# SCIENTIFIC CALCULATORS

**Scientific Calculator** Tools for the classroom, the research laboratory, and everywhere in between.  
**Financial Consultant** Quick solutions to complex financial calculations at your fingertips.

**ClassPad 300PLUS**

### New Crisp & Clear Display

CASIO's new ClassPad 300PLUS incorporates an impressive bold-type font and a crisp & clear display that provides almost double the character-visibility of the previous model.

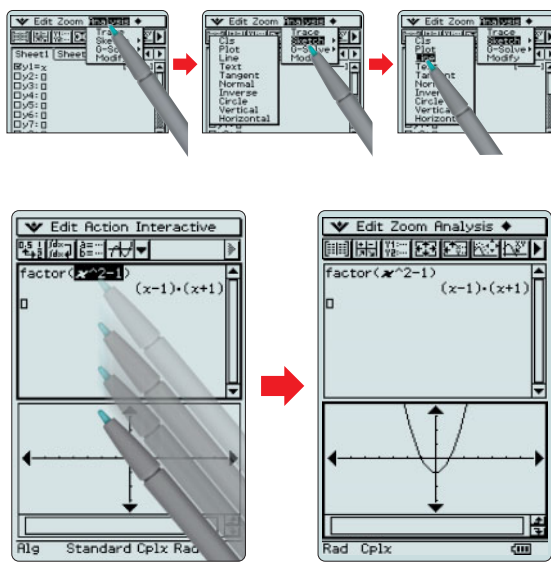

### Big Display

The ClassPad 300PLUS features a large 160 by 240-dot LCD that enables easy and definite entering of data and selection of menu commands with the stylus.

### Pen Touch Operation

Various commands can be selected from the pull-down menu using the stylus. Also, you can use the Drag & Drop or Copy & Paste functions for efficient operations.

### Soft Keyboard

The Soft Keyboard is very efficient for entering various commands or entering complex expressions in natural display format, and it makes the input operations remarkably simple. With this function, it is unnecessary to follow the complicated input method unique to conventional scientific calculators. The ClassPad 300PLUS provides Soft Keyboards of four different display types.

### Natural Input

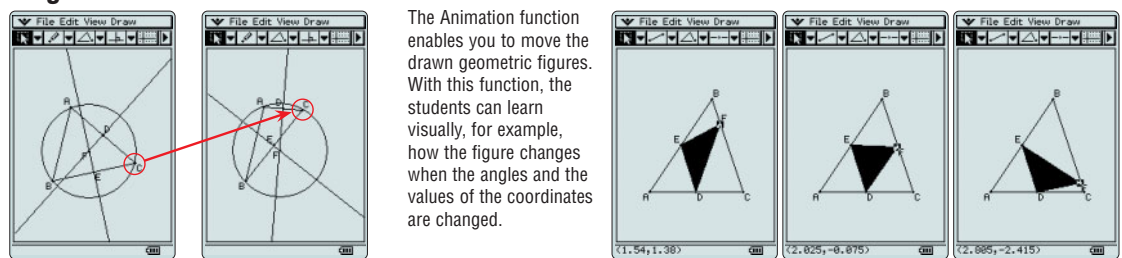

The Natural Input/Output function enables you to input and display expressions or display the results of the calculation in the same format shown in the textbook.

## Geometric Graphing Functions

### Geometric Graphing

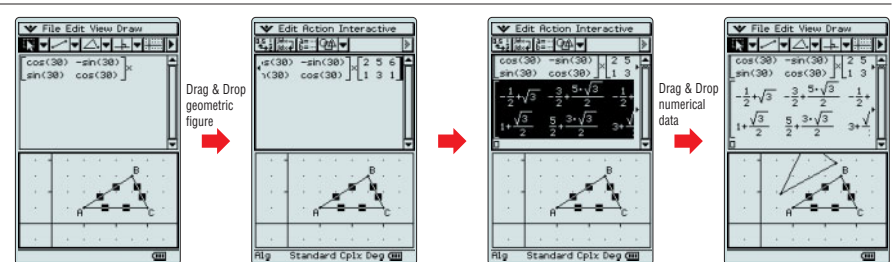

As shown in the following examples, the students can learn the general theorem by drawing the figures, and they can confirm that the theorem still holds true even when they deform the triangle.

The Animation function enables you to move the drawn geometric figures. With this function, the students can learn visually, for example, how the figure changes when the angles and the values of the coordinates are changed.

### Geometric Graphing by using the Drag & Drop Function

By dragging and dropping a geometric figure to the main application window, you can obtain the numerical data for the figure. And by dragging and dropping the numerical data to the Geometry window, the data can be reflected in the figure.

### Geometry Link Function

The Geometry Link function enables you to dynamically link the eActivity data and the Geometry window data.

## eActivity and Presentation Applications

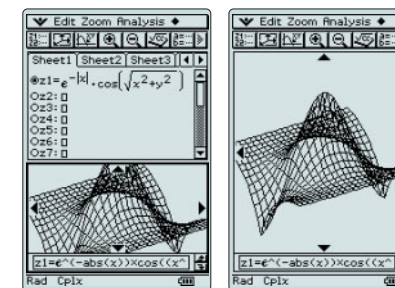

**eActivity** The eActivity has four advantages over using paper:

1. You can create and prepare your own original activities for the class with eActivity.
2. Students can work on a problem at their own pace.
3. Students can try out various approaches to solving a problem by themselves.
4. It enables texts, expressions, figures and graphs to be presented on the screen of the ClassPad 300PLUS.

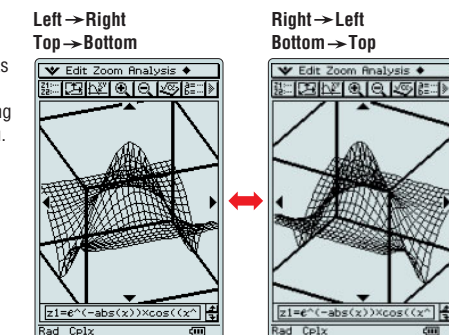

## 3-dimensional Graphing

### 3-dimensional Graphing

The 3-dimensional Graphing function enables you to draw and display a 3-dimensional graph defined by the formula  $z = f(x, y)$ . You can split the display window into 3D Graph Editor window and 3D Graph window, or enlarge the 3D Graph window to see a larger graph.

You can rotate the graph as you like by selecting and tapping one of the following commands from the menu.

## Built-in Software

### Spreadsheet

With this function, you can organize and tabularize the collected data or use it for analysis after drawing a statistical graph. Of course, it can also be used effectively for table calculations.

### Verify

With the Verify function, you can transform expressions or adopt solutions in your own way. The unit will verify whether the input calculation formula is in an equivalent relation with the adjacent expression. This function is just perfect for learning how to do equation and integration calculations.

fx-9860G SD fx-9860G

Hardware Features

High-resolution LCD

The fx-9860G series features a sharp, crisp display of the high-resolution LCD with enlarged dot-area, assuring larger and even sharper images of formulas, graphs and graphics. The clear, eye-friendly, large-sized 64 x 128 dot display improves the efficiency of study.

Software Features

Natural Input Display

Just like writing in a notebook, fractions, roots, powers and integrals can be input and displayed as written in the textbook. In this way, the Natural Input Display deepens the understandings of the student. Also, it displays the result of the fraction calculation as it is shown in the textbook.

•High-speed CPU

By employing high-performance, high-speed CPU, the fx-9860G series remarkably accelerated the processing speed. The speed increased dramatically compared to conventional models.

•A large capacity 1.5MB Flash Memory

With an ample 1.5MB Flash Memory, various data and applications can be downloaded and stored without worrying about memory capacity.

•Ready-to-use USB functions

Since USB cable, unit-to-unit cable and Program-Link Software are included in the package, high-speed data communication between PC and the unit, or unit-to-unit data communication and program exchange can be performed immediately from the day of purchase.

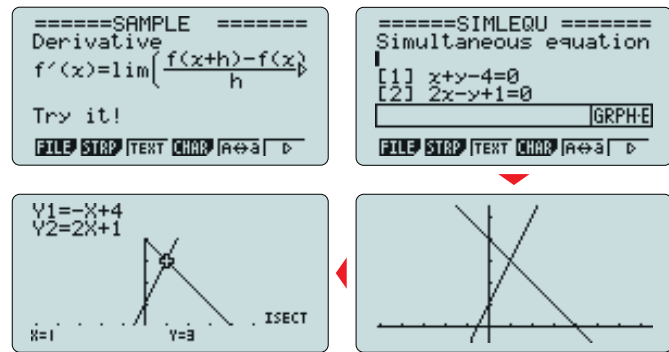

•SD Card Slot (SD model only)

The fx-9860G SD is equipped with a SD card slot which allows easy data exchange.

eActivity

This unit is equipped with the popular eActivity function of the ClassPad 300. The innovative eActivity functions of the fx-9860G series allow the students, not to mention teachers, to create their own problems or study materials. With this function, students can learn at their own pace and study more efficiently at school or at home. By making full use of the superb features of the eActivity function, motivation for learning and understanding can be greatly improved.

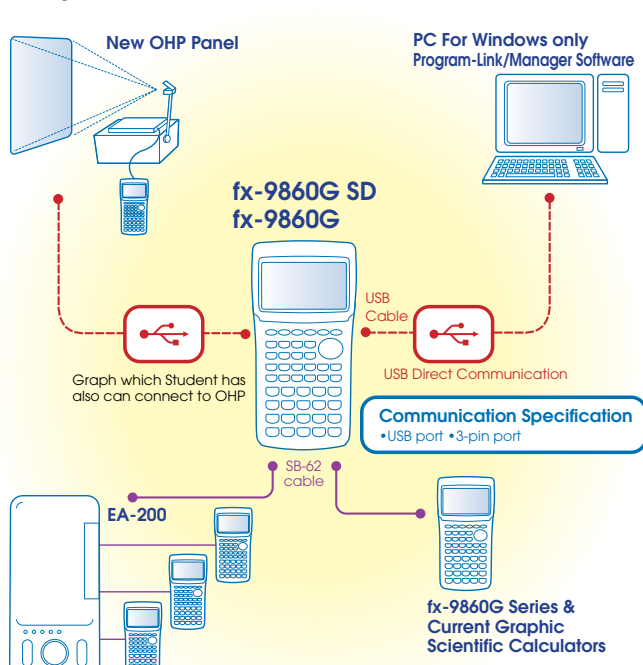

Built-in Software

Table calculations come easy with the built-in Spreadsheet function

Since the multi-function Spreadsheet even includes a built-in Graphing Function, it can be used effectively for exercises in table calculation lessons.

Main Functions

Algebra Applications

Computer Algebra System (CAS)

Using the Computer Algebra System (CAS), students can factor expressions, find limits of functions and calculate derivatives, integration and Taylor series expressions.

Factorization	Differential	Taylor expansion
$f(x) = (x+8)(x-2)(x+2)$	$\frac{d}{dx}(e^{\sin x} \cdot \cos x)$ $e^{\sin x} \cdot \cos(x) + e^{\sin x} \cdot (-\sin(x))$	$f(x) = \sin(x)$ $\sin(x) = x - \frac{x^3}{6} + \frac{x^5}{120} - \frac{x^7}{5040} + \dots$

Algebra

This application helps students manipulate equations. They can, for example, expand or simplify equations by themselves in an attempt to arrive at the correct solution. After they learn how to solve the problem in Tutor application, they can make use of this application to master how to solve the algebra problems.

<Step-by-step View> Follow the steps that take a calculation to its result!

$ax+b=c$ $ax=c-b$ $x=\frac{c-b}{a}$	$\frac{ax+b}{c} = \frac{ax+b}{c}$ $\frac{ax+b}{c} = \frac{ax+b}{c}$	$\frac{ax+b}{c} = \frac{ax+b}{c}$ $\frac{ax+b}{c} = \frac{ax+b}{c}$
---	--	--

Tutor

Students can study how to solve algebra problems as ALGEBRA FX 2.0 PLUS shows each step to arrive at the final solution, in a similar way as a teacher does it in class. It works under three different modes. •Auto Mode •Manual Mode •Verify Mode

Natural Textbook Display Models

CASIO's unique "Natural Expression Input Display" and "Natural Expression Result Display" functions allow the display of expressions of fractions, exponents, logarithms, powers and square roots just as they are written in the textbook. As a result, it enhances the comprehension of the students and improves the efficiency of the math class.

**Natural input**  
Allows the natural input of expressions of the basic functions as they are written.

$$\sqrt{\frac{1}{2}} \times \sqrt{\frac{1}{3}}$$

0.4082482905

**Natural output**  
Allows the natural display of the solutions of the basic functions.

$$\frac{\sqrt{18} + \sqrt{6} - \sqrt{32}}{3 + \sqrt{3}} = -2\sqrt{2}$$

**Full dot display**  
The input of equations and statistical data can be clearly displayed.
