Positioning Brackets

Two brackets are provided for locating the enclosure and acoustically coupling the enclosure to the vehicle. Because of the small size of the enclosure, and the extreme moving mass of the driver and radiator, it is possible for the enclosure to move out of phase with the driver, resulting in a dramatic loss of output. Use of the positioning brackets will ensure maximum output.

Warning: Make sure that the enclosure is securely mounted in such a way as to not shift or fly forward in the event of an accident or sudden stop. This product should be professionally installed by an authorized Boston Acoustics dealer.
