing memory - microtower model

Your computer has two connectors for installing dual in-line memory modules (DIMMs) that provide up to a maximum of 512 MB of system memory.

### Installing DIMMs

When installing DIMMs, the following rules apply:

- Fill each system memory connector sequentially, starting at DIMM 1
- Use 3.3 V, synchronous, 168-pin, unbuffered, 133 MHz nonparity synchronous dynamic random access memory (SDRAM)
- Use 32 MB, 64 MB, 128 MB, or 256 MB DIMMs in any combination
- DIMM heights of 38.1 mm (1.5 inches)

To install a DIMM:

1. Remove the cover. See “Removing the cover - microtower model” on page 44.

2. You might have to remove an adapter to gain access to the DIMM slots. See “Installing adapters - microtower model”.
3. To locate the DIMM connectors. See “Identifying parts on the system board - microtower model” on page 48.
4. Open the retaining clips.

5. Make sure the notches in the DIMM align with the tabs on the connector. Push or insert the DIMM straight down into the connector until the retaining clips close.

**What to do next:**

- Replace any adapters that were removed.
- Replace the power supply.
- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - microtower model” on page 56.

---

## Installing adapters - microtower model

This section provides information and instructions for installing and removing adapters. Your computer has three expansion slots for peripheral component interconnect (PCI) adapters. You can install an adapter up to 330 mm (13 inches) long.

To install an adapter:

1. Remove the cover. See “Removing the cover - microtower model” on page 44.

2. Remove the adapter slot cover for the appropriate expansion slot.

3. Remove the adapter from its static-protective package.
4. Install the adapter into the appropriate slot on the system board.
5. Install the screws that secure the adapter.

#### What to do next

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - microtower model” on page 56.

---

## Installing internal drives - microtower model

This section provides information and instructions for installing and removing internal drives.

Internal drives are devices that your computer uses to read and store data. You can add drives to your computer to increase storage capacity and to enable your computer to read other types of media. Some of the different drives that are available for your computer are:

- Hard disk drives
- Tape drives
- CD drives or DVD drives
- Removable media drives

Internal drives are installed in *bays*. Within this book, the bays are referred to as bay 1, bay 2, and so on.

When you install an internal drive, it is important to note what type and size of drive that you can install in each bay. Also, it is important to correctly connect the internal drive cables to the installed drive.

## Drive specifications

Your computer comes with the following IBM-installed drives:

- A CD drive or DVD drive in bay 1 (some models)
- A 3.5-inch diskette disk drive in bay 3
- A 3.5-inch hard drive in bay 4

Models that do not have drives installed in bays 1 and 2 have a static shield and bay panel installed.

The following illustration shows the locations of the drive bays.

The following table describes some of the drives you can install in each bay and their height requirements.

<b>1</b> Bay 1 - Maximum Height: 41.3 mm (1.6 in.)	CD-ROM drive (standard in some models) 5.25-inch hard disk drive
<b>2</b> Bay 2 - Maximum Height: 41.3 mm (1.6 in.)	5.25-inch hard disk drive 3.5-inch hard disk drive (requires a mounting bracket) CD-ROM drive DVD-ROM drive
<b>3</b> Bay 3 - Maximum Height: 25.4 mm (1.0 in.)	3.5-inch diskette drive (preinstalled)
<b>4</b> Bay 4 - Maximum Height: 25.4 mm (1.0 in.)	Hard disk drive (preinstalled)

### Notes:

1. Drives that are greater than 41.3 mm (1.6 in.) high cannot be installed.
2. Install removable media (tape or CD) drives in the accessible bays: bay 1 or 2.

## Installing a drive

To install an internal drive, follow these steps.

1. Remove the cover. See “Removing the cover - microtower model” on page 44.

**Note:** If your computer has a CD drive or DVD drive, you might need to remove the signal and power cables from the drive.

2. Remove the bay panel from the drive bay by inserting a flat-blade screwdriver at the end and gently prying it loose.
3. Remove the metal shield from the drive bay by inserting a flat-blade screwdriver into one of the slots and gently prying it loose.

4. Make sure the drive that you are installing is set correctly as either a master or a slave device.
  - If it is the first CD drive or DVD drive, set as a master device.
  - If it is an additional CD drive or DVD drive, set as a slave device.
  - If it is a hard disk drive, set as a slave device.

Refer to the documentation that comes with your drive for master/slave jumper information.

5. Install the drive into the bay. Align the screw holes, and insert the two screws.

6. Each integrated drive electronics (IDE) drive requires two cables; a four-wire power cable that connects to the power supply and a signal cable that connects to the system board. You might also have an audio cable to connect.

The steps to connect an IDE drive are different depending on the type of drive you are connecting. Locate the procedure below for your drive connection.

### **To connect the first IDE CD drive or DVD drive**

1. Locate the three-connector signal cable that came with your computer or with the new drive.
2. Locate the secondary IDE connector on the system board. See “Identifying parts on the system board - microtower model” on page 48.
3. Connect one end of the signal cable to the drive and the other to the secondary IDE connector on the system board. To reduce electronic noise, use the connectors at the end of the cable only.
4. Your computer has extra power connectors for additional drives. Connect a power connector to the drive.

5. If you have a CD-ROM drive audio cable, connect it to the drive and the system board.

### **To connect an additional IDE CD drive or DVD drive**

1. Locate the secondary IDE connector on the system board and the three-connector signal cable. See “Identifying parts on the system board - microtower model” on page 48.
2. Connect the extra connector in the signal cable to the new CD drive or DVD drive.
3. Your computer has extra power connectors for additional drives. Connect a power connector to the drive.

### **To connect an additional IDE hard disk drive**

1. You will have to obtain a three-connector, ATA-100 compatible signal cable to connect your new hard disk.
2. Remove the two-connector cable from the hard disk drive.
3. Locate the primary IDE connector on the system board. One end of the three-connector cable connects to the hard disk drive and the other connects to the system board. See “Identifying parts on the system board - microtower model” on page 48.
4. Connect the extra connector in the signal cable to the new hard disk drive.
5. Your computer has extra power connectors for additional drives. Connect a power connector to the drive.

#### **What to do next**

- To work with another option, go to the appropriate section.
- To complete the installation, go to “Replacing the cover and connecting the cables - microtower model” on page 56.

---

## **Installing a Rope Clip - microtower model**

To help prevent hardware theft, you can add a 3/16 inch or 5 mm Rope Clip and cable to your computer. After you add the security cable, make sure that it does not interfere with other cables that are connected to the computer.

To install a Rope Clip:

1. Remove cover (see “Removing the cover - microtower model” on page 44).
2. Use a tool, such as a screwdriver, to remove the two metal knockouts.
3. Insert the Rope Clip through the rear panel; then attach and tighten the nuts with an appropriately sized or adjustable wrench.
4. Replace the computer cover. For more information, see “Replacing the cover and connecting the cables - microtower model” on page 56.
5. Thread the cable through the Rope Clip and around an object that is not a part of or permanently secured to the building structure or foundation, and from

which it cannot be removed; then fasten the cable ends together with a lock.

- 1** Rope Clip
- 2** Bolt holes
- 3** Nuts

**What to do next:**

To work with another option, go to the appropriate section.

---

## Replacing the cover and connecting the cables - microtower model

After working with options, you need to install any removed parts, replace the cover, and reconnect any cables, including power cords and telephone lines. Also, depending on the option that is installed, you might need to confirm the updated information in the Configuration/Setup Utility program.

To replace the cover and connect cables to your computer:

1. Ensure that all components have been reassembled correctly and that no tools or loose screws are left inside your computer.
2. Clear any cables that might impede the replacement of the cover.

3. Position the cover over the chassis so that the front edge is approximately one inch away from the front bezel.

4. Lower the cover down over the chassis so that the rail guides engage the rails.
5. Slide the cover forward. You might need to lift the front of the cover slightly to align it properly.
6. Insert the three thumbscrews into the holes in the cover and the chassis and tighten.
7. Reconnect the external cables and cords to the computer.
8. To update the configuration, see “Module test menu/hardware configuration report” on page 13.

**Important:**

When the power cord is first plugged in, the computer might appear to power on for a few seconds, then power off. This is a normal sequence to enable the computer to initialize.

---

## Replacing a System Board - Small Desktop Model

**Important:**

Before replacing a system board, back up Asset information by using the "Asset EEPROM backup" on page 16.

**Notes:**

1. The BIOS and Vital Product Data (VPD) for the computer you are servicing must be installed on the new system board (FRU) after it is installed in the computer. To do this, **you must run the Flash Update program using the Flash Update diskette**. See “BIOS levels” on page 199, “Vital product data” on page 198, and “Flash (BIOS/VPD) update procedure” on page 200.
2. Always ensure the latest level of BIOS is installed on the computer. A down level BIOS may cause false errors and unnecessary replacement of the system board.
3. The processor is a separate FRU from the system board and is not included with the system board FRU.
4. If the new system board does not correct the problem, reinstall the options on the old system board, reinstall the old system board, then replace the processor.

1. Remove the cover. See “Removing the cover - small desktop model” on page 26.
2. Remove the 4 screws that attach the system board to the chassis. **\*\*This graphic is incorrect. Correct graphic is in process.\*\***

3. Remove the board from the chassis.
4. Remove the processor from the old system board and install it on the new system board.
5. Remove any of the following installed options on the old system board, and install them on the new system board.
  - Memory modules
6. Ensure that the new system board jumper settings match the old system board jumper settings.

---

## Replacing a processor - Small Desktop Model

**Attention:** When you handle ESD-sensitive devices, take precautions to avoid damage from static electricity. For details on handling these devices, see “Handling electrostatic discharge-sensitive devices” on page 210.

1. Review the safety precautions listed in “Safety information” on page 207.

2. Turn off the system and peripheral devices and disconnect all external cables and power cords; then, remove the cover (see “Removing the cover - small desktop model” on page 26 for details).
3. Push down on the retainer clip, and at the same time, use a flat bladed screwdriver to carefully pry the metal loop from under the hook attaching the fansink to the processor.
4. Carefully remove the other metal loop from the hook attaching the fansink to the processor. Lift up and remove the fansink.

**Note:** Once you remove the heat sink from the microprocessor, you must replace it with a new device.

5. Pull out and lift up the release lever and remove the microprocessor from the connector. Store the microprocessor in a static-protective bag for possible future use.

---

## Power supply removal - Small Desktop Model

1. Remove the cover. See “Removing the cover - small desktop model” on page 26.
2. Remove the four screws that hold the power supply to the back of the chassis.
3. The power supply is attached to the base of the chassis by a latch on the front. Slide the power supply forward to dislatch it from the chassis.
4. Lift out the power supply.

---

## Replacing a System Board - Desktop Model

**Important:**

Before replacing a system board, back up Asset information by using the “Asset EEPROM backup” on page 16.

**Notes:**

1. The BIOS and Vital Product Data (VPD) for the computer you are servicing must be installed on the new system board (FRU) after it is installed in the computer. To do this, **you must run the Flash Update program using the Flash Update diskette**. See “BIOS levels” on page 199, “Vital product data” on page 198, and “Flash (BIOS/VPD) update procedure” on page 200.
2. Always ensure the latest level of BIOS is installed on the computer. A down level BIOS may cause false errors and unnecessary replacement of the system board.
3. The processor is a separate FRU from the system board and is not included with the system board FRU.
4. If the new system board does not correct the problem, reinstall the options on the old system board, reinstall the old system board, then replace the processor.

1. Remove the cover. See “Removing the cover - desktop model” on page 34.
2. Remove the 7 screws that attach the system board to the chassis.

3. Remove the board from the chassis.
4. Remove the processor from the old system board and install it on the new system board.
5. Remove any of the following installed options on the old system board, and install them on the new system board.
  - Memory modules
6. Ensure that the new system board jumper settings match the old system board jumper settings.

---

## Replacing a processor - Desktop Model

**Attention:** When you handle ESD-sensitive devices, take precautions to avoid damage from static electricity. For details on handling these devices, see “Handling electrostatic discharge-sensitive devices” on page 210.

1. Review the safety precautions listed in “Safety information” on page 207.

2. Turn off the system and peripheral devices and disconnect all external cables and power cords; then, remove the cover (see "Removing the cover - desktop model" on page 34 for details).
3. Push down on the retainer clip, and at the same time, use a flat bladed screwdriver to carefully pry the metal loop from under the hook attaching the fansink to the processor.
4. Carefully remove the other metal loop from the hook attaching the fansink to the processor. Lift up and remove the fansink.

**Note:** Once you remove the heat sink from the microprocessor, you must replace it with a new device.

5. Pull out and lift up the release lever and remove the microprocessor from the connector. Store the microprocessor in a static-protective bag for possible future use.

---

## Power supply removal - Desktop Model

1. Remove the cover. See "Removing the cover - desktop model" on page 34.
2. Remove the four screws that hold the power supply to the back of the chassis.

3. The power supply is attached to the base of the chassis by a latch on the front. Slide the power supply forward to dislatch it from the chassis.
4. Lift out the power supply.

## Replacing a system board - Microtower Model

### Important:

Before replacing a system board, back up Asset information by using the "Asset EEPROM backup" on page 16.

### Notes:

1. The BIOS and Vital Product Data (VPD) for the computer you are servicing must be installed on the new system board (FRU) after it is installed in the computer. To do this, **you must run the Flash Update program using the Flash Update diskette**. See "BIOS levels" on page 199, "Vital product data" on page 198, and "Flash (BIOS/VPD) update procedure" on page 200.
2. Always ensure the latest level of BIOS is installed on the computer. A down level BIOS may cause false errors and unnecessary replacement of the system board.
3. The processor is a separate FRU from the system board and is not included with the system board FRU.
4. If the new system board does not correct the problem, reinstall the options on the old system board, reinstall the old system board, then replace the processor.

To replace the system board, do the following:

1. Remove the cover (see "Removing the cover - microtower model" on page 44).
2. Remove the 7 screws that attach the system board to the chassis.

3. Remove the board from the chassis.
4. Remove the processor from the old system board and install it on the new system board.
5. Remove any of the following installed options on the old system board, and install them on the new system board.

- Memory modules
6. Ensure that the new system board jumper settings match the old system board jumper settings.

---

## Replacing a processor - Microtower Model

**Attention:** When you handle ESD-sensitive devices, take precautions to avoid damage from static electricity. For details on handling these devices, see “Handling electrostatic discharge-sensitive devices” on page 210.

1. Review the safety precautions listed in “Safety information” on page 207.
2. Turn off the system and peripheral devices and disconnect all external cables and power cords; then, remove the cover (see “Removing the cover - microtower model” on page 44 for details).
3. Push down on the retainer clip, and at the same time, use a flat bladed screwdriver to carefully pry the metal loop from under the hook attaching the fansink to the processor.
4. Carefully remove the other metal loop from the hook attaching the fansink to the processor. Lift up and remove the fansink.

**Note:** Once you remove the heat sink from the microprocessor, you must replace it with a new device.

5. Pull out and lift up the release lever and remove the microprocessor from the connector. Store the microprocessor in a static-protective bag for possible future use.

---

## Power supply removal - Microtower Model

1. Remove the cover (see “Removing the cover - microtower model” on page 44).
2. Remove the screw that secures the power supply to the rear of the chassis.
3. Push the metal tab that secures the power supply to the chassis to release the power supply.

- Slide the power supply unit up toward the top of the chassis.

- Rotate the power supply outward as shown.

6. Pull the power supply forward and carefully rotate it toward the front of the chassis.

---

## Chapter 6. Symptom-to-FRU Index

SDRAM memory errors . . . . .	70	No-beep symptoms. . . . .	92
Hard disk drive boot error . . . . .	70	POST error codes . . . . .	93
Power Supply Errors . . . . .	71	Miscellaneous error messages . . . . .	107
Diagnostic error codes. . . . .	72	Undetermined problems. . . . .	109
Beep symptoms . . . . .	90		

The Symptom-to-FRU index lists error symptoms and possible causes. The most likely cause is listed first. Always begin with "General Checkout" on page 1. This index can also be used to help you decide which FRUs to have available when servicing a computer. If you are unable to correct the problem using this index, go to "Undetermined problems" on page 109.

### Notes:

- If you have both an error message and an incorrect audio response, diagnose the error message first.
- If you cannot run the diagnostic tests or you get a diagnostic error code when running a test, but did receive a POST error message, diagnose the POST error message first.
- If you did not receive any error message, look for a description of your error symptoms in the first part of this index.
- Check the hard disk drive jumper settings before you replace a hard disk drive.

### Important:

Some errors are indicated with a series of beep codes (see "Beep symptoms" on page 90).

Type 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6346, 6347, 6348 computers default to come up quiet (no beep and no memory count and checkpoint code display) when no errors are detected by POST. To enable beep and memory count and checkpoint code display when a successful POST occurs, do the following:

1. Select **Start Options** in the Configuration/Setup Utility program (see "Setup Utility program" on page 10).
2. Set **Power-On Self-Test** to **Enhanced**.

The processor is a separate FRU from the system board; the processor is not included with the system board FRU.

---

## SDRAM memory errors

SDRAM error messages issued by the IBM PC Enhanced Diagnostics.

Error	FRU/Action
<b>2xx</b>  A memory error was detected in SDRAM socket Y.	Replace the SDRAM in the socket identified by the last digit of the error code.  Re-run the test.  If the same error code occurs again, replace the system board.
<b>Corrupt BIOS</b>  Information in BIOS is not as expected.  Not able to find expected DMI information from BIOS.	Reflash the BIOS.  Perform boot block recovery.  Replace the system board.
<b>Test aborted by user</b>	Restart test.

**Note:** Y is the SDRAM socket number. Use the System Board Layout section in the latest Hardware Maintenance Manual (HMM) to reference the memory sockets.

---

## Hard disk drive boot error

A hard disk drive boot error (error code 17XX) can have the following causes.

Error	FRU/Action
The start-up drive is not in the boot sequence in configuration.	Check the configuration and ensure the start-up drive is in the boot sequence.
No operating system installed on the boot drive.	Install an operating system on the boot drive.
The boot sector on the start-up drive is corrupted.	The drive must be formatted, do the following: <ol style="list-style-type: none"><li>1. Attempt to access and recover (back-up) the failing hard disk drive.</li><li>2. Using the operating systems programs, format the hard disk drive.</li><li>3. Go to "Preparing the hard disk drive for use" on page 17.</li></ol>
The drive is defective.	Replace the hard disk drive.

---

## Power Supply Errors

If the power-on indicator is not on, the power supply fan is not running, or the computer will not power-off, use the following procedures.

Check/Verify	FRU/Action
Check the following for proper installation. <ul style="list-style-type: none"><li>• Power Cord</li><li>• On/Off Switch connector</li><li>• On/Off Switch Power Supply connector</li><li>• System Board Power Supply connectors</li><li>• Microprocessor(s) connection</li></ul>	Reseat
Check the power-on switch for continuity.	Power Cord
Check the power-on switch for continuity.	Power-on Switch

## Diagnostic error codes

Refer to the following diagnostic error codes when using the diagnostic tests. See "Diagnostics" on page 9 for the specific type for information about the Diagnostic programs.

In the following index, X can represent any number.

Diagnostic Error Code	FRU/Action
<b>000-000-XXX</b> BIOS Test Passed	1. <b>No action</b>
<b>000-002-XXX</b> BIOS Timeout	1. <b>Flash the system</b> 2. System board
<b>000-024-XXX</b> BIOS Addressing test failure	1. <b>Flash the system</b> 2. System board
<b>000-025-XXX</b> BIOS Checksum Value error	1. <b>Flash the system</b> 2. Boot block 3. System board
<b>000-026-XXX</b> FLASH data error	1. <b>Flash the system</b> 2. Boot block 3. System board
<b>000-027-XXX</b> BIOS Configuration/Setup error	1. <b>Run Setup</b> 2. Flash the system 3. Boot block 4. System board
<b>000-034-XXX</b> BIOS Buffer Allocation failure	1. <b>Reboot the system</b> 2. Flash the system 3. Run memory test 4. System board
<b>000-035-XXX</b> BIOS Reset Condition detected	1. <b>Flash the system</b> 2. System board
<b>000-036-XXX</b> BIOS Register error	1. <b>Flash the system</b> 2. Boot block 3. System board
<b>000-038-XXX</b> BIOS Extension failure	1. <b>Flash the system</b> 2. Adapter card 3. System board
<b>000-039-XXX</b> BIOS DMI data error	1. <b>Flash the system</b> 2. System board
<b>000-195-XXX</b> BIOS Test aborted by user	1. <b>Information</b> 2. Re-start the test, if necessary
<b>000-196-XXX</b> BIOS test halt, error threshold exceeded	1. <b>Press F3 to review the log file</b> 2. Re-start the test to reset the log file

Diagnostic Error Code	FRU/Action
000-197-XXX BIOS test warning	<ol style="list-style-type: none"> <li>1. <b>Make sure the component that is called out is connected and/or enabled</b></li> <li>2. Re-run test</li> <li>3. Component that is called out in warning statement</li> <li>4. Component under test</li> </ol>
000-198-XXX BIOS test aborted	<ol style="list-style-type: none"> <li>1. <b>If a component is called out, make sure it is connected and/or enabled</b></li> <li>2. Flash the system and re-test</li> <li>3. Go to the "Undetermined problems" section</li> </ol>
000-199-XXX BIOS test failed, cause unknown	<ol style="list-style-type: none"> <li>1. <b>Go to the "Undetermined problems" section</b></li> <li>2. Flash the system and re-test</li> <li>3. Replace component under function test</li> </ol>
000-250-XXX BIOS APM failure	<ol style="list-style-type: none"> <li>1. <b>Flash the system</b></li> <li>2. System board</li> </ol>
000-270-XXX BIOS ACPI failure	<ol style="list-style-type: none"> <li>1. <b>Flash the system</b></li> <li>2. System board</li> </ol>
001-000-XXX System Test Passed	<ol style="list-style-type: none"> <li>1. <b>No action</b></li> </ol>
001-00X-XXX System Error	<ol style="list-style-type: none"> <li>1. <b>System board</b></li> </ol>
001-01X-XXX System Error	<ol style="list-style-type: none"> <li>1. <b>System board</b></li> </ol>
001-024-XXX System Addressing test failure	<ol style="list-style-type: none"> <li>1. <b>System board</b></li> </ol>
001-025-XXX System Checksum Value error	<ol style="list-style-type: none"> <li>1. <b>Flash the system</b></li> <li>2. System board</li> </ol>
001-026-XXX System FLASH data error	<ol style="list-style-type: none"> <li>1. <b>Flash the system</b></li> <li>2. System board</li> </ol>
001-027-XXX System Configuration/Setup error	<ol style="list-style-type: none"> <li>1. <b>Run Setup</b></li> <li>2. Flash the system</li> <li>3. System board</li> </ol>
001-032-XXX System Device Controller failure	<ol style="list-style-type: none"> <li>1. <b>System board</b></li> </ol>
001-034-XXX System Device Buffer Allocation failure	<ol style="list-style-type: none"> <li>1. <b>Reboot the system</b></li> <li>2. Flash the system</li> <li>3. Run memory test</li> <li>4. System board</li> </ol>
001-035-XXX System Device Reset condition detected	<ol style="list-style-type: none"> <li>1. <b>System board</b></li> </ol>
001-036-XXX System Register error	<ol style="list-style-type: none"> <li>1. <b>System board</b></li> </ol>

Diagnostic Error Code	FRU/Action
<b>001-038-XXX</b> System Extension failure	1. <b>Adapter card</b> 2. System board
<b>001-039-XXX</b> System DMI data structure error	1. <b>Flash the system</b> 2. System board
<b>001-040-XXX</b> System IRQ failure	1. <b>Power-off/on system and re-test</b> 2. System board
<b>001-041-XXX</b> System DMA failure	1. <b>Power-off/on system and re-test</b> 2. System board
<b>001-195-XXX</b> System Test aborted by user	1. <b>Information</b> 2. Re-start the test, if necessary
<b>001-196-XXX</b> System test halt, error threshold exceeded	1. <b>Press F3 to review the log file</b> 2. Re-start the test to reset the log file
<b>001-197-XXX</b> System test warning	1. <b>Make sure the component that is called out is connected and/or enabled</b> 2. Re-run test 3. Component that is called out in warning statement 4. Component under test
<b>001-198-XXX</b> System test aborted	1. <b>If a component is called out, make sure it is connected and/or enabled</b> 2. Flash the system and re-test 3. Go to the "Undetermined problems" section
<b>001-199-XXX</b> System test failed, cause unknown	1. <b>Go to the "Undetermined problems" section</b> 2. Flash the system and re-test 3. Replace component under function test
<b>001-250-XXX</b> System ECC error	1. <b>System board</b>
<b>001-254-XXX</b> <b>001-255-XXX</b> <b>001-256-XXX</b> <b>001-257-XXX</b> System DMA error	1. <b>System board</b>
<b>001-260-XXX</b> <b>001-264-XXX</b> System IRQ error	1. <b>System board</b>
<b>001-268-XXX</b> System IRQ1 failure	1. <b>Device on IRQ1</b> 2. System board
<b>001-269-XXX</b> System IRQ2 failure	1. <b>Device on IRQ2</b> 2. System board
<b>001-270-XXX</b> System IRQ3 failure	1. <b>Device on IRQ3</b> 2. System board

<b>Diagnostic Error Code</b>	<b>FRU/Action</b>
<b>001-271-XXX</b> System IRQ4 failure	1. <b>Device on IRQ4</b> 2. System board
<b>001-272-XXX</b> System IRQ5 failure	1. <b>Device on IRQ5</b> 2. System board
<b>001-273-XXX</b> System IRQ6 (diskette drive) failure	1. <b>Diskette Cable</b> 2. Diskette drive 3. System board
<b>001-274-XXX</b> System IRQ7 failure	1. <b>Device on IRQ7</b> 2. System board

## Beep symptoms

Beep symptoms are short tones or a series of short tones separated by pauses (intervals without sound). See the following examples.

Beeps	Description
1-2-X	<ul style="list-style-type: none"><li>• One beep</li><li>• A pause (or break)</li><li>• Two beeps</li><li>• A pause (or break)</li><li>• Any number of breaks</li></ul>
4	Four continuous beeps

Use the following table to diagnose beep symptoms.

Beep Symptom	FRU/Action
1-1-3 CMOS read-write error	<ol style="list-style-type: none"><li>1. <b>Run Setup</b></li><li>2. System Board</li></ol>
1-1-4 ROM BIOS check error	<ol style="list-style-type: none"><li>1. <b>System Board</b></li></ol>
1-2-X DMA error	<ol style="list-style-type: none"><li>1. <b>System Board</b></li></ol>
1-3-X	<ol style="list-style-type: none"><li>1. <b>Memory Module</b></li><li>2. System Board</li></ol>
1-4-4	<ol style="list-style-type: none"><li>1. <b>Keyboard</b></li><li>2. System Board</li></ol>
1-4-X Error detected in first 64 KB of RAM	<ol style="list-style-type: none"><li>1. <b>Memory Module</b></li><li>2. System Board</li></ol>
2-1-1, 2-1-2	<ol style="list-style-type: none"><li>1. <b>Run Setup</b></li><li>2. System Board</li></ol>
2-1-X First 64 KB of RAM failed	<ol style="list-style-type: none"><li>1. <b>Memory Module</b></li><li>2. System Board</li></ol>
2-2-2	<ol style="list-style-type: none"><li>1. <b>Video Adapter (if installed)</b></li><li>2. System Board</li></ol>
2-2-X First 64 KB of RAM failed	<ol style="list-style-type: none"><li>1. <b>Memory Module</b></li><li>2. System Board</li></ol>
2-3-X	<ol style="list-style-type: none"><li>1. <b>Memory Module</b></li><li>2. System Board</li></ol>
2-4-X	<ol style="list-style-type: none"><li>1. <b>Run Setup</b></li><li>2. Memory Module</li><li>3. System Board</li></ol>
3-1-X DMA register failed	<ol style="list-style-type: none"><li>1. <b>System Board</b></li></ol>

<b>Beep Symptom</b>	<b>FRU/Action</b>
<b>3-2-4</b> Keyboard controller failed	1. <b>System Board</b> 2. Keyboard
<b>3-3-4</b> Screen initialization failed	1. <b>Video Adapter (if installed)</b> 2. System Board Display
<b>3-4-1</b> Screen retrace test detected an error	1. <b>Video Adapter (if installed)</b> 2. System Board 3. Display
<b>3-4-2</b> POST is searching for video ROM	1. <b>Video Adapter (if installed)</b> 2. System Board
<b>4</b>	1. <b>Video Adapter (if installed)</b> 2. System Board
All other beep code sequences	1. <b>System Board</b>
One long and one short beep during POST. Base 640 KB memory error or shadow RAM error	1. <b>Memory Module</b> 2. System Board
One long beep and two or three short beeps during POST. (Video error)	1. <b>Video Adapter (if installed)</b> 2. System Board
Three short beeps during POST	1. <b>System Board Memory</b> 2. System Board
Continuous beep	1. <b>System Board</b>
Repeating short beeps	1. <b>Keyboard stuck key?</b> 2. Keyboard Cable 3. System Board

## No-beep symptoms

**Important:**

Type 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6346, 6347, and 6348 computers default to come up quiet (no beep and no memory count and checkpoint code display) when no errors are detected by POST.

To enable beep and memory count and checkpoint code display when a successful POST occurs, do the following:

1. Select **Start Options** in the Configuration/Setup Utility program (see “Setup Utility program” on page 10).
2. Set **Power-On Self-Test** to **Enhanced**.

Symptom/Error	FRU/Action
No beep during POST but computer works correctly.	1. <b>System Board</b>
No beep during POST.	<ol style="list-style-type: none"><li>1. See “Undetermined problems” on page 109.</li><li>2. System Board</li><li>3. Memory Module</li><li>4. Any Adapter or Device</li><li>5. Riser Card</li><li>6. Power Cord</li><li>7. Power Supply</li></ol>

## POST error codes

Each time you power-on the system, it performs a series of tests that check the operation of the system and some options. This series of tests is called the *Power-On Self-Test*, or *POST*. POST does the following operations.

- Checks some basic system-board operations
- Checks the memory operation
- Starts the video operation
- Verifies that the diskette drive is working
- Verifies that the hard disk drive is working

If the POST finishes without detecting any problems, a single beep sounds and the first screen of the operating system or application program appears.

**Note:**

Type 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6346, 6347, and 6348 computers default to come up quiet (no beep and no memory count and checkpoint code display) when no errors are detected by POST.

To enable beep and memory count and checkpoint code display when a successful POST occurs, do the following:

1. Select **Start Options** in the Configuration/Setup Utility program (see “Setup Utility program” on page 10).
2. Set **Power-On Self-Test** to **Enhanced**.

If the POST detects a problem, an error message appears on the screen. A single problem can cause several error messages to appear. When you correct the cause of the first error message, the other error messages probably will not appear on the screen the next time you turn on the system.

In the following index, X can represent any number.

POST Error Code	FRU/Action
<b>000</b> SCSI Adapter not enabled	1. <b>Verify adapter device and Bus Master fields are enabled in PCI configuration program. See documentation shipped with computer.</b>
<b>02X</b>	1. <b>SCSI Adapter</b>

Message/Symptom	FRU/Action
Some or all keys on the keyboard do not work	<ol style="list-style-type: none"> <li>1. <b>Keyboard</b></li> <li>2. Keyboard Cable</li> <li>3. System Board</li> </ol>

---

## Undetermined problems

Check the power supply voltages (see “Power Supply Errors” on page 71). If the voltages are correct, return here and continue with the following steps.

1. Power-off the computer.
2. Remove or disconnect the following components (if installed) one at a time.
  - a. Non-IBM devices
  - b. External devices (modem, printer, or mouse)
  - c. Any adapters
  - d. Riser card
  - e. Memory modules
  - f. Extended video memory
  - g. External Cache
  - h. External Cache RAM
  - i. Hard disk drive
  - j. Diskette drive
3. Power-on the computer to re-test the system.
4. Repeat steps 1 through 3 until you find the failing device or adapter.

If all devices and adapters have been removed, and the problem continues, replace the system board (see “Replacing a System Board - Small Desktop Model” on page 60, “Replacing a System Board - Desktop Model” on page 62, or “Replacing a system board - Microtower Model” on page 65).

---

## Chapter 7. Parts

---

### Small Desktop Model

Types 2256, 6339, 6346

Machine Type 2256		
1	Top Cover Assembly, Black (models 22T 23V 52T 53V 81V 93V 1FA 2AA 95A 12Q 22Q 23M B3M 51Q 52Q 54M 71Q 82M 92M 91Q,72J 73J 74J 75J 94J 76J 77J 78J 83J 84J 1AJ 1BJ 1CJ 1DJ 2BJ 23C 95A)	31P5610

	<b>Machine Type 2256</b>	
1	Top Cover Assembly, Black (models 96J 97J 98J 99J)	58P9863
2	Intel Celeron 100/800 128K (model 12Q)	24P5784
2	Intel Celeron 100/850 128K (models 22Q, 22T, 23C, 23M, 23V)	24P5944
2	Intel Celeron 900 MHz (model 54M)	32P4094
2	Intel Celeron 950 MHz (models 51Q 52-QT 71Q 72J 73J 74J 75J 76J 77J 78J)	48P5039
2	Intel Celeron 1 GHz (models 53V 81V 82M)	48P5040
2	Intel Celeron 1.1 GHz (models 91Q 92M 93V 94J)	33P0813
2	Intel Celeron 1.1 GHz (models 95A 96J 97J 98J 99J)	49P3427
2	Intel PIII 1GHz (model B3M 83J 84J)	25P0718
2	Intel Celeron 1.2 GHz (models 1AJ 1BJ 1CJ 1DJ 1FA)	57P7000
2	Intel Celeron 1.3 GHz (models 2AA 2BJ)	33P0811
3	64MB SDRAM Memory (models 12Q 22Q 22T 51Q 52Q 52T 54M)	33L3072
3	128 MB SDRAM Memory (models B3M 23C 23M 23V 53V 71Q 72J 73J 74J 75J 81V 82M 91Q 92M 93V 76J 77J 78J 83J 84J 1AJ 1BJ 1CJ 1DJ 1FA 2AA 95A 96J 97J 98J 99J)	33L3074
3	256 MB SDRAM Memory (model 94J 2BJ)	33L3076
4	System Board W/O Mem/Proc (models 12Q 23C 23M 23V 51Q 53V 54M 71Q 81V 82M 91Q 76J 77J B3J B4J 1AJ 1BJ 1CJ 1DJ 1FA 2AA 2BJ 95A 96J 97J 98J 99J)  <b>Important:</b> These models may contain systemboard part number 49P0404 or 33P0825. Only install the same systemboard part number as the one you removed.	xxxxxxx
5	5.25 DASD Bracket (all models)	31P5620
6	CD-ROM 48x, Black (models 12Q 23C 23M 23V 51Q 53V 54M 71Q 81V 82M 91Q 76J 77J 84J 1AJ 1CJ 1FA 2AA 95A 96J 98J)	33P3203
6	CD-ROM 48x Lite-On, Black (models 12Q 23C 23M 23V 51Q 53V 54M 71Q 81V 82M 91Q 76J 77J 84J 1AJ 1CJ 1FA 2AA 95A 96J 98J)	19K1531
6	CD-ROM 48x Samsung (models 12Q 23C 23M 23V 51Q 53V 54M 71Q 81V 82M 91Q 76J 77J 84J 1AJ 1CJ 1FA 2AA 95A 96J 98J)	06P5281
6	12x CD-RW, LG, Black (models 22Q, 22T, B2T)	06P5161
6	16x CD-RW, LG, Black (models 72J 73J 78J 83J 1BJ 1DJ 2BA)	24P3627
6	16x CD-RW, LG, Black (models 72J 73J 78J 83J 1BJ 1DJ 2BA)	24P3631
6	24X10X40X CDRW (Black) (models 1BJ 1DJ 2BJ)	24P3634
6	24X10X40X CDRW (Black) (models 1BJ 1DJ 2BJ 97J 99J)	24P3635
6	16x40x DVD, Black (model B3M 92M 93V)	06P5285
6	4x32x8x DVD/CD-RW Combo, Samsung, Black (model 74J 75J 94J)	06P5289
7	3.5" 1.44MB Diskette Drive, Black Bezel (all models)	76H4091
8	3.5 FDD Bracket (all models)	31P5619

	<b>Machine Type 2256</b>	
9	Basic Chassis, Black (all models)	31P5611
10	120 W Power Supply, PFC version (all models)	25P4966
	Front panel assembly (models 84J 1AJ 1BJ 1CJ 1DJ 1FA 2AA)	32P4158
	Front panel (models 83J 2BJ)	32P4159
	Cable, flat (10-pin) (models 83J 84J 1AJ 1BJ 1CJ 1DJ 1FA 2AA 2BJ)	32P4156
	Cable, 5-pin (models 83J 84J 1AJ 1BJ 1CJ 1DJ 1FA 2AA 2BJ)	32P4165
	INTEL Lake Clark 2.7 Ethernet adapter (models 71Q 72J 73J 74J 75J 81V 82M 91Q 92M 93V 94J)	22P4709
	PCMCIA/IEEE 1394 Combo Card (models 74J 75J 94J 78J 83J 2BA)	33P0855
	PCMCIA Bay Assembly (models 74J 75J 94J 78J 83J 2BA)	49P0010
	PCMCIA Cable (models 74J 75J 94J 78J 83J 2BA)	49P0009
	Fansink - Heatsink with Fan and Clip (models 12Q 22Q 22T 23C 23M 23V)	10K1689
	Fansink - Heatsink with Fan and Clip Assembly (model 51Q 52Q 52T 53V 54M)	06P2458
	Fansink - Heatsink with Fan and Clip Assembly (models 71Q 72J 73J 74J 75J 81V 82M 91Q 92M 93V 94J B3M 76J 77J 78J 83J 84J 95A 96J 97J 98J 99J)	32P4086
	Fansink - Heatsink with Fan and Clip Assembly (models 1A 1BJ 1CJ 1DJ 1FA 2AA 2BJ)	22P4368
	20 GB Hardfile EIDE 5400rpm (models 12Q 22Q 22T 23C 23M 23V 51Q 52Q 52T 53V 54M 71Q 81V 82M)	19K1560
	40 GB ATA-100 HDD (model B3M 72J 73J 91Q 92M 93V 76J 77J 78J 83J 84J 1AJ 1BJ 1CJ 1DJ 1FA 2AA 95A 96J 97J 98J 99J)	19K1562
	60 GB ATA-100 HDD (models 74J 75J 2BJ)	24P6006
	80 GB ATA-100 HDD (model 94J)	06P5237
	Modem Domestic, LP Monopak 56K w/std bracket (all models)	19K2965
	Lithium Battery (all models)	33F8354
	Mouse - Scrollpoint III, USB, Black (all models)	24P0485
	Speakers, External, Tier 4 Powered Speakers (all models)	25P4723
	Speaker Brick - China (model 23C)	10K2597
	Speaker Brick - GB/UK (model 12Q 51Q 52Q 22Q 23M B3M 54M 71Q 91Q 82M 92M)	25P5703
	Speaker Brick - US/Canada/LA/Taiwan (models 23V 22T 52T 53V 81V 93V 95A)	10K2587
	Speaker Brick - Japan (models 72J 73J 74J 75J 94J 76J 77J 78J 83J 84J 1AJ 1BJ 1CJ 1DJ 2BJ 96J 97J 98J 99J)	10K2593
	Speaker Brick - Brazil	25P5706
	Speaker Brick - ANZ (models 1BA 2AA)	25P5705
	Speaker Brick - EMEA/LA High Volt	25P5704
	Bezel Kit, Black (all models)	31P5614

	<b>Machine Type 2256</b>	
	System Stand, Black (all models)	32P4065
	I/O Slot Cover (all models)	31P5615
	Cable - Primary IDE (all models)	31P5616
	FDD Cable (all models)	31P5617
	Cable - Secondary IDE (CD_ROM) (all models)	31P5618
	CD-ROM Audio Cable (all models)	75H9219
	Shields 5.25 and PCMCIA (all models)	31P5603
	USB Cable Assembly (all models)	25P6152
	HDD Mounting Bracket (all models)	31P5621

## Desktop Model

Types 6347, 6341, 6336

	<b>Machine Type 6347</b>	
1	Top Cover Assembly, Pearl White (all models)	06P2732
2	Intel Celeron 100/850 128K (all models)	24P5944
2	Intel PIII 933 MHz Processor	25P0719
2	Intel PIII 1GHz	25P0718
2	Fansink - Heatsink with Fan and Clip (all models)	06P2458
3	64MB SDRAM Memory	33L3072
3	128 MB SDRAM Memory (all models)	33L3074
4	System Board W/O Mem/Proc (all models)  <b>Important:</b> These models may contain systemboard part number 49P0404 or 33P0825. Only install the same systemboard part number as the one you removed.	xxxxxxx
5	5.25 DASD Bracket (all models)	09N5746
6	20 GB Hardfile EIDE 5400rpm (all models)	19K1560
6	40 GB ATA-100 HDD	19K1562
7	CD-ROM 48x, White (all models)	24P3603
7	CD-ROM 48x Lite-On, White (all models)	19K1529
7	CD-ROM 48x Samsung (all models)	19K1533
8	EMC Shield for 5.25" Bay (all models)	19K5548
9	3.5" 1.44MB Diskette Drive, No Bezel (all models)	75H9550
10	3.5 DASD Bracket (all models)	06P2734
11	Fan/Speaker Bracket (all models)	09N5763
12	Chassis Assembly (all models)	06P2731
13	I/O Cam Bracket (all models)	09N5734
14	155 W Power Supply - Japan & EMEA (model 27G)	00N7687
14	155 W Power Supply - China	00N7689
14	155 W Power Supply, uATX (models 27U, 27F, 27S, 27P, 27A, 27C, 27M, 27D, 27Q, 27T)	00N7685

---

### Security features

Security features in this section include the following:

- Passwords
- Vital Product Data
- Management Information Format (MIF)
- Alert on LAN

### Passwords

The following section provides information about computer hardware and software-related passwords.

- Power-on Password
- Administrator Password
- Operating System Password

Power-on and Administrator passwords are set in the Setup Utility program. See “Setup Utility program” on page 10 for information about running the Setup Utility.

#### Power-on password

A power-on password denies access to the computer by an unauthorized user when the computer is powered on. When a power-on password is active, the password prompt appears on the screen each time the computer is powered on. The computer starts after the proper password is entered.

#### Removing a power-on password

To service a computer with an active and unknown power-on password, power-off the computer and use the following procedure.

**Note:** This also erases the date and time.

<b>Note:</b> On some models, this procedure will also remove the administrator password.
--

1. Unplug the power cord and remove the top cover.
2. Refer to “Identifying parts on the system board - small desktop model” on page 27 to find the Virtual clear CMOS/BIOS recovery jumper.

3. Move the recovery jumper from **normal** to **ROM recovery**.
4. Power-on the computer. The system senses the change in the position and erases the password.
5. Wait 30 seconds for beeps to sound, and then power down by holding the power button for 10 seconds.
6. Return the jumper to normal position.
7. Reset the date and time and remind the user to enter a new password when service is complete.

### **Administrator password**

The administrator password is used to restrict access to the Configuration/Setup Utility program. If the administrator password is activated, and you do not enter the administrator password, the configuration can be viewed but not changed.

#### **Note:**

Types 2254, 2256, 2257, 6336, 6337, 6339, 6341, 6342, 6346, 6347, 6438 have Enhanced Security Mode. If Enhanced Security mode is enabled and there is no password given, the computer will act as if Enhanced Security is disabled.

If Enhanced Security is Enabled and an administrator password is given, the administrator password must be entered to use the computer. If the administrator password is lost or forgotten, the system board in the computer must be replaced in order to regain access to the Configuration/Setup Utility program.

### **Administrator password control**

The Administrator password is set in the Setup Configuration. Refer to “Setup Utility program” on page 10.

### **Operating system password**

An operating system password is very similar to a power-on password and denies access to the computer by an unauthorized user when the password is activated. The computer is unusable until the password is entered and recognized by the computer.

## **Vital product data**

Each computer has a unique Vital Product Data (VPD) code stored in the nonvolatile memory on the system board. After you replace the system board, the VPD must be updated. To update the VPD, see “Flash (BIOS/VPD) update procedure” on page 200.

## **Management Information Format (MIF)**

Management Information Format (MIF) is a file used to maintain a list of the system unit serial number along with all serialized components (for example, system board, riser card, memory, and processor).

At the time of computer manufacture, the EPROM will be loaded with the serial numbers of the system and all major components. The customer will have access to the MIF file via the DMI MIF Browser that is installed with the preload and is also available on the SSCD that is provided with the system.

A company called Retain-a-Group is a central data warehouse offering serial number data management. Retain-a-Group acts as a focal point to law enforcement. The customer has the option to purchase serial number information

and services from Retain-a-Group. It is the customer's responsibility to maintain the MIF file and to inform Retain-a-Group of any changes to the file.

Some customers may request their servicers to assist them in maintaining the MIF file when serialized components are replaced during hardware service. This assistance is between the customer and the servicer. The servicer can use the DMI MIF Browser to update the MIF information in the EPROM. It is anticipated that some servicers might charge for this service.

To update the EPROM using the DMI MIF Browser, use the following procedure.

1. Click **Start** from the desktop, then **Programs**.
2. Select **IBM SystemView Agent**
3. Select the **Serial Number Information** icon
4. Click the plus sign to expand.
5. Select the component you want to view or edit.
6. Double click on the component you want to change.
7. Enter new data in the *Value* field, then click **Apply**.

## Alert on LAN

Alert on LAN provides notification of changes in the computer, even when the computer power is turned off. Working with DMI and Wake on LAN<sup>®</sup> technologies, Alert on LAN helps to manage and monitor the hardware and software features of the computer. Alert on LAN generates notifications to the server of these occurrences:

- Computer disconnected from the network
- Computer unplugged from the power outlet
- All POST errors
- Operating system or POST hang condition

Alert on LAN events are configured to be Enabled or Disabled from the LAN server only, and not from the computer. See the LAN administrator for configuration status information.

---

## BIOS levels

An incorrect level of BIOS can cause false errors and unnecessary FRU replacement. Use the following information to determine the current level of BIOS installed in the computer, the latest BIOS available for the computer, and where to obtain the latest level of BIOS.

- Current Level BIOS information
  - Run the Configuration Utility to determine the level of BIOS installed.
- Sources for determining the latest level BIOS available
  1. IBM PC Company Home Page  
<http://www.ibm.com/pc/us/>
  2. PC PartnerInfo-Technical Database (CTSTIPS.NSF)
  3. HelpCenter<sup>®</sup>
  4. Levels 1 and 2 Support
  5. RETAIN<sup>®</sup>
- Sources for obtaining the latest level BIOS available
  1. IBM PC Company Home Page

- <http://www.ibm.com/pc/us/>
2. PC PartnerInfo-Technical Database (CTSTIPS.NSF)
  3. HelpCenter
  4. Levels 1 and 2 Support

To update (flash) the BIOS, see “Flash (BIOS/VPD) update procedure” on page 200.

---

## Flash (BIOS/VPD) update procedure

**Attention:**

Refer to the information label located inside the system unit cover for any model-specific information.

1. Power-off the computer.
2. Insert the flash update diskette into drive A.
3. Power-on the computer.
4. When the Update Utility appears; select the country/keyboard, then press **Enter**.
5. If the computer serial number was previously recorded, the number is displayed with an option to update it. Press **Y** to update the serial number.
6. Type the 7-digit serial number of the computer you are servicing, then press **Enter**.
7. Follow the instructions on the screen to complete the flash (BIOS/VPD) update procedure.

---

## Flash recovery boot block jumper

**Attention:**

If an interruption occurs during a Flash/BIOS upgrade, the BIOS might be left in an unusable state. The Boot Block jumper enables you to restart the system and recover the BIOS.

To perform a Flash/BIOS recovery using the Virtual clear CMOS/BIOS recovery jumper, use the following procedure.

1. Power-off the computer and remove the cover.
2. Move the system board Virtual clear CMOS/BIOS recovery jumper to the **ROM recovery** position. Refer to “Identifying parts on the system board - small desktop model” on page 27 or the label inside the computer for more information.
3. Insert the upgrade diskette into the diskette drive.
4. Power-on the computer. The IBM Logo will appear.
5. When the Flash Update Utility appears, select the country/keyboard, then press **Enter**.
6. If the computer serial number was previously recorded, the number is displayed with an option to update it. Press **Y** to update the serial number.
7. Type the 7-digit serial number of the computer you are servicing, then press **Enter**.

8. Follow the instructions on the screen to complete the flash (BIOS/VPD) update procedure.
9. When you are instructed to reboot the computer, power-off the computer and move the recovery jumper to the **normal** position. Then replace the cover and power-on the computer.

---

## Power management

Power management reduces the power consumption of certain components of the computer such as the system power supply, processor, hard disk drives, and some monitors. Advanced Power Management and Rapid Resume™ Manager are features of some personal computers.

### Automatic configuration and power interface (ACPI) BIOS

Being an ACPI BIOS system, the operating system is allowed to control the power management features of the computer and the setting for Advanced Power Management (APM) BIOS mode are ignored. Not all operating systems support ACPI BIOS mode.

### Advanced Power Management

Energy-saving settings can be viewed and changed by using the Advanced Power Management menu in the Configuration/Setup Utility program.

**Attention:**

If a device, such as a monitor, does not have power-management capabilities, it can be damaged when exposed to a reduced-power state. Before making energy-saving selections for the monitor, check the documentation supplied with the monitor to see if it supports Display Power Management Signaling (DPMS).

### Automatic Hardware Power Management features

Automatic Hardware Power Management can reduce the power states of the computer, processor, and monitor (if the monitor supports DPMS) if they are inactive for a predetermined length of time.

There are three levels of specified time that the computer must be inactive before the power management options that are selected take effect. Select the amount of time that is offered within each level.

<b>Level 1</b>	Set time from 5 minutes to 4 hours.
<b>Level 2</b>	Set time from 10 minutes to 5 hours.
<b>Level 3</b>	Set time from 15 minutes to 6 hours.

At each level, you can define the amount of energy savings by specifying values for the following options.

•

**System Power**

- Select **On** for the computer to remain on.
- Select **Off** for the computer to shut down.

•

**Processor Speed**

Set the microprocessor to be **disabled**, or to run at **1, 10, 25, or 50** percent of its internal clock speed.

•

**Display**

Set display to be disabled or to be reduced at these power states:

- **Standby:** Screen is blank, but can be restored immediately when any activity is detected.
- **Suspend:** Monitor uses less power than in Standby mode. Screen image is restored after a few seconds when any activity is detected.
- **Off:** Monitor power is off. Press Monitor power button to restore power. On some monitors, you might have to depress the power button twice.

## Setting Automatic Hardware Power Management features

1. Start the Configuration/Setup Utility program (see “Setup Utility program” on page 10).
2. Select **Advanced Power Management** from the Configuration/Setup Utility program menu.
3. Select the **APM BIOS Mode** and be sure it is set to **Enabled**. If it is not, press Left Arrow (←) or Right Arrow (→) to change the setting.
4. Select **Automatic Hardware Power Management**.
5. Set **Automatic Hardware Power Management** to **Enabled**.
6. Select values for the three categories of power management (system power, processor speed, and display), as necessary.
7. Set **Hard Disk** to **Enabled** or **Disabled**.

**Note:** This does not apply to SCSI drives.

8. Press **Esc** twice to return to the Configuration/Setup Utility program menu.
9. Before you exit from the program, select **Save Settings** from the Configuration/Setup Utility program menu.
10. To exit from the Configuration/Setup Utility program, press **Esc** and follow the instructions on the screen.

## Automatic Power-On features

The Automatic Power-On features within the Power Management menu allow you to enable and disable features that turn on the computer automatically.

- **Serial Port A Ring Detect:** With this feature set to **Enabled** and an external modem connected to serial port (COM1), the computer will turn on automatically when a ring is detected on the modem.
- **PCI Modem Ring Detect:** With this feature set to **Enabled**, the computer will turn on automatically when a ring is detected on the internal modem.
- **PCI Wake Up:** This feature allow PCI cards that support this capability to wake the system.
- **Wake Up on Alarm:** You can specify a date and time at which the computer will be turned on automatically. This can be either a single event or a daily event.
- **Wake on LAN:** If the computer has a properly configured token-ring or Ethernet LAN adapter card that is Wake on LAN-enabled and there is remote network management software, you can use the IBM-developed Wake on LAN feature. When you set Wake on LAN to **Enabled**, the computer will turn on when it receives a specific signal from another computer on the local area network (LAN). For further information, see “Wake on LAN” on page 205.

---

## Network settings

This section applies only to computers that are linked to a network.

The Configuration/Setup Utility program includes settings that can be enabled and disabled to configure the network interface in the computer. These settings are the following:

- Flash over LAN (Update POST/BIOS over Network)
- Wake on LAN

### Flash over LAN (update POST/BIOS over network)

**Note:** For local Flash (BIOS/VPD) update, see “Flash (BIOS/VPD) update procedure” on page 200.

This setting is used to enable or disable the Flash over LAN feature. When the feature is enabled, the system programs, in the computer, can be updated remotely from a network server. If the administrator password is set in the computer, it does not have to be entered by the server.

To access the Flash over LAN setting, use the following procedure.

1. Start the Configuration/Setup Utility program. See “Setup Utility program” on page 10.
2. Select **System Security**.
3. Select **POST/BIOS Update** from the Configuration/Setup Utility program menu.
4. To enable Flash over LAN, select **Enabled**. To disable Flash over LAN, select **Disabled**.
5. Press **Esc** twice to return to the Configuration/Setup Utility program menu.
6. Before you exit from the program, select **Save Settings** from the Configuration/Setup Utility program menu.
7. To exit from the Configuration/Setup Utility program, press **Esc** and follow the instructions on the screen.

## Wake on LAN

This setting is used to enable or disable the IBM-developed Wake on LAN feature. This feature makes it possible for the computer to be turned on remotely by a network server. Remote network management software must be used in conjunction with this feature.

To access the Wake on LAN setting, use the following procedure.

1. Start the Configuration/Setup Utility program. See “Setup Utility program” on page 10.
2. Select **Advanced Power Management**.
3. Select **Automatic Power On** from the program menu.
4. Select **Wake on LAN** from the *Automatic Power On* menu.
5. To enable Wake on LAN, select **Enabled**. To disable Wake on LAN, select **Disabled**.
6. Press **Esc** until you return to the Configuration/Setup Utility program menu.
7. Before you exit from the program, select **Save Settings** from the Configuration/Setup Utility program menu.
8. To exit from the Configuration/Setup Utility program, press **Esc** and follow the instructions on the screen.

---

## Chapter 9. Related service information

**Note:** The service procedures are designed to help you isolate problems. They are written with the assumption that you have model-specific training on all computers, or that are familiar with the computers, functions, terminology, and service information provided in this manual.

---

### Safety information

The following section contains the safety information that you need to be familiar with before servicing an IBM mobile computer.

#### General safety

Follow these rules to ensure general safety:

- Observe good housekeeping in the area of the machines during and after maintenance.
- When lifting any heavy object:
  1. Ensure you can stand safely without slipping.
  2. Distribute the weight of the object equally between your feet.
  3. Use a slow lifting force. Never move suddenly or twist when you attempt to lift.
  4. Lift by standing or by pushing up with your leg muscles; this action removes the strain from the muscles in your back. *Do not attempt to lift any objects that weigh more than 16 kg (35 lb) or objects that you think are too heavy for you.*
- Do not perform any action that causes hazards to the customer, or that makes the equipment unsafe.
- Before you start the machine, ensure that other service representatives and the customer's personnel are not in a hazardous position.
- Place removed covers and other parts in a safe place, away from all personnel, while you are servicing the machine.
- Keep your tool case away from walk areas so that other people will not trip over it.
- Do not wear loose clothing that can be trapped in the moving parts of a machine. Ensure that your sleeves are fastened or rolled up above your elbows. If your hair is long, fasten it.
- Insert the ends of your necktie or scarf inside clothing or fasten it with a nonconductive clip, approximately 8 centimeters (3 inches) from the end.
- Do not wear jewelry, chains, metal-frame eyeglasses, or metal fasteners for your clothing.

**Remember:** Metal objects are good electrical conductors.
- Wear safety glasses when you are: hammering, drilling soldering, cutting wire, attaching springs, using solvents, or working in any other conditions that might be hazardous to your eyes.
- After service, reinstall all safety shields, guards, labels, and ground wires. Replace any safety device that is worn or defective.
- Reinstall all covers correctly before returning the machine to the customer.

## Electrical safety

### CAUTION:

Electrical current from power, telephone, and communication cables can be hazardous. To avoid personal injury or equipment damage, disconnect the attached power cords, telecommunication systems, networks, and modems before you open the server/workstation covers, unless instructed otherwise in the installation and configuration procedures.

Observe the following rules when working on electrical equipment.

**Important:** Use only approved tools and test equipment. Some hand tools have handles covered with a soft material that does not insulate you when working with live electrical currents.

Many customers have, near their equipment, rubber floor mats that contain small conductive fibers to decrease electrostatic discharges. Do not use this type of mat to protect yourself from electrical shock.

- Find the room emergency power-off (EPO) switch, disconnecting switch, or electrical outlet. If an electrical accident occurs, you can then operate the switch or unplug the power cord quickly.
- Do not work alone under hazardous conditions or near equipment that has hazardous voltages.
- Disconnect all power before:
  - Performing a mechanical inspection
  - Working near power supplies
  - Removing or installing main units
- Before you start to work on the machine, unplug the power cord. If you cannot unplug it, ask the customer to power-off the wall box that supplies power to the machine and to lock the wall box in the off position.
- If you need to work on a machine that has exposed electrical circuits, observe the following precautions:
  - Ensure that another person, familiar with the power-off controls, is near you.  
**Remember:** Another person must be there to switch off the power, if necessary.
  - Use only one hand when working with powered-on electrical equipment; keep the other hand in your pocket or behind your back.  
**Remember:** There must be a complete circuit to cause electrical shock. By observing the above rule, you may prevent a current from passing through your body.
  - When using testers, set the controls correctly and use the approved probe leads and accessories for that tester.
  - Stand on suitable rubber mats (obtained locally, if necessary) to insulate you from grounds such as metal floor strips and machine frames.

Observe the special safety precautions when you work with very high voltages; these instructions are in the safety sections of maintenance information. Use extreme care when measuring high voltages.

- Regularly inspect and maintain your electrical hand tools for safe operational condition.
- Do not use worn or broken tools and testers.
- *Never assume* that power has been disconnected from a circuit. First, *check* that it has been powered-off.
- Always look carefully for possible hazards in your work area. Examples of these hazards are moist floors, nongrounded power extension cables, power surges, and missing safety grounds.
- Do not touch live electrical circuits with the reflective surface of a plastic dental mirror. The surface is conductive; such touching can cause personal injury and machine damage.
- Do not service the following parts with the power on when they are removed from their normal operating places in a machine:
  - Power supply units
  - Pumps
  - Blowers and fans
  - Motor generators

and similar units. (This practice ensures correct grounding of the units.)

- If an electrical accident occurs:
  - Use caution; do not become a victim yourself.
  - Switch off power.
  - Send another person to get medical aid.

## Safety inspection guide

The intent of this inspection guide is to assist you in identifying potentially unsafe conditions on these products. Each machine, as it was designed and built, had required safety items installed to protect users and service personnel from injury. This guide addresses only those items. However, good judgment should be used to identify potential safety hazards due to attachment of non-IBM features or options not covered by this inspection guide.

If any unsafe conditions are present, you must determine how serious the apparent hazard could be and whether you can continue without first correcting the problem.

Consider these conditions and the safety hazards they present:

- Electrical hazards, especially primary power (primary voltage on the frame can cause serious or fatal electrical shock).
- Explosive hazards, such as a damaged CRT face or bulging capacitor
- Mechanical hazards, such as loose or missing hardware

The guide consists of a series of steps presented in a checklist. Begin the checks with the power off, and the power cord disconnected.

Checklist:

1. Check exterior covers for damage (loose, broken, or sharp edges).
2. Power-off the computer. Disconnect the power cord.

3. Check the power cord for:
  - a. A third-wire ground connector in good condition. Use a meter to measure third-wire ground continuity for 0.1 ohm or less between the external ground pin and frame ground.
  - b. The power cord should be the appropriate type as specified in the parts listings.
  - c. Insulation must not be frayed or worn.
4. Remove the cover.
5. Check for any obvious non-IBM alterations. Use good judgment as to the safety of any non-IBM alterations.
6. Check inside the unit for any obvious unsafe conditions, such as metal filings, contamination, water or other liquids, or signs of fire or smoke damage.
7. Check for worn, frayed, or pinched cables.
8. Check that the power-supply cover fasteners (screws or rivets) have not been removed or tampered with.

## Handling electrostatic discharge-sensitive devices

Any computer part containing transistors or integrated circuits (ICs) should be considered sensitive to electrostatic discharge (ESD). ESD damage can occur when there is a difference in charge between objects. Protect against ESD damage by equalizing the charge so that the machine, the part, the work mat, and the person handling the part are all at the same charge.

### Notes:

1. Use product-specific ESD procedures when they exceed the requirements noted here.
2. Make sure that the ESD protective devices you use have been certified (ISO 9000) as fully effective.

When handling ESD-sensitive parts:

- Keep the parts in protective packages until they are inserted into the product.
- Avoid contact with other people.
- Wear a grounded wrist strap against your skin to eliminate static on your body.
- Prevent the part from touching your clothing. Most clothing is insulative and retains a charge even when you are wearing a wrist strap.
- Use the black side of a grounded work mat to provide a static-free work surface. The mat is especially useful when handling ESD-sensitive devices.
- Select a grounding system, such as those listed below, to provide protection that meets the specific service requirement.

**Note:** The use of a grounding system is desirable but not required to protect against ESD damage.

- Attach the ESD ground clip to any frame ground, ground braid, or green-wire ground.
- Use an ESD common ground or reference point when working on a double-insulated or battery-operated system. You can use coax or connector-outside shells on these systems.
- Use the round ground-prong of the ac plug on ac-operated computers.

## Grounding requirements

Electrical grounding of the computer is required for operator safety and correct system function. Proper grounding of the electrical outlet can be verified by a certified electrician.

## Safety notices (multi-lingual translations)

The caution and danger safety notices in this section are provided in the following languages:

- English
- Brazilian/Portuguese
- Chinese
- French
- German
- Italian
- Korean
- Spanish

**Important:** All caution and danger statements in this IBM documentation begin with a number. This number is used to cross reference an English caution or danger statement with translated versions of the caution or danger statement in this section.

For example, if a caution statement begins with a number 1, translations for that caution statement appear in this section under statement 1.

Be sure to read all caution and danger statements before performing any of the instructions.

- Statement 1

### DANGER

Electrical current from power, telephone and communication cables is hazardous.

**To avoid a shock hazard:**

- **Do not connect or disconnect any cables or perform installation, maintenance, or reconfiguration of this product during an electrical storm.**
- **Connect all power cords to a properly wired and grounded electrical outlet.**
- **Connect to properly wired outlets any equipment that will be attached to this product.**
- **When possible, use one hand only to connect or disconnect signal cables.**
- **Never turn on any equipment when there is evidence of fire, water, or structural damage.**
- **Disconnect the attached power cords, telecommunications systems, networks, and modems before you open the device covers, unless instructed otherwise in the installation and configuration procedures.**

- Connect and disconnect cables as described in the following table when installing, moving, or opening covers on this product or attached devices.

To Connect	To Disconnect
<ol style="list-style-type: none"> <li>1. Turn everything OFF.</li> <li>2. First, attach all cables to devices.</li> <li>3. Attach signal cables to connectors.</li> <li>4. Attach power cords to outlet.</li> <li>5. Turn device ON.</li> </ol>	<ol style="list-style-type: none"> <li>1. Turn everything OFF.</li> <li>2. First, remove power cords from outlet.</li> <li>3. Remove signal cables from connectors.</li> <li>4. Remove all cables from devices.</li> </ol>

- Statement 2

**CAUTION:**

When replacing the lithium battery, use only IBM Part Number 33F8354 or an equivalent type battery recommended by the manufacturer. If your system has a module containing a lithium battery, replace it only with the same module type made by the same manufacturer. The battery contains lithium and can explode if not properly used, handled, or disposed of.

*Do not:*

- Throw or immerse into water
- Heat to more than 100°C (212°F)
- Repair or disassemble

Dispose of the battery as required by local ordinances or regulations.

- Statement 3

**CAUTION:**

When laser products (such as CD-ROMs, DVD-ROM drives, fiber optic devices, or transmitters) are installed, note the following:

- Do not remove the covers. Removing the covers of the laser product could result in exposure to hazardous laser radiation. There are no serviceable parts inside the device.
- Use of controls or adjustments or performance of procedures other than those specified herein might result in hazardous radiation exposure.

**DANGER:** Some laser products contain an embedded Class 3A or Class 3B laser diode. Note the following:

Laser radiation when open. Do not stare into the beam, do not view directly with optical instruments, and avoid direct exposure to the beam.

- Statement 4

≥18 kg (37 lbs)

≥32 kg (70.5 lbs)

≥55 kg (121.2 lbs)

**CAUTION:**  
Use safe practices when lifting.

- Statement 5

**CAUTION:**

The power control button on the device and the power switch on the power supply do not turn off the electrical current supplied to the device. The device also might have more than one power cord. To remove all electrical current from the device, ensure that all power cords are disconnected from the power source.

- Statement 10

**CAUTION:**

Do not place any object weighing more than 82 kg (180 lbs.) on top of rack-mounted devices.

### Importante:

Todas as instruções de cuidado e perigo da IBM documentation começam com um número. Este número é utilizado para fazer referência cruzada de uma instrução de cuidado ou perigo no idioma inglês com as versões traduzidas das instruções de cuidado ou perigo encontradas nesta seção.

Por exemplo, se uma instrução de cuidado é iniciada com o número 1, as traduções para aquela instrução de cuidado aparecem nesta seção sob a instrução 1.

Certifique-se de ler todas as instruções de cuidado e perigo antes de executar qualquer operação.

Instrução 1

### PERIGO

A corrente elétrica proveniente de cabos de alimentação, de telefone e de comunicações é perigosa.

Para evitar risco de choque:

- Não conecte ou desconecte cabos e não realize instalação, manutenção ou reconfiguração deste produto durante uma tempestade com raios.
- Conecte todos os cabos de alimentação a tomadas elétricas corretamente instaladas e aterradas.
- Conecte todos os equipamentos ao qual esse produto será conectado a tomadas corretamente instaladas.
- Sempre que possível, utilize apenas uma das mãos para conectar ou desconectar cabos de sinal.
- Nunca ligue qualquer equipamento quando existir evidência de danos por fogo, água ou na estrutura.
- Desconecte cabos de alimentação, sistemas de telecomunicação, redes e modems antes de abrir as tampas dos dispositivos, a menos que especificado de maneira diferente nos procedimentos de instalação e configuração.
- Conecte e desconecte cabos conforme descrito na seguinte tabela, ao instalar ou movimentar este produto ou os dispositivos conectados, ou ao abrir suas tampas.

Para Conectar:	Para Desconectar:
<ol style="list-style-type: none"><li>1. DESLIGUE Tudo.</li><li>2. Primeiramente, conecte todos os cabos aos dispositivos.</li><li>3. Conecte os cabos de sinal aos conectores.</li><li>4. Conecte os cabos de alimentação às tomadas.</li><li>5. LIGUE os dispositivos.</li></ol>	<ol style="list-style-type: none"><li>1. DESLIGUE Tudo.</li><li>2. Primeiramente, remova os cabos de alimentação das tomadas.</li><li>3. Remova os cabos de sinal dos conectores.</li><li>4. Remova todos os cabos dos dispositivos.</li></ol>

## Instrução 2

### **CUIDADO:**

Ao substituir a bateria de lítio, utilize apenas uma bateria IBM, Número de Peça 33F8354 ou uma bateria de tipo equivalente, recomendada pelo fabricante. Se o seu sistema possui um módulo com uma bateria de lítio, substitua-o apenas pelo mesmo tipo de módulo, do mesmo fabricante. A bateria contém lítio e pode explodir se não for utilizada, manuseada e descartada de maneira correta.

Não:

- Jogue ou coloque na água
- Aqueça a mais de 100°C (212°F)
- Conserte nem desmonte

Para descartar a bateria, entre em contato com a área de atendimento a clientes IBM, pelo telefone (011) 889-8986, para obter informações sobre como enviar a bateria pelo correio para a IBM.

## Instrução 3

### **PRECAUCIÓN:**

Quando produtos a laser (unidades de CD-ROM, unidades de DVD, dispositivos de fibra ótica, transmissores, etc.) estiverem instalados, observe o seguinte:

- Não remova as tampas. A remoção das tampas de um produto a laser pode resultar em exposição prejudicial à radiação de laser. Nenhuma peça localizada no interior do dispositivo pode ser consertada.
- A utilização de controles ou ajustes ou a execução de procedimentos diferentes dos especificados aqui pode resultar em exposição prejudicial à radiação.

### **PERIGO**

Alguns produtos a laser contêm um diodo laser da Classe 3A ou Classe 3B embutido. Observe o seguinte:

Radiação de laser quando aberto. Não olhe diretamente para o raio a olho nu ou com instrumentos óticos, e evite exposição direta ao raio.

## Instrução 4

≥18 kg (37 lbs)

≥32 kg (70.5 lbs)

≥55 kg (121.2 lbs)

**CUIDADO:**

Ao levantar a máquina, faça-o com segurança.

Instrução 5

**CUIDADO:**

Os botões Liga/Desliga localizados no dispositivo e na fonte de alimentação não desligam a corrente elétrica fornecida ao dispositivo. O dispositivo também pode ter mais de um cabo de alimentação. Para remover toda a corrente elétrica do dispositivo, assegure que todos os cabos de alimentação estejam desconectados da fonte de energia elétrica.

**CUIDADO:**

Instrução 10

**CUIDADO:**

Não coloque nenhum objeto com peso superior a 82 kg (180 lbs.) sobre dispositivos montados em rack.

## 重要:

Server Library 中的所有提醒和危险条款前都有一个数字标识。该数字是用来交叉引用一个英文的提醒和危险条款及本部分中的与之对应的已翻译成其它文字的提醒和危险条款。

例如, 如果一个提醒条款前的数字为 1, 则本部分中相应的译文也带有标号 1。

在执行任何指示的操作之前, 请确保您已经阅读了全部提醒和危险条款。

### 声明 1

#### 危险

电源、电话和通信电缆中带有危险电流。  
为避免电击:  
雷电期间不要拆接电缆或安装、维修及重新配置本产品。  
将所有电源线连接至正确布线并已安全接地的电源插座上。  
将与本产品连接的所有设备连接至正确布线的插座上。  
尽量只使用单手拆接信号电缆。  
有水、火及结构损坏迹象时, 请勿打开任何设备。  
除非在安装配置过程中有明确指示, 否则, 打开设备机盖前应先断开与电源线、远程通信系统、网络和调制解调器的所有连接。  
安装、移动或打开本产品及其附带设备的机盖时, 应按下表所述连接和断开电缆。

连接时:	断开连接时:
1. 关闭所有设备。	1. 关闭所有设备。
2. 首先将所有电缆连接至设备。	2. 首先从插座中拔出电源线。
3. 将信号电缆连接至接口。	3. 从接口上拔下信号电缆。
4. 将电源线连接至插座。	

## 声明 2

### 警告:

更换锂电池时，只能使用 IBM 产品号 33F8354 或者是厂商推荐的等同类型的电池。

如果系统模块中含有锂电池，则只能使用同一厂商制造的同一类型的模块进行更换。电池中含有锂，如果使用、拿放或处理不当，可能会发生爆炸。

请勿对电池进行下列操作：  
扔入或浸入水电  
加热超过 100 (212 F)  
进行修理或分解  
请按本地法规要求处理电池。

## 声明 3

### 警告:

安装激光产品（如 CD-ROM、DVD 驱动器、光纤设备或送话器）时，应注意以下事项：

不要拆除外盖。拆除激光产品的外盖可能会导致激光辐射的危险，本设备中没有用户可维修的部件。

非此处指定的其它控制、调整或与性能有关的操作都有可能导致激光辐射的危险。

### 危险

某些激光产品中包含内嵌的 3A 级或 3B 级激光二极管。请注意以下事项。

打开时会产生激光辐射。不要直视光束，不要使用光学仪器直接观看光束，避免直接暴露于光束之下。

声明 4

≥18 kg (37 磅)

≥32 kg (70.5 磅)

≥55 kg (121.2 磅)

警告：  
抬起时请采用安全操作方法。

声明 5

警告：

使用设备上的电源控制按钮和电源上的开关都不能断开本设备上的电流。  
另外，本设备可能带有多条电源线。如要断开设备上的所有电流，请确  
保所有电源线均已与电源断开连接。

2

1

声明 6

警告：

如果在电源线连接设备的一端安装了固定松紧夹，则必须将电源线的另一端连接至  
使用方便的电源。

声明 7

警告:

如果设备带有外门，则在移动或抬起设备前应将其拆除或固定以避免造成人员伤害。外门支撑不了设备的重量。

声明 8

警告:

不要拆除电源外盖或贴有下列标签的任何部件。

贴有此标签的组件内部存在高电压、高电流的危险。这些组件中没有用户可维修的部件。如果怀疑其中的部件存在问题，应与服务技术人员联系。

声明 9

警告:

为避免人员伤害，拆除设备上的风扇前应拨下热插拔风扇电缆。

声明 10

警告:

机柜安装的设备上面不能放置重于 82kg (180 磅) 的物品。

> 82 kg (180 磅)

声明 11

警告:

下面的标签表明附近有锋利的边、角或接头。

声明 12

警告:

下面的标签表明附近有高热表面。

## 重要資訊：

**Server Library** 中所有「注意」及「危險」的聲明均以數字開始。此一數字是用來作為交互參考之用，英文「注意」或「危險」聲明可在本節中找到相同內容的「注意」或「危險」聲明的譯文。

例如，有一「危險」聲明以數字 1 開始，則該「危險」聲明的譯文將出現在本節的「聲明」1 中。

執行任何指示之前，請詳讀所有「注意」及「危險」的聲明。

### 聲明 1

#### 危險

電源、電話及通信電纜上所產生的電流均有危險性。

#### 欲避免電擊危險：

- 在雷雨期間，請勿連接或切斷本產品上的任何電纜線，或安裝、維修及重新架構本產品。
- 請將電源線接至接線及接地正確的電源插座。
- 請將本產品隨附的設備連接至接線正確的插座。
- 儘可能使用單手來連接或切斷信號電纜線。
- 當設備有火燒或泡水的痕跡，或有結構性損害時，請勿開啓該設備的電源。
- 在安裝及架構之時，若非非常熟悉，在開啓裝置蓋子之前，請切斷電源線、電信系統、網路及數據機。
- 在安裝、移動本產品或附加裝置，或開啓其蓋子時，請依照下表中「連接」及「切斷」電纜線的步驟執行。

#### 連接：

1. 關閉所有開關。
2. 先將所有電纜線接上裝置。
3. 將信號電纜接上接頭。
4. 再將電源線接上電源插座。
5. 開啓裝置的電源。

#### 切斷：

1. 關閉所有開關。
2. 先自電源插座拔掉電源線。
3. 拔掉接頭上的所有信號電纜。
4. 再拔掉裝置上的所有電纜線。

### 聲明 2

#### 注意：

更換鋰電池時，只可使用 IBM 零件編號 33F8354 的電池，或製造商建議之相當類型的電池。若系統中具有包含鋰電池的模組，在更換此模組時，請使用相同廠商製造的相同模組類型。如未正確使用、處理或丟棄含有鋰的電池時，可能會引發爆炸。

#### 請勿將電池：

- 丟入或浸入水中
- 加熱超過 100 °C (212 °F)
- 修理或拆開

請遵照當地法令規章處理廢棄電池。

### 聲明 3

注意：

安裝雷射產品 (如 CD-ROM、DVD 光碟機、光纖裝置或發射器) 時，請注意下列事項：

- 請勿移開蓋子。移開雷射產品的蓋子，您可能會暴露於危險的雷射輻射之下。裝置中沒有需要維修的組件。
- 不依此處所指示的控制、調整或處理步驟，您可能會暴露於危險的輻射之下。

危險

有些雷射產品含有內嵌式 Class 3A 或 Class 3B 雷射二極體。請注意下列事項：

開啓時會產生雷射輻射。請勿凝視光束，不要使用光學儀器直接觀察，且應避免直接暴露在光束下。

### 聲明 4

≥ 18 公斤 (37 磅)    ≥ 32 公斤 (70.5 磅)    ≥ 55 公斤 (121.2 磅)

注意：

抬起裝置時，請注意安全措施。

### 聲明 5

注意：

裝置上的電源控制按鈕及電源供應器上的電源開關均無法關閉裝置上的電流。

本裝置可能有一條以上的電源線。如要移除裝置上的所有電流，請確認所有電源線已與電源分離。

聲明 10

注意：

請勿將任何重量超過 82 公斤 (180 磅) 的物品置於已安裝機架的裝置上方。

>82 公斤 (180 磅)

## Important:

Toutes les consignes Attention et Danger indiquées dans la bibliothèque IBM documentation sont précédées d'un numéro. Ce dernier permet de mettre en correspondance la consigne en anglais avec ses versions traduites dans la présente section.

Par exemple, si une consigne de type Attention est précédée du chiffre 1, ses traductions sont également précédées du chiffre 1 dans la présente section.

Prenez connaissance de toutes les consignes de type Attention et Danger avant de procéder aux opérations décrites par les instructions.

Notice n<sup>o</sup> 1

## DANGER

Le courant électrique passant dans les câbles de communication, ou les cordons téléphoniques et d'alimentation peut être dangereux.

Pour éviter tout risque de choc électrique:

- Ne manipulez aucun câble et n'effectuez aucune opération d'installation, d'entretien ou de reconfiguration de ce produit au cours d'un orage.
- Branchez tous les cordons d'alimentation sur un socle de prise de courant correctement câblé et mis à la terre.
- Branchez sur des socles de prise de courant correctement câblés tout équipement connecté à ce produit.
- Lorsque cela est possible, n'utilisez qu'une seule main pour connecter ou déconnecter les câbles d'interface.
- Ne mettez jamais un équipement sous tension en cas d'incendie ou d'inondation, ou en présence de dommages matériels.
- Avant de retirer les carters de l'unité, mettez celle-ci hors tension et déconnectez ses cordons d'alimentation, ainsi que les câbles qui la relient aux réseaux, aux systèmes de télécommunication et aux modems (sauf instruction contraire mentionnée dans les procédures d'installation et de configuration).
- Lorsque vous installez ou que vous déplacez le présent produit ou des périphériques qui lui sont raccordés, reportez-vous aux instructions ci-dessous pour connecter et déconnecter les différents cordons.

Connexion	Déconnexion
1. Mettez les unités hors tension.	1. Mettez les unités hors tension.
2. Commencez par brancher tous les cordons sur les unités.	2. Débranchez les cordons d'alimentation des prises.
3. Branchez les câbles d'interface sur des connecteurs.	3. Débranchez les câbles d'interface des connecteurs.
4. Branchez les cordons d'alimentation sur des prises.	4. Débranchez tous les câbles des unités.
5. Mettez les unités sous tension.	

Notice n<sup>o</sup> 2

**ATTENTION:**

Remplacez la pile au lithium usagée par une pile de référence identique exclusivement - voir la référence IBM - ou par une pile équivalente recommandée par le fabricant. Si votre système est doté d'un module contenant une pile au lithium, vous devez le remplacer uniquement par un module identique, produit par le même fabricant. La pile contient du lithium et présente donc un risque d'explosion en cas de mauvaise manipulation ou utilisation.

- Ne la jetez pas à l'eau.
- Ne l'exposez pas à une température supérieure à 100 °C.
- Ne cherchez pas à la réparer ou à la démonter.

Pour la mise au rebut, reportez-vous à la réglementation en vigueur.

Notice n<sup>o</sup> 3

**ATTENTION:**

Si des produits laser sont installés (tels que des unités de CD-ROM ou de DVD, des périphériques contenant des fibres optiques ou des émetteurs-récepteurs), prenez connaissance des informations suivantes:

- N'ouvrez pas ces produits pour éviter une exposition directe au rayon laser. Vous ne pouvez effectuer aucune opération de maintenance à l'intérieur.
- Pour éviter tout risque d'exposition au rayon laser, respectez les consignes de réglage et d'utilisation des commandes, ainsi que les procédures décrites dans le présent document.

**DANGER**

Certains produits laser contiennent une diode laser de classe 3A ou 3B. Prenez connaissance des informations suivantes:

Rayonnement laser lorsque le carter est ouvert. évitez de regarder fixement le faisceau ou de l'observer à l'aide d'instruments optiques. évitez une exposition directe au rayon.

Notice n<sup>o</sup> 4

≥18 kg (37 lbs)

≥32 kg (70.5 lbs)

≥55 kg (121.2 lbs)

**ATTENTION:**

Faites-vous aider pour soulever ce produit.

Notice n<sup>o</sup> 5

**ATTENTION:**

Le bouton de mise sous tension/hors tension de l'unité et l'interrupteur d'alimentation du bloc d'alimentation ne coupent pas l'arrivée de courant électrique à l'intérieur de la machine. Il se peut que votre unité dispose de plusieurs cordons d'alimentation. Pour isoler totalement l'unité du réseau électrique, débranchez tous les cordons d'alimentation des socles de prise de courant.

Notice n<sup>o</sup> 10

**ATTENTION:**

Ne posez pas d'objet dont le poids dépasse 82 kg sur les unités montées en armoire.

## Wichtig:

Alle Sicherheitshinweise in dieser IBM documentation beginnen mit einer Nummer. Diese Nummer verweist auf einen englischen Sicherheitshinweis mit den übersetzten Versionen dieses Hinweises in diesem Abschnitt.

Wenn z. B. ein Sicherheitshinweis mit der Nummer 1 beginnt, so erscheint die Übersetzung für diesen Sicherheitshinweis in diesem Abschnitt unter dem Hinweis 1.

Lesen Sie alle Sicherheitshinweise, bevor Sie eine Anweisung ausführen.

Hinweis 1

## VORSICHT

Elektrische Spannungen von Netz-, Telefon- und Datenübertragungsleitungen sind gefährlich.

Aus Sicherheitsgründen:

- Bei Gewitter an diesem Gerät keine Kabel anschließen oder lösen. Ferner keine Installations-, Wartungs- oder Rekonfigurationsarbeiten durchführen.
- Gerät nur an eine Schutzkontaktsteckdose mit ordnungsgemäß geerdetem Schutzkontakt anschließen.
- Alle angeschlossenen Geräte ebenfalls an Schutzkontaktsteckdosen mit ordnungsgemäß geerdetem Schutzkontakt anschließen.
- Signalkabel möglichst einhändig anschließen oder lösen.
- Keine Geräte einschalten, wenn die Gefahr einer Beschädigung durch Feuer, Wasser oder andere Einflüsse besteht.
- Die Verbindung zu den angeschlossenen Netzkabeln, Telekommunikationssystemen, Netzwerken und Modems ist vor dem Öffnen des Gehäuses zu unterbrechen. Es sei denn, dies ist in den zugehörigen Installations- und Konfigurationsprozeduren anders angegeben.
- Nur nach den nachfolgend aufgeführten Anweisungen arbeiten, die für Installation, Transport oder Öffnen von Gehäusen von Personal Computern oder angeschlossenen Einheiten gelten.

<b>Kabel anschließen:</b>	<b>Kabel lösen:</b>
<ol style="list-style-type: none"><li>1. Alle Geräte ausschalten und Netzstecker ziehen.</li><li>2. Zuerst alle Kabel an Einheiten anschließen.</li><li>3. Signalkabel an Anschlußbuchsen anschließen.</li><li>4. Netzstecker an Steckdose anschließen.</li><li>5. Gerät einschalten.</li></ol>	<ol style="list-style-type: none"><li>1. Alle Geräte ausschalten.</li><li>2. Zuerst Netzstecker von Steckdose lösen.</li><li>3. Signalkabel von Anschlußbuchsen lösen.</li><li>4. Alle Kabel von Einheiten lösen.</li></ol>

#### Hinweis 2

#### **ACHTUNG:**

Eine verbrauchte Batterie nur durch eine Batterie mit der IBM Teilenummer 33F8354 oder durch eine vom Hersteller empfohlene Batterie ersetzen. Wenn Ihr System ein Modul mit einer Lithium-Batterie enthält, ersetzen Sie es immer mit dem selben Modultyp vom selben Hersteller. Die Batterie enthält Lithium und kann bei unsachgemäßer Verwendung, Handhabung oder Entsorgung explodieren.

Die Batterie nicht:

- mit Wasser in Berührung bringen.
- über 100 C erhitzen.
- reparieren oder zerlegen.

Die örtlichen Bestimmungen für die Entsorgung von Sondermüll beachten.

#### Hinweis 3

#### **ACHTUNG:**

Wenn ein Laserprodukt (z. B. CD-ROM-Laufwerke, DVD-Laufwerke, Einheiten mit Glasfaserkabeln oder Transmitter) installiert ist, beachten Sie folgendes.

- Das Entfernen der Abdeckungen des CD-ROM-Laufwerks kann zu gefährlicher Laserstrahlung führen. Es befinden sich keine Teile innerhalb des CD-ROM-Laufwerks, die vom Benutzer gewartet werden müssen. Die Verkleidung des CD-ROM-Laufwerks nicht öffnen.
- Steuer- und Einstellelemente sowie Verfahren nur entsprechend den Anweisungen im vorliegenden Handbuch einsetzen. Andernfalls kann gefährliche Laserstrahlung auftreten.

#### **VORSICHT**

Manche CD-ROM-Laufwerke enthalten eine eingebaute Laserdiode der Klasse 3A oder 3B. Die nachfolgend aufgeführten Punkte beachten.

Laserstrahlung bei geöffneter Tür. Niemals direkt in den Laserstrahl sehen, nicht direkt mit optischen Instrumenten betrachten und den Strahlungsbereich meiden.

#### Hinweis 4

≥18 kg

≥32 kg

≥55 kg

**ACHTUNG:**

Beim Anheben der Maschine die vorgeschriebenen Sicherheitsbestimmungen beachten.

Hinweis 5

**ACHTUNG:**

Mit dem Betriebsspannungsschalter an der Vorderseite des Servers und dem Betriebsspannungsschalter am Netzteil wird die Stromversorgung für den Server nicht unterbrochen. Der Server könnte auch mehr als ein Netzkabel aufweisen. Um die gesamte Stromversorgung des Servers auszuschalten, muß sichergestellt werden, daß alle Netzkabel aus den Netzsteckdosen herausgezogen wurden.

Hinweis 10

**ACHTUNG:**

Keine Gegenstände, die mehr als 82 kg wiegen, auf Rack-Einheiten ablegen.

## Importante:

Tutti gli avvisi di attenzione e di pericolo riportati nella pubblicazione IBM documentation iniziano con un numero. Questo numero viene utilizzato per confrontare avvisi di attenzione o di pericolo in inglese con le versioni tradotte riportate in questa sezione.

Ad esempio, se un avviso di attenzione inizia con il numero 1, la relativa versione tradotta è presente in questa sezione con la stessa numerazione.

Prima di eseguire una qualsiasi istruzione, accertarsi di leggere tutti gli avvisi di attenzione e di pericolo.

Avviso 1

## PERICOLO

La corrente elettrica circolante nei cavi di alimentazione, del telefono e di segnale è pericolosa.

Per evitare il pericolo di scosse elettriche:

- Non collegare o scollegare i cavi, non effettuare l'installazione, la manutenzione o la riconfigurazione di questo prodotto durante i temporali.
- Collegare tutti i cavi di alimentazione ad una presa elettrica correttamente cablata e munita di terra di sicurezza.
- Collegare qualsiasi apparecchiatura collegata a questo prodotto ad una presa elettrica correttamente cablata e munita di terra di sicurezza.
- Quando possibile, collegare o scollegare i cavi di segnale con una sola mano.
- Non accendere qualsiasi apparecchiatura in presenza di fuoco, acqua o se sono presenti danni all'apparecchiatura stessa.
- Scollegare i cavi di alimentazione, i sistemi di telecomunicazioni, le reti e i modem prima di aprire i coperchi delle unità, se non diversamente indicato nelle procedure di installazione e configurazione.
- Collegare e scollegare i cavi come descritto nella seguente tabella quando si effettuano l'installazione, la rimozione o l'apertura dei coperchi di questo prodotto o delle unità collegate.

Per collegare:	Per scollegare:
1. SPEGNERE tutti i dispositivi.	1. SPEGNERE tutti i dispositivi.
2. Collegare prima tutti i cavi alle unità.	2. Rimuovere prima i cavi di alimentazione dalle prese elettriche.
3. Collegare i cavi di segnale ai connettori.	3. Rimuovere i cavi di segnale dai connettori.
4. Collegare i cavi di alimentazione alle prese elettriche.	4. Rimuovere tutti i cavi dalle unità.
5. ACCENDERE le unità.	

#### Avviso 2

#### **ATTENZIONE:**

Quando si sostituisce la batteria al litio, utilizzare solo una batteria IBM con numero parte 33F8354 o batterie dello stesso tipo o di tipo equivalente consigliate dal produttore. Se il sistema di cui si dispone è provvisto di un modulo contenente una batteria al litio, sostituire tale batteria solo con un tipo di modulo uguale a quello fornito dal produttore. La batteria contiene litio e può esplodere se utilizzata, maneggiata o smaltita impropriamente.

Evitare di:

- Gettarla o immergerla in acqua
- Riscaldarla ad una temperatura superiore ai 100°C
- Cercare di ripararla o smontarla

Smaltire secondo la normativa in vigore (D.Lgs 22 del 5/2/9) e successive disposizioni nazionali e locali.

#### Avviso 3

#### **ATTENZIONE:**

Quando si installano prodotti laser come, ad esempio, le unità DVD, CD-ROM, a fibre ottiche o trasmettitori, prestare attenzione a quanto segue:

- Non rimuovere i coperchi. L'apertura dei coperchi di prodotti laser può determinare l'esposizione a radiazioni laser pericolose. All'interno delle unità non vi sono parti su cui effettuare l'assistenza tecnica.
- L'utilizzo di controlli, regolazioni o l'esecuzione di procedure non descritti nel presente manuale possono provocare l'esposizione a radiazioni pericolose.

#### **PERICOLO**

Alcuni prodotti laser contengono all'interno un diodo laser di Classe 3A o Classe 3B. Prestare attenzione a quanto segue:

Aperto l'unità vengono emesse radiazioni laser. Non fissare il fascio, non guardarlo direttamente con strumenti ottici ed evitare l'esposizione diretta al fascio.

#### Avviso 4

**ATTENZIONE:**

Durante il sollevamento della macchina seguire delle norme di sicurezza.

Avviso 5

**ATTENZIONE:**

Il pulsante del controllo dell'alimentazione situato sull'unità e l'interruttore di alimentazione posto sull'alimentatore non disattiva la corrente elettrica fornita all'unità. L'unità potrebbe disporre di più di un cavo di alimentazione. Per disattivare la corrente elettrica dall'unità, accertarsi che tutti i cavi di alimentazione siano scollegati dalla sorgente di alimentazione.

Avviso 10

**ATTENZIONE:**

Non poggiare oggetti che pesano più di 82 kg sulla parte superiore delle unità montate in rack.

## 중요:

본 *Server Library*에 있는 모든 주의 및 위험 경고문은 번호로 시작합니다. 이 번호는 영문 주의 혹은 위험 경고문과 이 절에 나오는 번역된 버전의 주의 혹은 위험 경고문을 상호 참조하는 데 사용됩니다.

예를 들어, 주의 경고문이 번호 1로 시작하면, 번역된 해당 주의 경고문을 본 절의 경고문 1에서 찾아볼 수 있습니다.

모든 지시사항을 수행하기 전에 반드시 모든 주의 및 위험 경고문을 읽으십시오.

### 경고문 1

위험

전원, 전하 및 통신 케이블로부터 흘러 나오는 전류는 위험합니다.

전기 충격을 피하려면:

- 뇌우를 동반할 때는 케이블의 연결이나 철수, 이 제품의 설치, 유지보수 또는 재구성을 하지 마십시오.
- 모든 전원 코드를 적절히 배선 및 접지해야 합니다.
- 이 제품에 연결될 모든 장비를 적절하게 배선된 콘센트에 연결하십시오.
- 가능한 한 신호 케이블을 한 손으로 연결하거나 끊으십시오.
- 화재, 수해 또는 구조상의 손상이 있을 경우 장비를 켜지 마십시오.
- 설치 및 구성 프로시저에 다른 설명이 없는 한, 장치 덮개를 열기 전에 연결된 전원 코드, 원격 리 통신 시스템, 네트워크 및 모뎀을 끊어 주십시오.
- 제품 또는 접속된 장치를 설치, 이동 및 덮개를 열 때 다음 설명에 따라 케이블을 연결하거나 끊도록 하십시오.

연결하려면:

1. 모든 스위치를 끕니다.
2. 먼저 모든 케이블을 장치에 연결합니다.
3. 신호 케이블을 커넥터에 연결합니다.
4. 콘센트에 전원 코드를 연결합니다.
5. 장치 스위치를 켭니다.

연결을 끊으려면:

1. 모든 스위치를 끕니다.
2. 먼저 콘센트에서 전원 코드를 뽑습니다.
3. 신호 케이블을 커넥터에서 제거합니다.
4. 장치에서 모든 케이블을 제거합니다.

### 경고문 2

주의:

리튬 배터리를 교체할 때는 IBM 부품 번호 33F8354 또는 제조업체에서 권장하는 동등한 유형의 배터리를 사용하십시오. 시스템에 리튬 배터리를 갖고 있는 모듈이 있으면 동일한 제조업체에서 생산된 동일한 모듈 유형으로 교체하십시오. 배터리에 리튬이 있을 경우 제대로 사용, 처리 또는 처분하지 않으면 폭발할 수 있습니다.

다음은 주의하십시오.

- 던지거나 물에 담그지 않도록 하십시오.
- 100°C(212°F) 이상으로 가열하지 마십시오.
- 수리하거나 분해하지 마십시오.

지역 법령이나 규정의 요구에 따라 배터리를 처분하십시오.

경고문 3

주의:

레이저 제품(CD-ROMs, DVD 드라이브, 광 장치 또는 트랜스미터 등과 같은)이 설치되어 있을 경우 다음을 유의하십시오.

- 덮개를 제거하지 마십시오. 레이저 제품의 덮개를 제거했을 경우 위험한 레이저 광선에 노출될 수 있습니다. 이 장치 안에는 서비스를 받을 수 있는 부품이 없습니다.

- 여기에서 지정하지 않은 방식의 제어, 조절 또는 실행으로 인해 위험한 레이저 광선에 노출될 수 있습니다.

위험

일부 레이저 제품에는 클래스 3A 또는 클래스 3B 레이저 다이오드가 들어 있습니다. 다음을 주의하십시오.

열면 레이저 광선에 노출됩니다. 광선을 주시하거나 광학 기계를 직접 쳐다보지 않도록 하고 광선에 노출되지 않도록 하십시오.

경고문 4

≥18 kg (37 lbs)

≥ 32 kg (70.5 lbs)

≥ 55 kg (121.2 lbs)

주의:

기계를 들 때는 안전하게 들어 올리십시오.

경고문 5

주의:

장치의 전원 제어 버튼 및 전원 공급기의 전원 스위치는 장치에 공급되는 전류를 차단하지 않습니다. 장치에 둘 이상의 전원 코드가 연결되어 있을 수도 있습니다. 장치에서 모든 전류를 차단하려면 모든 전원 코드가 전원으로부터 차단되어 있는지 확인하십시오.

경고문 10

주의:

서랍형 모델의 장치 상단에 82 kg(180 lbs.)이 넘는 물체를 올려 놓지 마십시오.

>82 kg (180 lbs)

### Importante:

Todas las declaraciones de precaución de esta IBM documentation empiezan con un número. Dicho número se emplea para establecer una referencia cruzada de una declaración de precaución o peligro en inglés con las versiones traducidas que de dichas declaraciones pueden encontrarse en esta sección.

Por ejemplo, si una declaración de peligro empieza con el número 1, las traducciones de esta declaración de precaución aparecen en esta sección bajo Declaración 1.

Lea atentamente todas las declaraciones de precaución y peligro antes de llevar a cabo cualquier operación.

#### Declaración 1

### PELIGRO

La corriente eléctrica de los cables telefónicos, de alimentación y de comunicaciones es perjudicial.

Para evitar una descarga eléctrica:

- No conecte ni desconecte ningún cable ni realice las operaciones de instalación, mantenimiento o reconfiguración de este producto durante una tormenta.
- Conecte cada cable de alimentación a una toma de alimentación eléctrica con conexión a tierra y cableado correctos.
- Conecte a tomas de alimentación con un cableado correcto cualquier equipo que vaya a estar conectado a este producto.
- Si es posible, utilice una sola mano cuando conecte o desconecte los cables de señal.
- No encienda nunca un equipo cuando haya riesgos de incendio, de inundación o de daños estructurales.
- Desconecte los cables de alimentación, sistemas de telecomunicaciones, redes y módems conectados antes de abrir las cubiertas del dispositivo a menos que se indique lo contrario en los procedimientos de instalación y configuración.
- Conecte y desconecte los cables tal como se describe en la tabla siguiente cuando desee realizar una operación de instalación, de traslado o de apertura de las cubiertas para este producto o para los dispositivos conectados.

Para la conexión	Para la desconexión
<ol style="list-style-type: none"><li>1. APÁGUELO todo.</li><li>2. En primer lugar, conecte los cables a los dispositivos.</li><li>3. Conecte los cables de señal a los conectores.</li><li>4. Conecte cada cable de alimentación a la toma de alimentación.</li><li>5. ENCIENDA el dispositivo.</li></ol>	<ol style="list-style-type: none"><li>1. APÁGUELO todo.</li><li>2. En primer lugar, retire cada cable de alimentación de la toma de alimentación.</li><li>3. Retire los cables de señal de los conectores.</li><li>4. Retire los cables de los dispositivos.</li></ol>

## Declaración 2

### PRECAUCIÓN:

Cuando desee sustituir la batería de litio, utilice únicamente el número de pieza 33F8354 de IBM o cualquier tipo de batería equivalente que recomiende el fabricante. Si el sistema tiene un módulo que contiene una batería de litio, sustitúyalo únicamente por el mismo tipo de módulo, que ha de estar creado por el mismo fabricante. La batería contiene litio y puede explotar si el usuario no la utiliza ni la maneja de forma adecuada o si no se desprende de la misma como corresponde.

No realice las acciones siguientes:

- Arrojarla al agua o sumergirla
- Calentarla a una temperatura que supere los 100°C (212°F)
- Repararla o desmontarla

Despréndase de la batería siguiendo los requisitos que exija el reglamento o la legislación local.

## Declaración 3

### PRECAUCIÓN:

Cuando instale productos láser (como, por ejemplo, CD-ROM, unidades DVD, dispositivos de fibra óptica o transmisores), tenga en cuenta las advertencias siguientes:

- No retire las cubiertas. Si retira las cubiertas del producto láser, puede quedar expuesto a radiación láser perjudicial. Dentro del dispositivo no existe ninguna pieza que requiera mantenimiento.
- El uso de controles o ajustes o la realización de procedimientos que no sean los que se han especificado aquí pueden dar como resultado una exposición perjudicial a las radiaciones.

### PELIGRO

Algunos productos láser contienen un diodo de láser incorporado de Clase 3A o de Clase 3B. Tenga en cuenta la advertencia siguiente.

Cuando se abre, hay radiación láser. No mire fijamente el rayo ni lleve a cabo ningún examen directamente con instrumentos ópticos; evite la exposición directa al rayo.

#### Declaración 4

≥18 kg

≥32 kg

≥55 kg

#### PRECAUCIÓN:

Tome medidas de seguridad al levantar el producto.

#### Declaración 5

#### PRECAUCIÓN:

El botón de control de alimentación del dispositivo y el interruptor de alimentación de la fuente de alimentación no apagan la corriente eléctrica suministrada al dispositivo. Es posible también que el dispositivo tenga más de un cable de alimentación. Para eliminar la corriente eléctrica del dispositivo, asegúrese de desconectar todos los cables de alimentación de la fuente de alimentación.

#### Declaración 10

#### PRECAUCIÓN:

No coloque ningún objeto que pese más de 82 kg (180 libras) encima de los dispositivos montados en bastidor.

---

## Problem determination tips

Due to the variety of hardware and software combinations that can be encountered, use the following information to assist you in problem determination. If possible, have this information available when requesting assistance from Service Support and Engineering functions.

- Machine type and model
- Processor or hard disk upgrades
- Failure symptom
  - Do diagnostics fail?
  - What, when, where, single, or multiple systems?
  - Is the failure repeatable?
  - Has this configuration ever worked?
  - If it has been working, what changes were made prior to it failing?
  - Is this the original reported failure?
- Reference/Diagnostics version
  - Type and version level
- Hardware configuration
  - Print (print screen) configuration currently in use
  - BIOS level
- Operating system software
  - Type and version level

**Note:** To eliminate confusion, identical systems are considered identical only if they:

1. Are the exact machine type and models
2. Have the same BIOS level
3. Have the same adapters/attachments in the same locations
4. Have the same address jumpers/terminators/cabling
5. Have the same software versions and levels
6. Have the same Reference/Diagnostics Diskette (version)
7. Have the same configuration options set in the system
8. Have the same setup for the operation system control files

Comparing the configuration and software set-up between "working and non-working" systems will often lead to problem resolution.
